

Engine –
The 2021 Plan for SAM

This deck gives an overview of SAM market feedback from Engine on the end of last year, and then outlines the key projects for 2021

1

Feedback summary

2

The plan for 2021

At the end of 2021 all SAM markets renewed Engine until the end of 2022

Common sense for SAM

Keep Engine

Engine adds value and depth to the brand

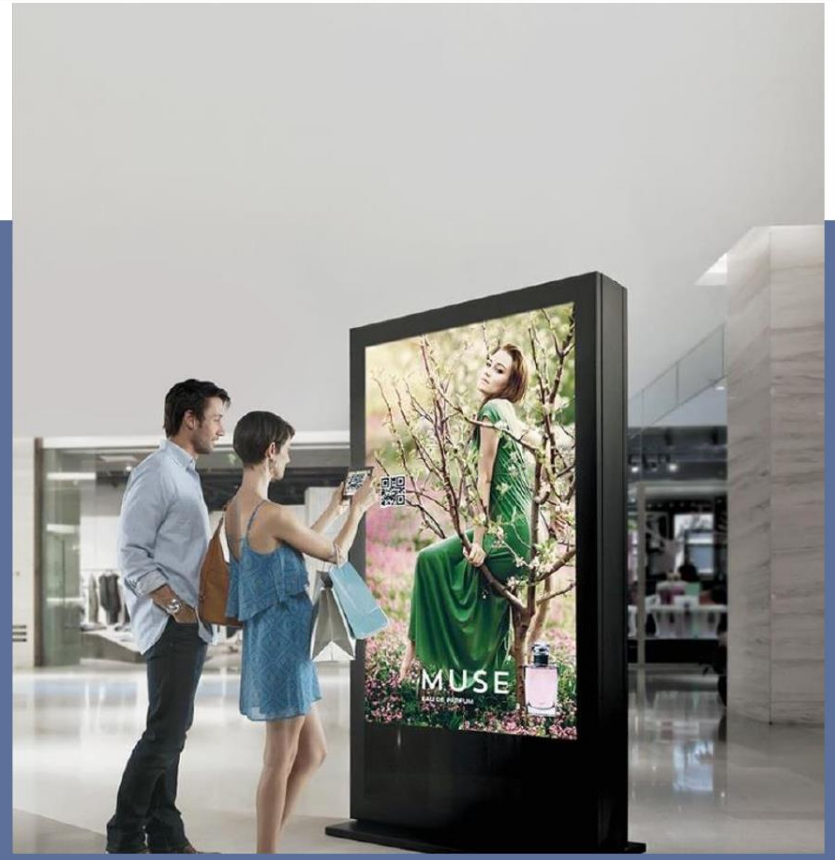

More possibilities on programmatic strategy

Tagging, audiences and DCO

Data is becoming the most relevant asset for the brands and the automation and expertise on it brings solid differentiation to the Market perception

Operational team is helpful and focused

Bring, develop and implement tools on a dedicated approach

Creation date: 02.25.21 | Responsible department for filing: BVMC | CSD-Class: Internal

Feedback on areas we could evolve focused on five key topics

Common sense

Improvements for Engine

Costs Reduction

Locally dedicated strategy

Parts articulation for SAM

Insights and strategic intelligence

Make the processes more agile and faster

Reduce steps of implementation

✓ Audiences scale (LOTAME)

Leads dedication

Clear KPIs and proven efficience / Methodology

Customized dashboards

3 Creation date: 02.25.21 | Responsible department for filing: BVMC | CSD-Class: Internal

2

The plan for 2021

The key tasks for 2021

Focus areas	 Cost reduction	 Local strategy Insights & intelligence	 Make the processes more agile and faster Reduce implementation steps	 Audiences scale Leads dedication	 Clear KPIs & efficience methodology Customized dashboards
Engine key projects	1. Hub & costs review	2. Continue integration into strategy, focusing on adoption	5. Deploy Data Driven Marketing Services *	6. Audience boost via new use cases & enhance core product	9. Enhance efficiency tracking & commercial process
		3. Continue sharing best practice between markets	7. DCO Uptick via expanding Video & Social and evolving Display**		
		4. Define impact of Google 3rd Party cookie sunset & evolve to fit	8. Explore new services and productise MMP**		

* Argentina only **Additional costs

1. Hub & costs review

Objective	Task	Lead/s	Timeframe
Hub & costs review	Review costs of FTEs for Americas Hub	Alejandro	Done
	Alignment with HQ, Region & Markets	Alejandro, Gavin, Tom	Done
	Deploy updated commercial	Tom, Gladi	Done

Brazil	Argentina	LAM
22.4% saving	46.% saving	38.1% saving

2. Continue integration into strategy, focusing on adoption

Lean In is collaboration framework to help integrate Engine audience and content insights into local, regional and global campaign strategy and process.

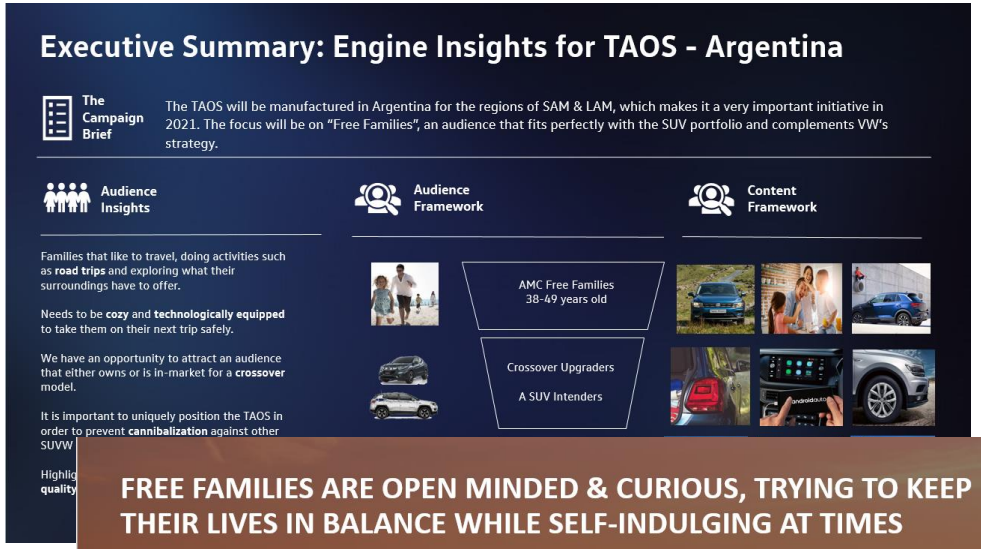

There are three key pillars;

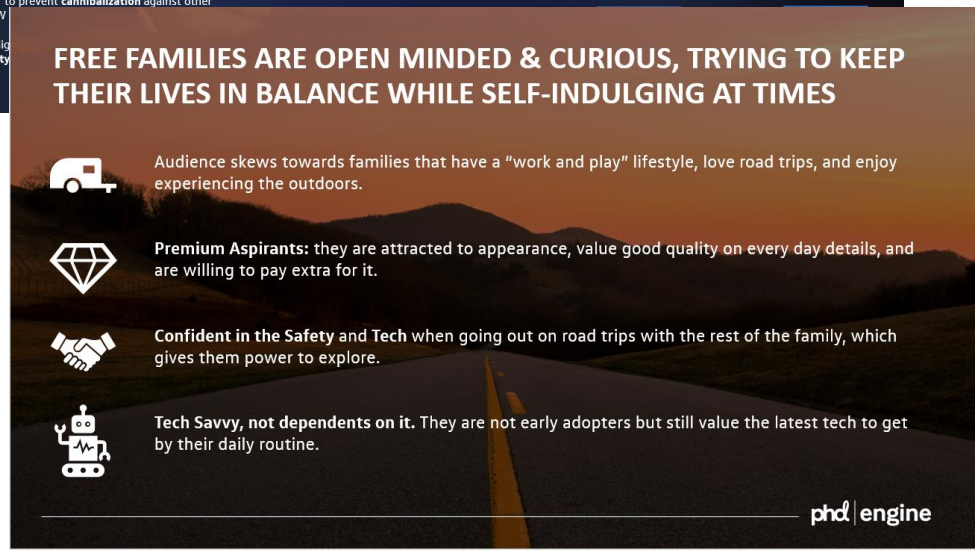

Annual Planning

Campaign Strategy

Test & Learn

Lean In strategies we have delivered for SAM

Dynamic content timelines and next steps for ALMAP & VW

Once the plan has been signed off, it is key that a kick off call with the creative agency is booked ASAP to allow time for content creation and for the set up to be completed for the beginning of June 2021.

Task	Owner	Due Date
Kick off call cross teams to go through the DCO creative strategy, timelines & what ALMAP will need to produce	engine	25/04/21
ALMAP to work with DCO engine to finalize the DCO creative approach & what assets need to be created	ALMAP/engine	05/05/21
VW sign off the final creative proposal & the decision tree	VW	15/05/21
ALMAP to develop the assets & copy needed for campaign	ALMAP	25/05/21
Variants are built & signed off by VW	ALMAP/VW	30/05/21
DCO set up is completed to go live at the beginning of June	PHD/engine	04/06/21

With the support of PHD, the DCO engine team will lead this workflow with ALMAP

Once activity has gone live creative will be closely monitored, where, based on statistical significance engine will work with Voltage to optimise & evolve the DCO creative strategy. VW should factor this in when finalising the creative scope.

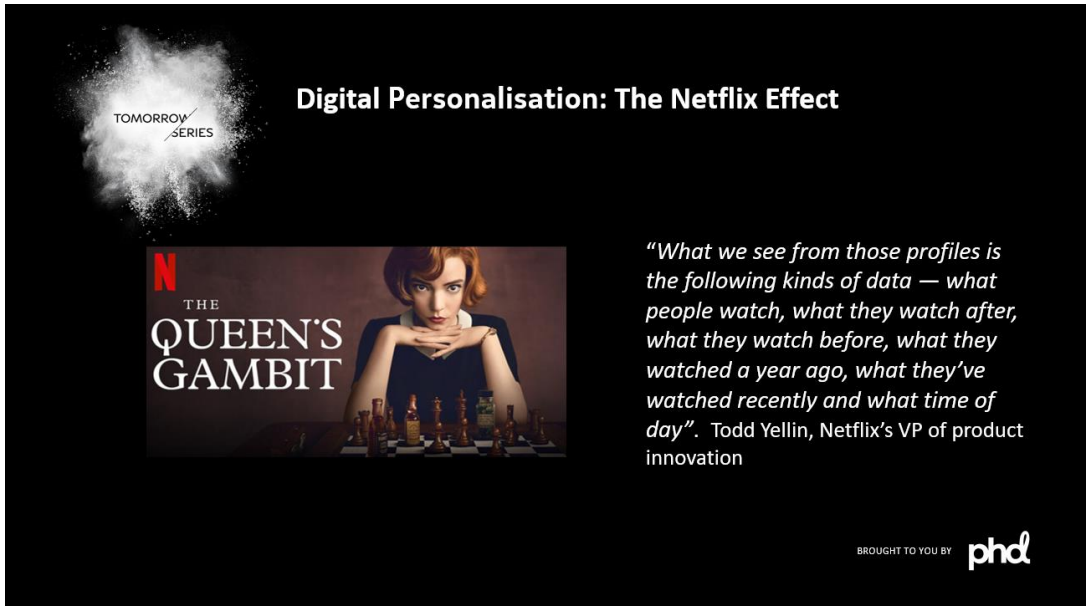

phd | engine

2. Continue integration into strategy, focusing on adoption

Objective	Task	Leads	Timeframe
Continue integration into strategy, focusing on adoption	Rolling response to Lean In briefs from Ar & Br	Gladi, Manu, Alexa, Gavin, Jon, Ez	2021
	'Lean-In Lite' approach for LAM – A key campaign per year, for markets that use DCO & Audiences	Gladi, Manu, Alexa, Gavin, Jon, Ez	2021
	Adoption of Lean in– rolling monitoring of market engagement	Gladi	Monthly in Service Delivery calls
	Review of optimisation process & deployment	Fraser & Es	Review Q1, then roll-out
	Update the story-telling with Lean In, including DCO & Audience insights	Gavin, Ez	Q1, then ongoing

3. Continue sharing best practice between markets -
Present ‘The Netflix Effect’, the next Tomorrow Series, in April

3. Continue sharing best practice between markets

Objective	Task	Leads	Timeframe
Continue sharing best practice between markets	Present 'Netflix Effect' to SAM markets	Dan, Gladi, Alexa, Ez, Gavin	Early April
	New Topic for Q2 – be great to get ideas from SAM on what you would like to covet	Gladi, Gavin	Late April
	Continue quarterly, with new theme and lead each quarter	Defined each Q	Q2-Q4

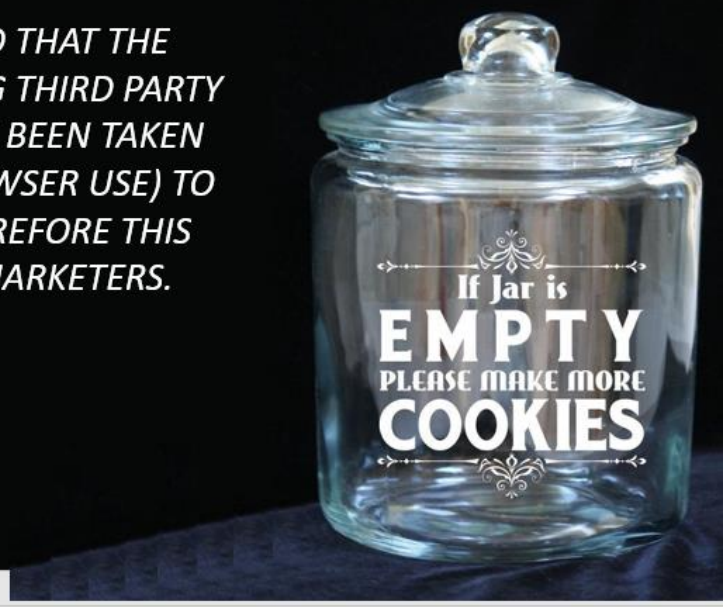

4. Define impact of Google 3rd Party cookie sunset & evolve to fit

SESSION 1

THEME: "Preparing for an Empty Cookie Jar"

TOMORROW SERIES

IN JANUARY 2020, GOOGLE ANNOUNCED THAT THE CHROME BROWSER WILL STOP SUPPORTING THIRD PARTY COOKIES BY 2022. SINCE 2018, STEPS HAVE BEEN TAKEN BY SAFARI AND CHROME (63% OF THE BROWSER USE) TO MAKE THIS TECHNOLOGY OBSOLETE. THEREFORE THIS SHOULD NOT COME AS A SURPRISE TO MARKETERS.

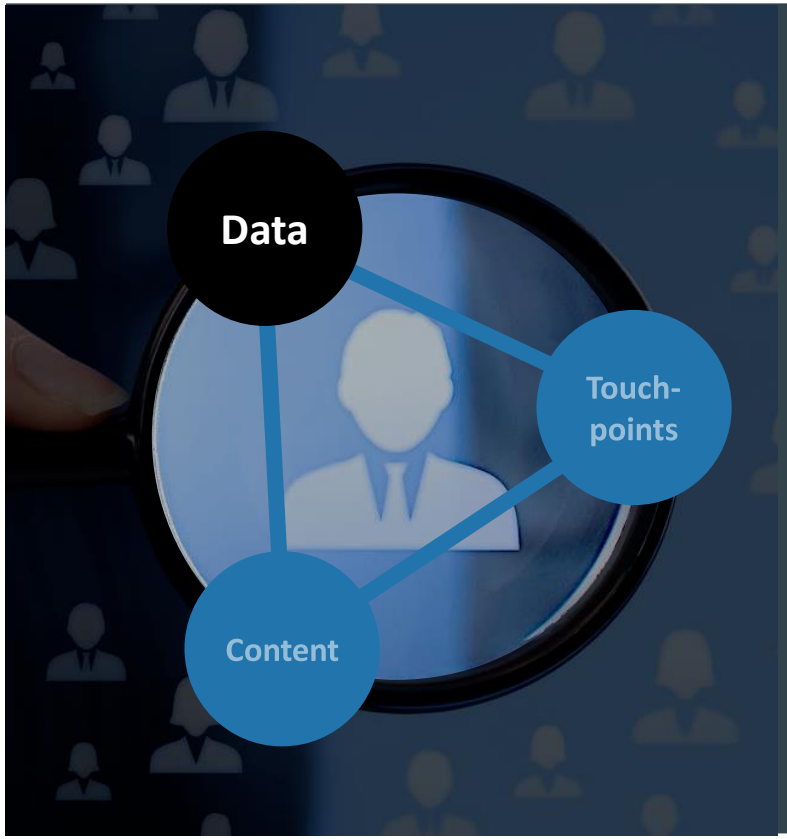

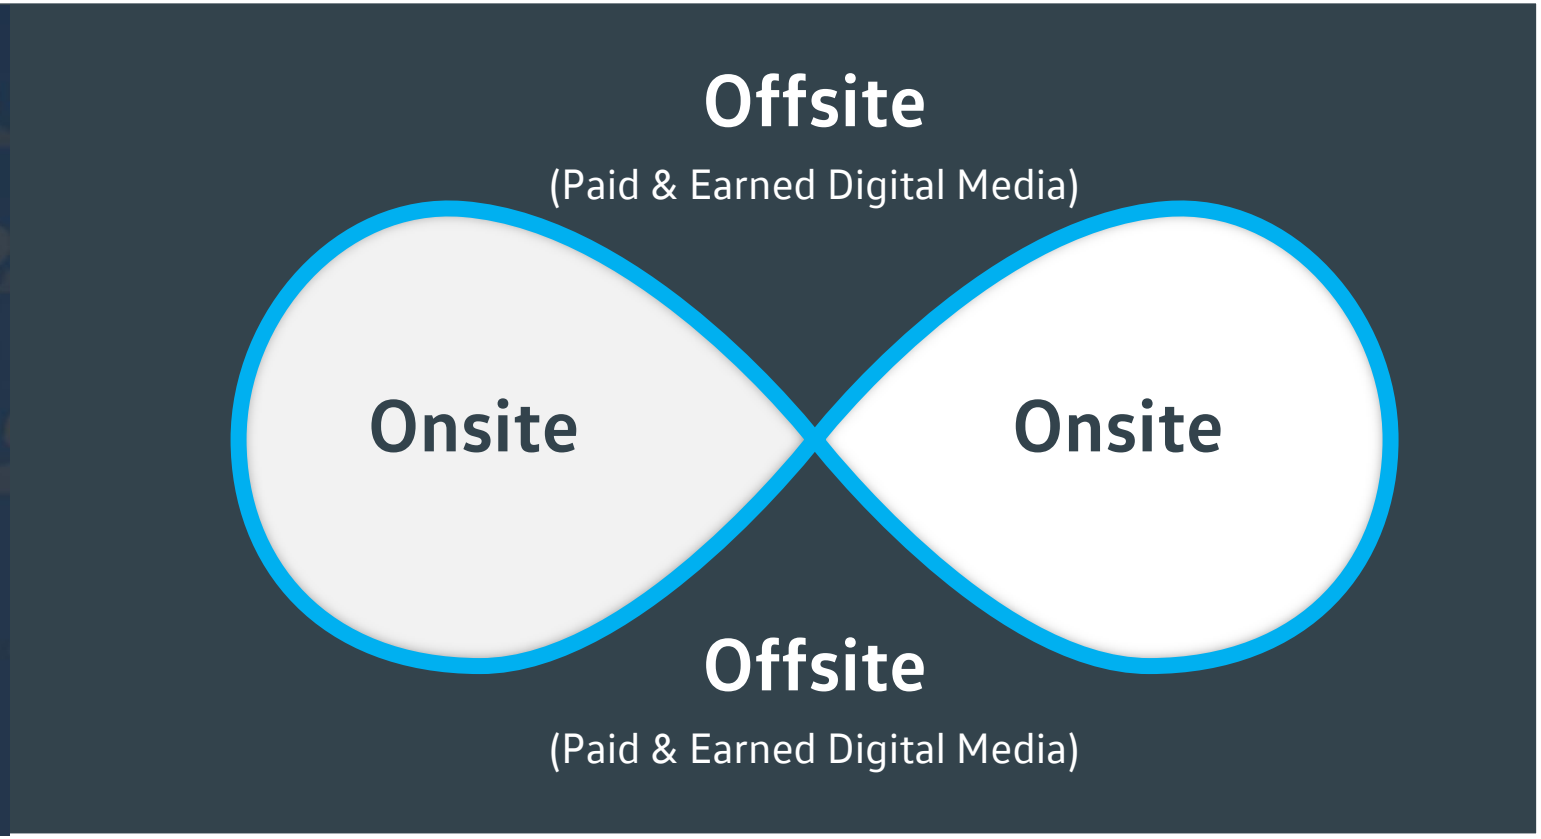

4. Define impact of Google 3rd Party cookie sunset & evolve to fit

Objective	Task	Lead/s	Timeframe
Define impact of Google 3rd Party cookie sunset & evolve to fit	Framework for assessing & evolving	Fraser	Q2
	Assessing the impact of the announcement, including running test in local market on DCO & audiences	Fraser	Q2-Q3
	Recommendations on how products evolve in light of the above, including presentations to SAM markets	Fraser	Q3-Q4
	Start the product evolution process	TBD	Q4

5. Deploy Data Driven Marketing Services

Smart Digital & Engine are now both part of Omnicom, and we have the opportunity to better connect onsite and offsite data

5. Deploy Data Driven Marketing Services

A market needs to take Smart Digital & Engine audience & DCO services for DDMS to work.

Objective	Task	Lead/s	Timeframe
Deploy Data Driven Marketing Services	Define the deployment approach & align with VMD	Fraser	Q1
	Market tests	Dan	Q2
	Deploy across second wave markets - Argentina	Gladi	Q3-Q4
	Build optimisations into model for 2022	Fraser	Q4

6. New custom audience use cases, reproducing early success from other markets

Mexico

Background
The Vento campaign launch in November of 2020 marked the first time Advanced Retargeting Project audiences were incorporated into a campaign in the LATAM region. The objective of the campaign was to target an audience of users considering purchasing a Vento

What was done
ARP Floodlight tags on the Mexico website collected the IDs of users who visited the Vento model page or performed any further actions on the Vento page and retargeted them with relevant campaign messaging

Results
To date, the campaign has seen great success with a conversion rate 350% higher than previous retargeting audiences

Impressions	Clicks	CTR
4,700,710	7,406	0.16%

Cost	Total Conversions	Conversion Rate	CPA
$286,049	59,445	1.26%	$4.81

Line Item	Imp	Clicks	CTR	CPC	Conversions	CVR	CPA	CPM
Start Configurator Vento Autos Familiares Model Interest	45,772	137	0.3%	159.54	10.000	0.02%	$2,185.67	$477.51
Start Configurator Autos Familiares Model Intent	6,477	18	0.28%	155.03	152.000	2.35%	$18.36	$430.85
Site Visitation|Brand Interest	3,292,254	2,390	0.07%	25.02	7,603.000	0.23%	$7.87	$18.16
Site Visitation|Brand Intent	116,453	220	0.19%	131.75	18,985.000	16.3%	$1.53	$248.91
Site Visitation|Brand Aficionado	142,970	214	0.15%	152.43	12,623.000	8.83%	$2.58	$228.17

6. Audience boost via new use cases & enhance core product

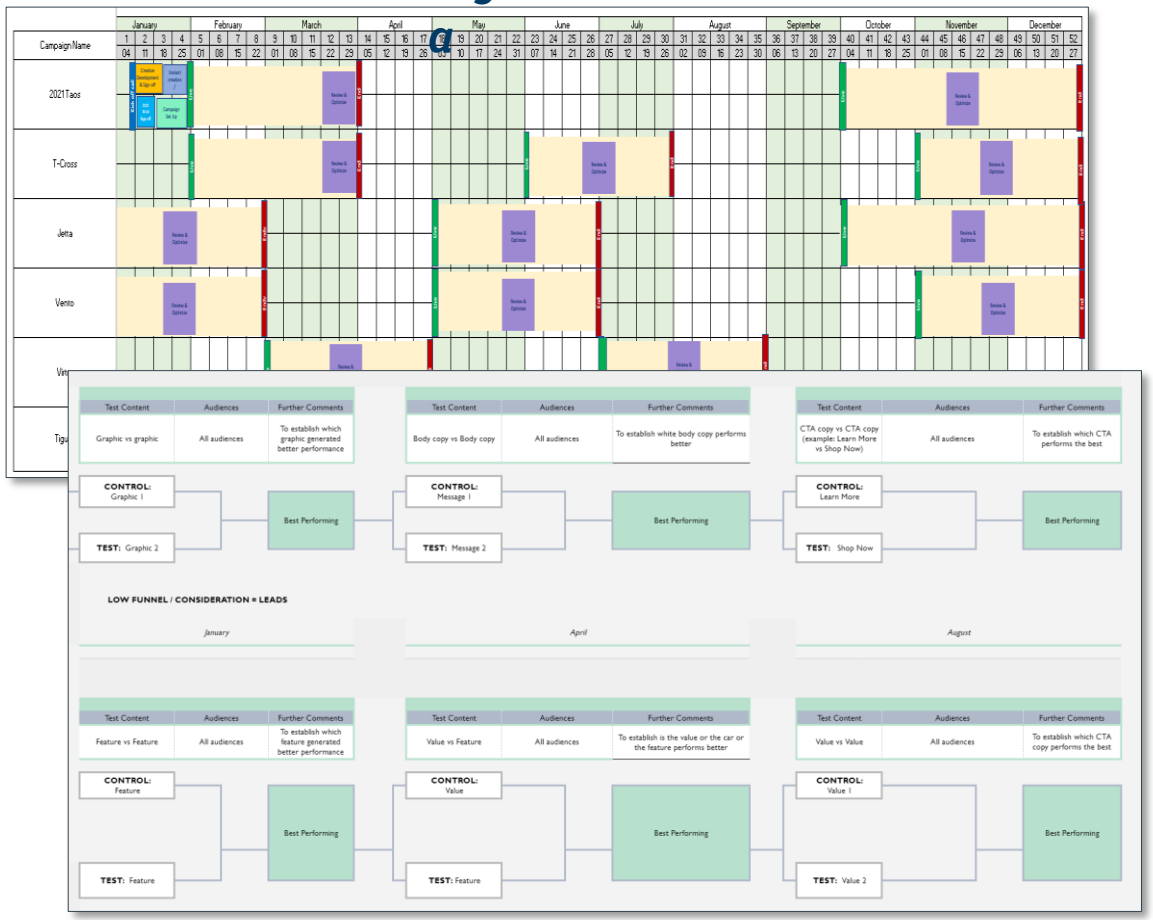

Objective	Task	Leads	Timeframe
Audience boost via new use cases & enhancing core product	Monitoring Audience Adoption	Gladi	Monthly service delivery calls
	Look-a-Likes & Re-targeting implementation on Engine	Gladi, Fraser	Q2, Q3
	Building out & deploying Prospecting Use Case	Fraser	Define Q1, Deploy Q2
	Market-specific objectives	Gladi	Agree by end March, then monitor
	Expand contextual audience catalogue	Fraser	Q2, Q3
	Reviewing contextual offering	Fraser	Q2, Q3

7. DCO Uptick via expanding Video & Social and evolving Display

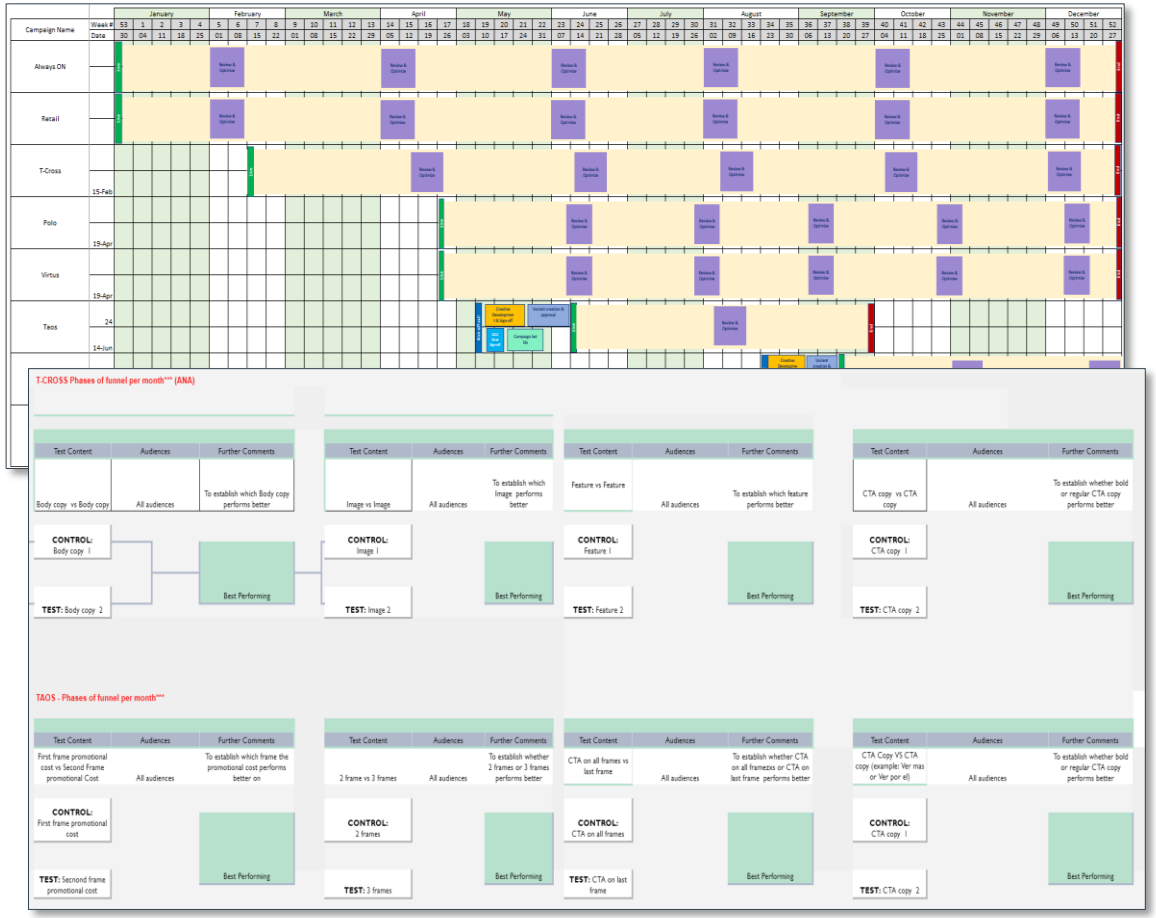

Objective	Task	Leads	Timeframe	Notes
DCO Uptick via expanding Video & Social and evolving Display	Focus on Video & Social DCO	Alexa	Q3	Please note there is an additional cost for Video & Social DCO
	DCO Display Adoption	Alexa, Ez	Monthly service delivery calls	N/A
	DCO Display Automation	Alexa, Ez	Define approach Q1, then execute	
	DCO for Direct Buys	Alexa, Ez	Define approach Q1, then execute	
	Market-specific objectives	Alexa, Ez	Agree by March, then monitor	
	Review & evolve DCO Display – decisioning/personalisation	Ez, Fraser	Q2-Q3	

2021 DCO Content Calendar and Learning Agendas

Argentina

Brazil

8. Explore new services and productise MMP

Objective	Task	Leads	Timeframe	Notes
Explore new services and productise MMP	Ask SAM if any new services they would like Engine to explore	Gladi	Start Q2	Please note there is likely to be an additional cost for new services
	Explore and define any new services	Fraser, Gavin & whole team	Q2-Q3	
	Align new services with VMD	Gavin	Q3	
	Scope MMP as service a market can buy	Fraser, Gavin	Q2-Q3	
	Align MMP with WOB	Fraser, Gavin	Q3	
	Discuss new services with SAM	Gladi, Gavin	Q4	

9. Enhance efficiency tracking & commercial process

Previous ways of measuring Engine efficiency and their challenges

2018/2019

This method was based on comparing changes in year-on-year programmatic KPIs. Local markets would select between 1 and 5 cost pers, and Engine would measure the changes.

There were two challenges with this approach. Firstly, this compared overall programmatic activity, rather than Engine vs non-Engine. Secondly, it was based on year-on-year comparisons, and a lot can change in a year e.g. new website launch, new model launch without a car configurator, Covid.

July 1st 2020 Onwards

The new method was developed with Ebiquity. For key campaigns markets would use 5% of their programmatic budget to measure efficiency.

It improved on the previous approach in two ways. Firstly, it was based on real time activity, and secondly, it compared Engine vs non-Engine.

However, many markets didn't want to use 5% of their budget to measure efficiency, and they opted out.

An updated approach that measures Engine vs. Non-Engine KPIs in real time, without needing markets to put aside budget

Summary

- The updated approach to efficiency tracking is semi-automated, and based on data from the local DSP.
- This approach removes the challenges from the two previous approaches
  - It compares Engine vs non-Engine activity, in real time
  - It doesn't require local markets to set aside budget to gauge Engine efficiency

Process

1. The process would apply to programmatic activity in Omnicom markets where tagging, audience creation and DCO display are in use.
2. Local agency teams will need to follow a simple naming convention that highlights in the DSP what is Engine and non-Engine activity.
3. Local markets will select 2-3 KPIs . Since programmatic is used across all parts of the funnel, markets should choose a maximum of one KPI from each funnel stage.
4. Using DSP reports Engine will review specific campaign performance on how Engine activity vs non-Engine activity compares in real time, measured against a single KPI that aligns to the funnel KPI
5. This will be reported quarterly, and will come into effect from 1st April 2021, and run until December. The efficiency measured from these three quarters will be applied retrospectively to Q1 to give a complete number for the year.

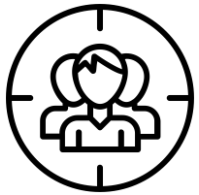

Getting the most efficiency out of Engine needs all stakeholders to work together

Strategy	Local PHD: Complete Annual Plans	Local PHD: *Lean In* campaign briefings	Local PHD & VW: Pick through the funnel KPIs
DCO	Local VW: Supply imagery for all campaigns	Local PHD & VW: Approve & apply DCO Strategy best practices	
Audiences	Local VW: Approve tags	Local agencies: Use new use cases	

9. Enhance efficiency tracking next steps for SAM

Feb	April	May	Quarterly
Make recommendations to VMD & align	Align on approach, decide if this approach will be mandated	Start new approach	Reporting
	Communicate new approach to SAM		
	Local agencies set-up DSP conventions		
	Select KPIs		

In summary, the key Engine tasks for 2021 are aligned your priorities

Focus areas	 Cost reduction	 Local strategy Insights & intelligence	 Make the processes more agile and faster Reduce implementation steps	 Audiences scale Leads dedication	 Clear KPIs & efficience methodology Customized dashboards
Engine key projects	1. Hub & costs review	2. Continue integration into strategy, focusing on adoption	5. Deploy Data Driven Marketing Services	6. Audience boost via new use cases & enhance core product	9. Enhance efficiency tracking & commercial process
		3. Continue sharing best practice between markets	7. DCO Uptick via expanding Video & Social and evolving Display		
		4. Define impact of Google 3rd Party cookie sunset & evolve to fit	8. Explore new services and productise MMP
