# Dynamic campaign overview

Confidential & Proprietary

# Before starting

1) Do you have access to Studio? https://www.google.com/doubleclick/studio
    a) If you don't, create a Google Account using your work email as **Your current email address** and ask the access using this form
2) Are you entitled to run dynamic?
    a) You need to be a "content owner" to create dynamic profiles. Ask your account admin to enable it to you. Check next slide, for how he can do it.
3) Have you created an advertiser on Studio and connected it to DCM?
4) Is your advertiser enabled to run dynamic?
    a) If yes, on the dynamic tab you will see the advertiser, then just click there and start creating the dynamic profile, otherwise see on the next slides.

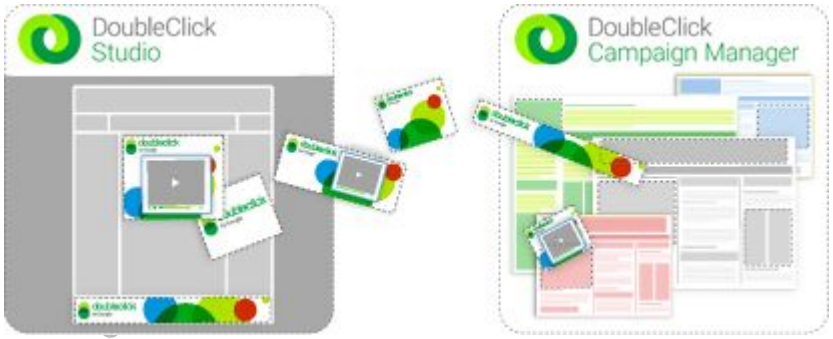

Confidential & Proprietary

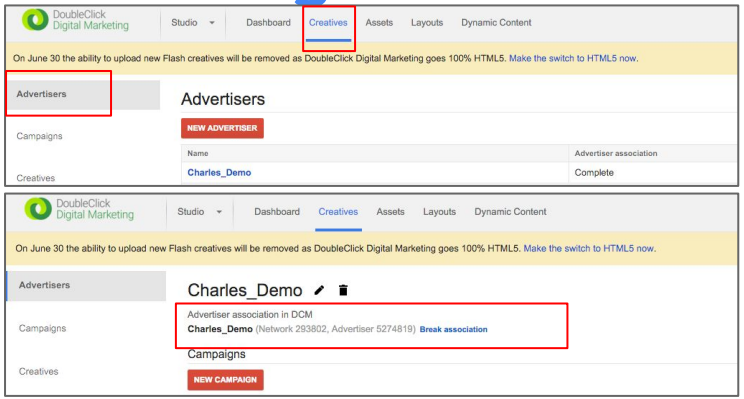

# Creating an advertiser and associating it to DCM

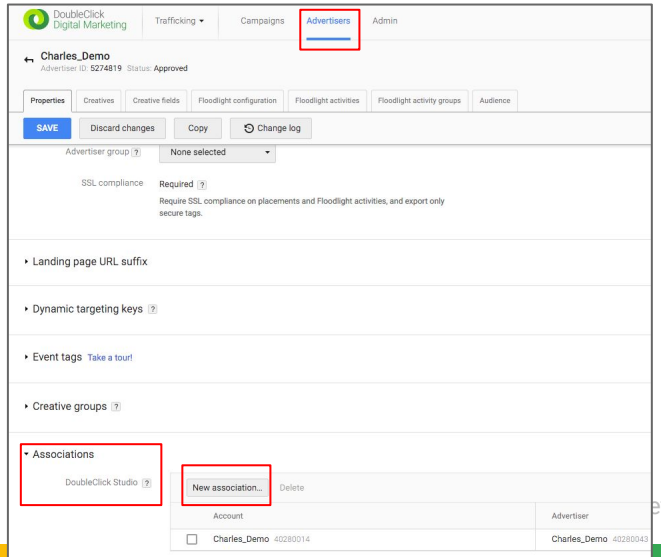

1) On the Creatives tab, select Advertisers to show your advertisers. If you don't have one there, you can create it using the button "New advertiser"

2) Select your advertiser, you will see if your advertiser is connected to DCM, like in the example.
If not, you will see a button "make association" and then you need to add the trafficker's email who have access to the DCM account you want to associate

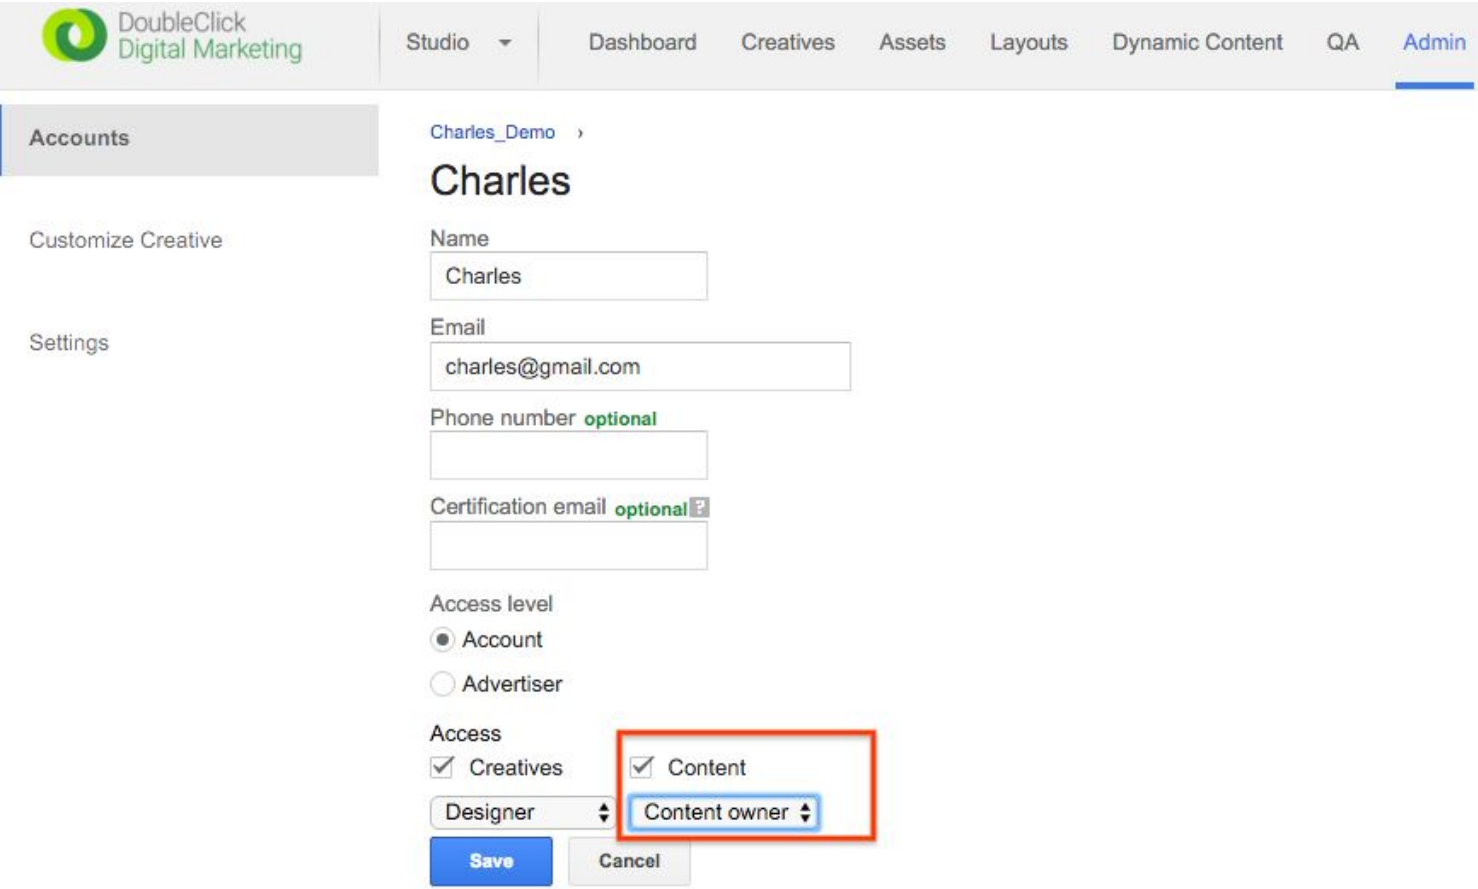

3) The trafficker will receive a code on his email and he will need to paste a code it on the advertiser properties on DCM, like we can see on the example.

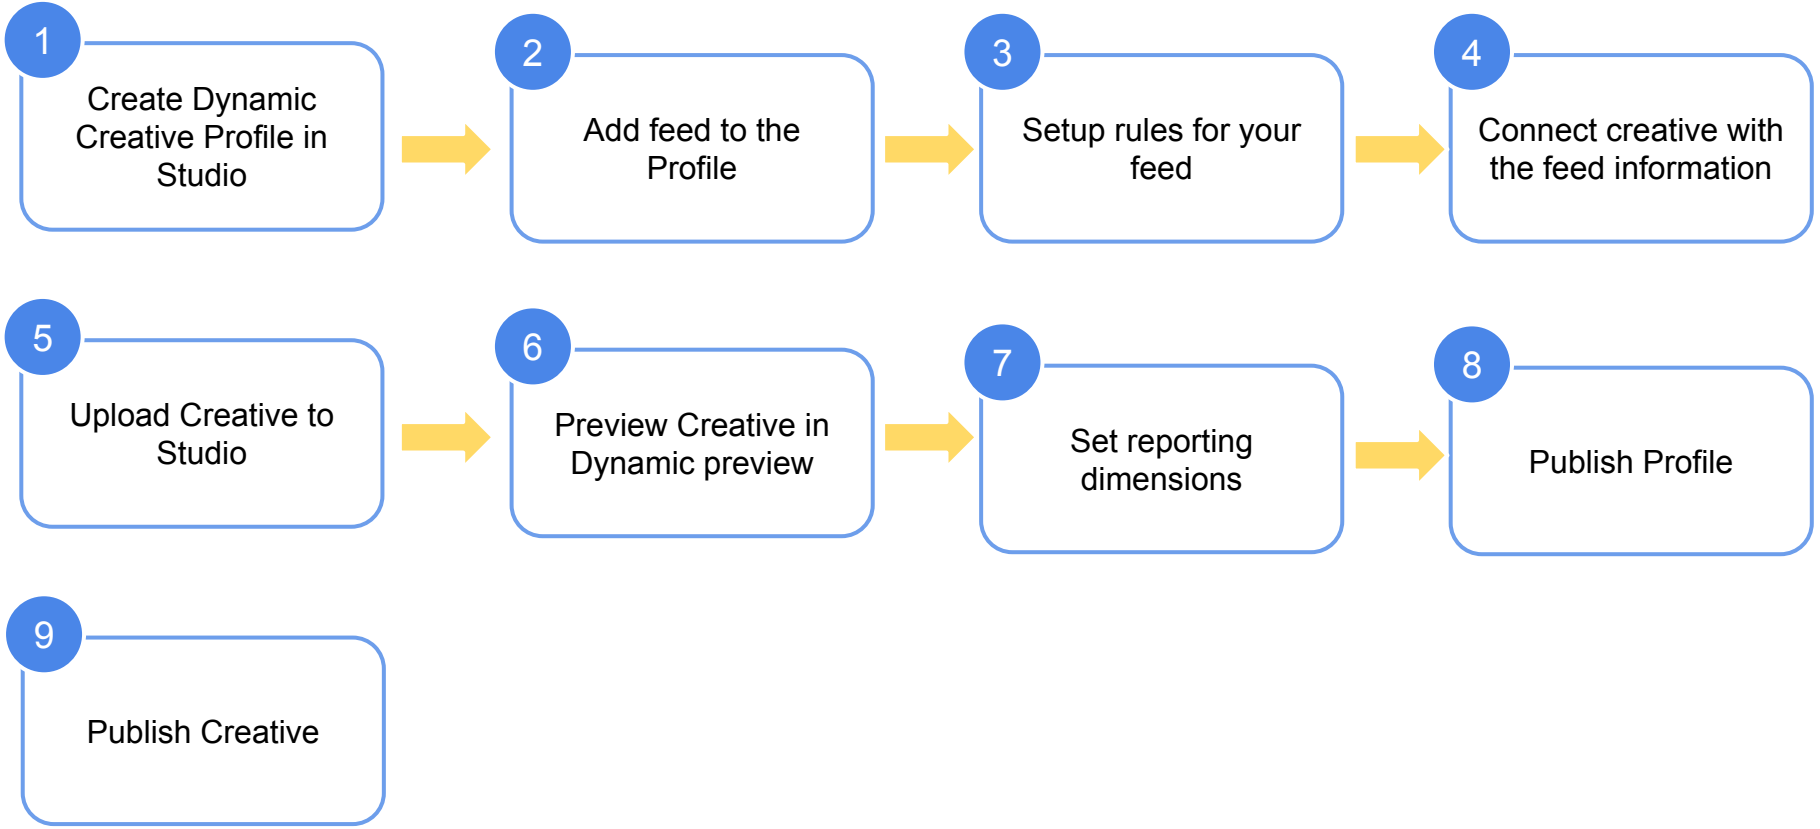

# User access: "content owner"

# Workflow

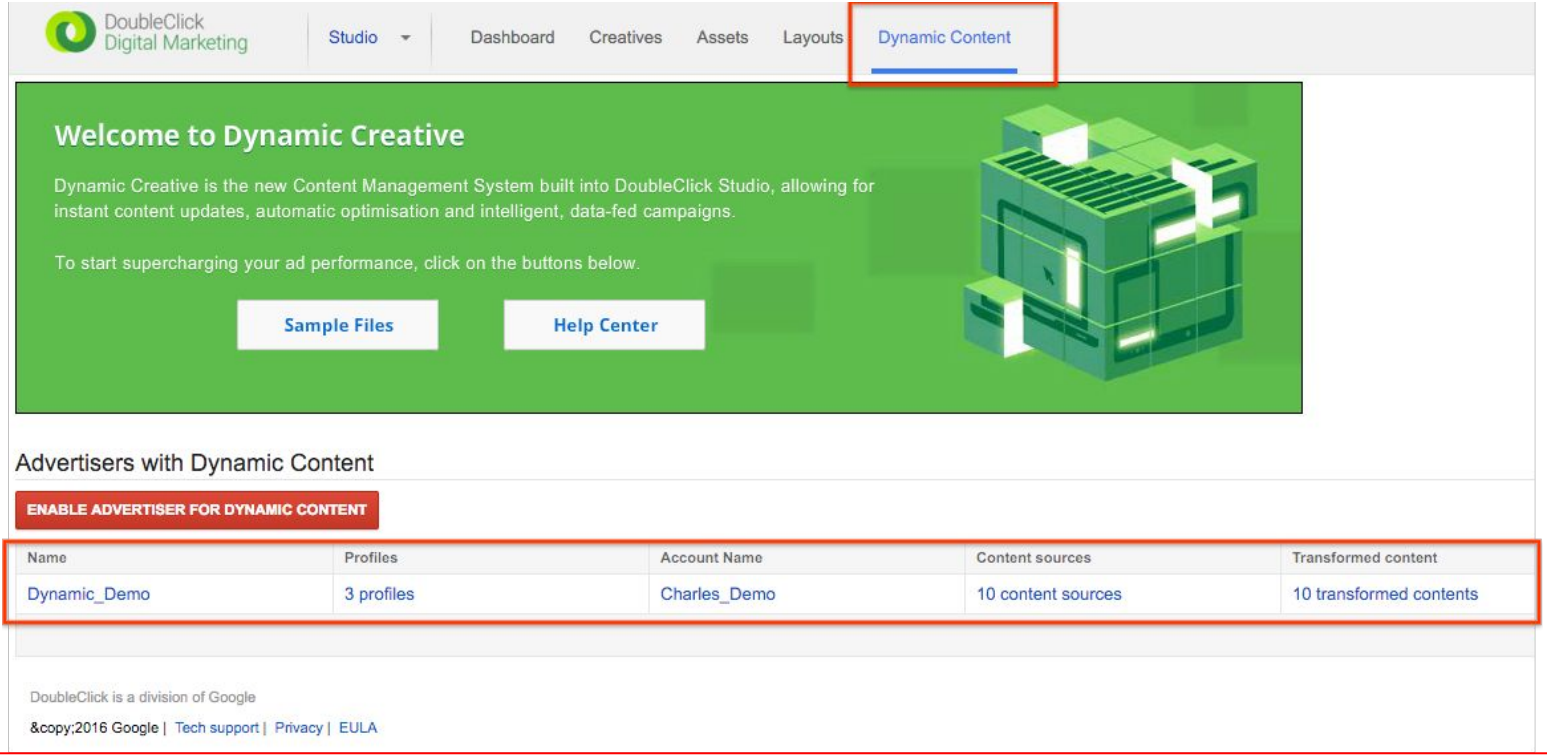

Google

Confidential & Proprietary

# Enable Advertiser for Dynamic Content

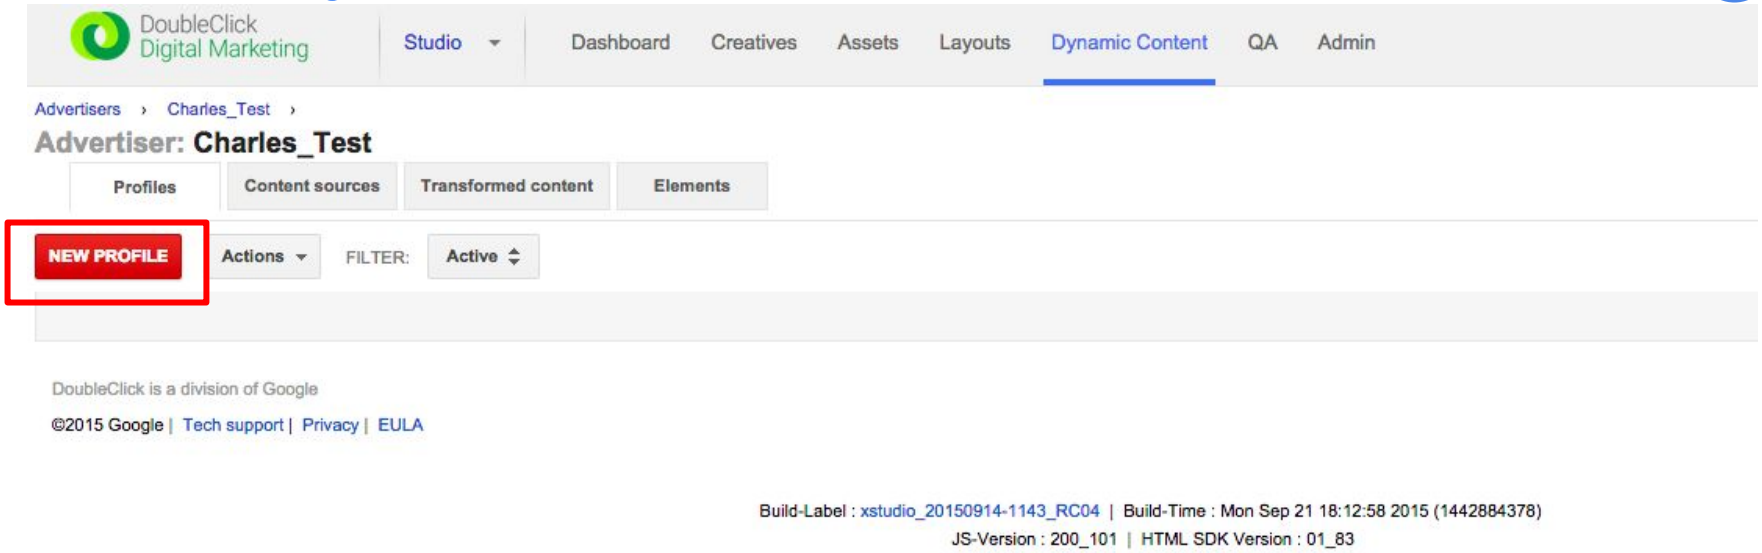

1

If you don't see one advertiser, a user having "content owner" rights should click on "Enabler Advertiser for Dynamic Content" and select the advertiser to enable.

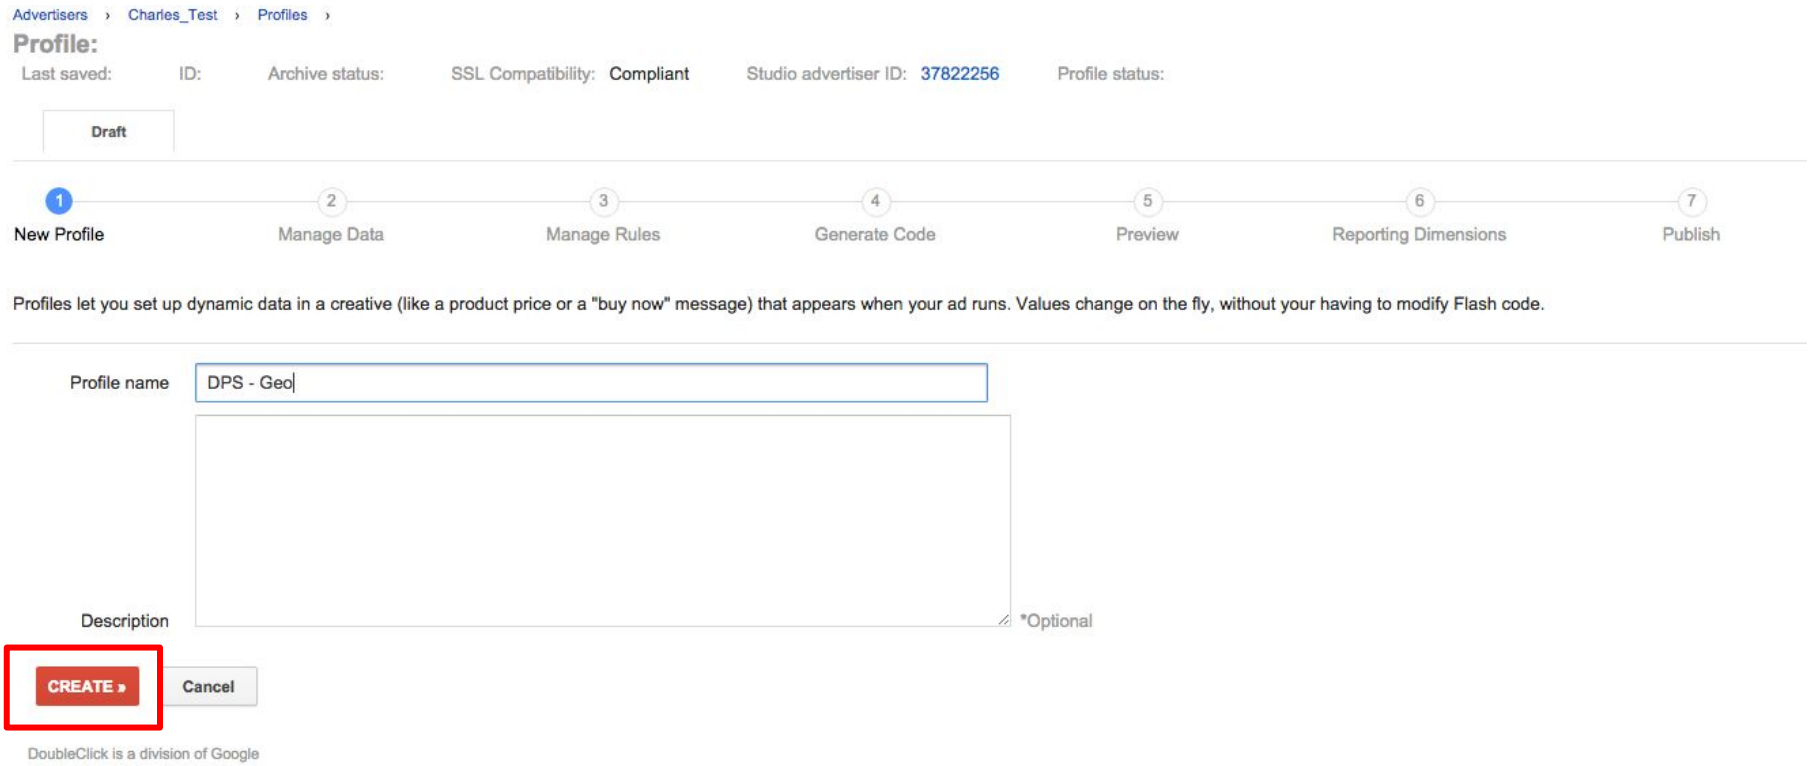

# Create Dynamic Creative Profile in Studio

# Add the feed to the profile

This is the most important step in your campaign!!!!!

**Client, media and creative shop** should collaborate to define the feed structure and the dynamic elements in your creative

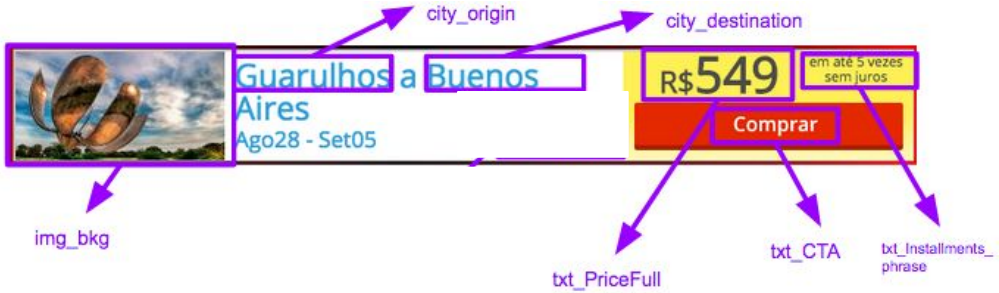

Confidential & Proprietary

# Add feed to the Profile

In our example, we want to filter geolocation by country, so we use the canonical names for countries.
Each strategy has its own special columns to filter.
Check the build guides for more info.
We have three types of columns.

Reporting Targeting Dynamic elements to change in your creative

| Unique_ID | Reporting_Label | Origin | Destination | isDefault | isActive | City_origin | City_destination | Price_full | CTA | Exit_URL | img_bkg |
|---|---|---|---|---|---|---|---|---|---|---|---|
| GRU_BUE | Guarulhos - Buenos | GRU | BUE | FALSE | TRUE | Guarulhos | Buenos Aires | R$ 549 | Comprar | http://www.travel.com/?gru_bue | buenos.jpg |
| NYC_LAX | New York - Los Angeles | NYC | LAX | FALSE | TRUE | New York | Los Angeles | $300 | Buy | http://www.travel.com/?nyc_lax | los_angeles.jpg |
| PAR_MIL | Paris - Milano | PAR | MIL | FALSE | TRUE | Paris | Milano | $150 | Achetez | http://www.travel.com/?par_mil | milano.jpg |

# Targeting strategies

### Geo Targeting:

Dynamic Geo targeting allows you to display different messages to different users depending on their location.

Learn more and download examples

### DCM ID Targeting:

DCM ID targeting allows you to display different creative messages depending on a DCM ID such a placement or site.

Learn more and download examples

### DSP Audience Targeting:

Audience targeting utilises data from either DBM or Adwords to display relevant messages to the user.

Learn more and download examples

### Scheduled Updates:

Utilise scheduled updates to display different creative messages on different dates or times of day.

Learn more and download examples

### Publisher Pass:

Publisher pass allows you to use data owned by the publisher to display different creative messages to different users.

Learn more and download examples

### Product Remarketing:

Dynamic Product Remarketing allows you to display creative based on the products user's have been viewing on your site.

Learn more and download examples

### Userlist Remarketing:

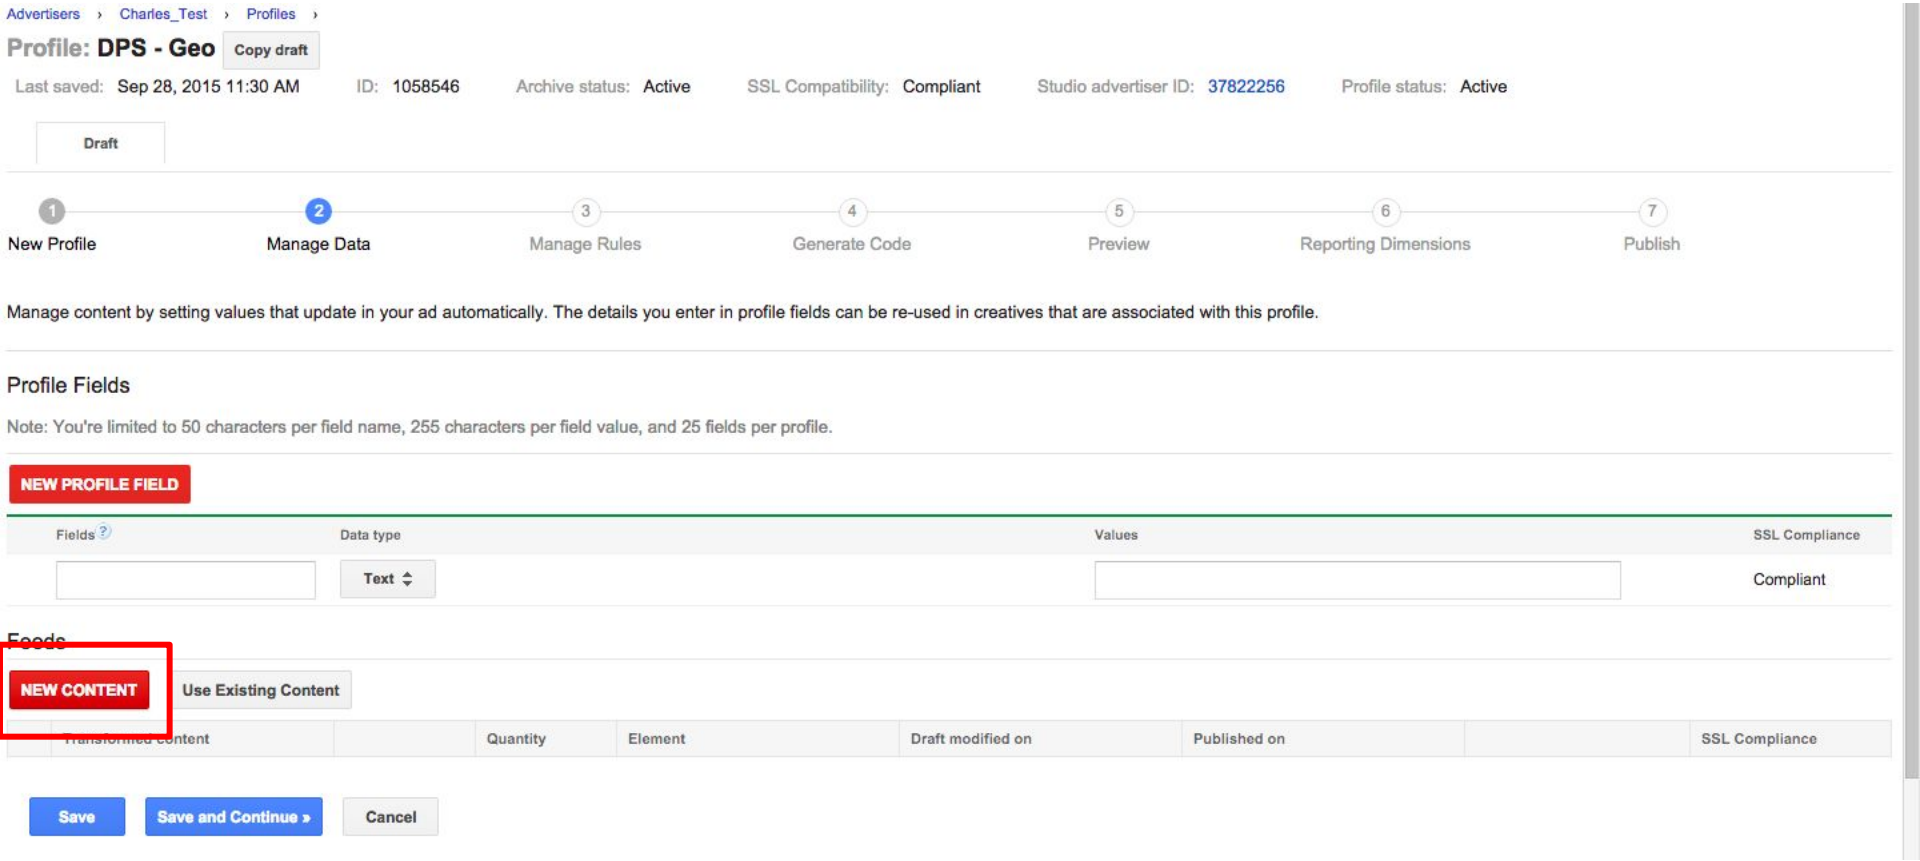

Userlist remarketing allows you to display different messages according to which pages a user has visited on your site.

# Add feed to the Profile

2

# Add feed to the Profile

You can import from:

- Local file
- Google docs
- Remote file

Build-Label : xstudio_20150914-1143_RC04 | Build-Time : Mon Sep 21 18:12:58 2015 (1442884378)
JS-Version : 200_101 | HTML SDK Version : 01_83

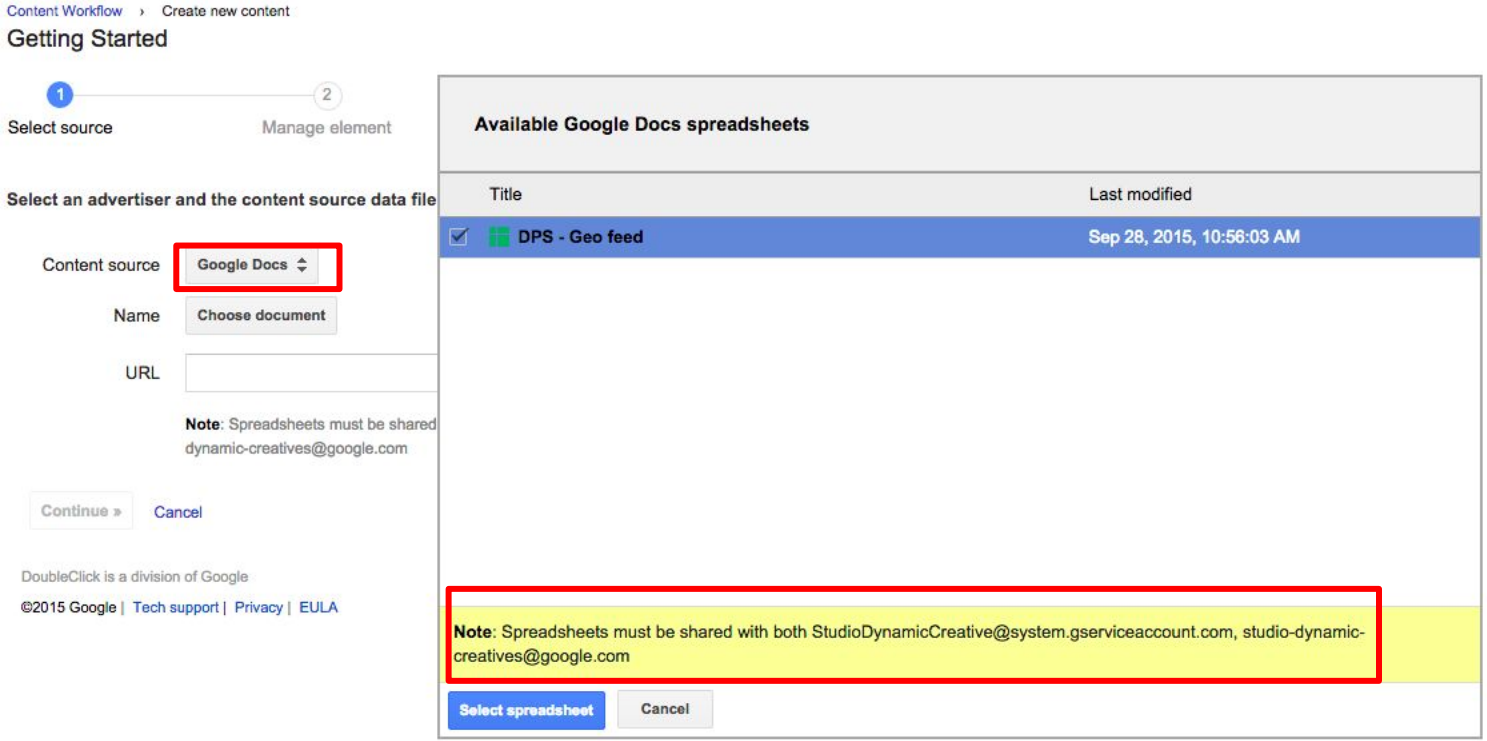

Confidential & Proprietary

# Add feed to the Profile

2

**In case of using a Google Docs Spreadsheets, you need to share your feed with the:**

**StudioDynamicCreative@system.gserviceaccount.com, studio-dynamic-creatives@google.com**

Feed Example

# Add feed to the Profile

**The field type is really important, it will allow us to use our columns to create rules to filter the data. Again, check each build guide to select the right field type for each value.**

**Special fields (optional)**

Default: Default

Start date: Unspecified

End date: Unspecified

Note: Unless you specify a time as part of the end date, the end date will effectively fall on 11:59:59 PM the day before. For example, an end date of 05/15/2014 means the actual end date is 05/14/2014 11:59:59 PM.

Time: ● System time ○ User time

If the date values have no time zone, select System time to use US Pacific Time as the default. User time sets content delivery parameters based on the user's time at impression. You can't select User time if your date values have time zones.

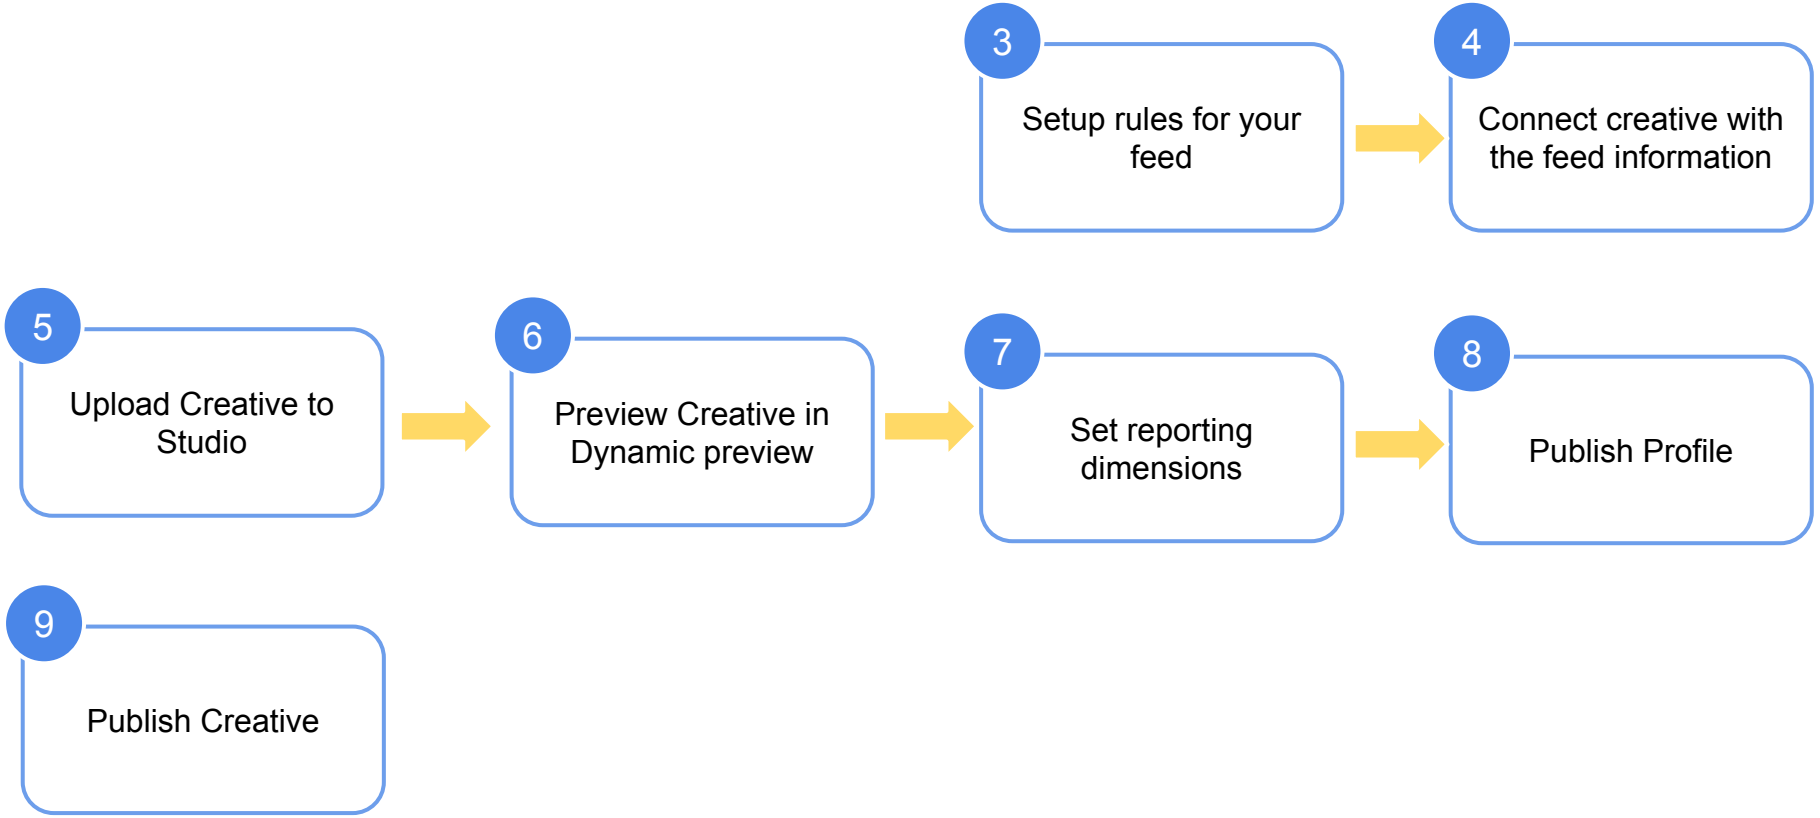

Active: Unspecified

**Values**

| Field name | Field type | Display | Sample value |
|---|---|---|---|
| Id | Text | ON | AR_BUE_RIO |
| Reporting_Label | Text | ON | AR_BUE_RIO |
| Default | Boolean | ON | FALSE |
| Country | Accurate geographic type | OFF | Argentina |
| City_Origin | Text | ON | Buenos Aires |
| City_Destination | Text | ON | Rio de Janeiro |
| txt_PriceFull | Text | ON | AR$ 2261 |
| img_bkg | AssetLibrary path | ON | DRM_Asset:Charles_Test/Demo_DPS_Geo/Bue.jpg |
| txt_CTA | Text | ON | Comprar |
| Landing_destino | Exit URL | ON | https://www.google.com.br/webhp?sourceid=chrome-instant&ion=1&espv=2&ie=UTF- |

Confidential & Proprietary

# Setup rules for your feed

For Geo the rules are simple, please refer to the Build guide for each strategy on www.richmediagallery.com/dynamic to know how to set up the rules.

# Setting up

4 Connect creative with the feed information

5 Upload Creative to Studio → 6 Preview Creative in Dynamic preview → 7 Set reporting dimensions → 8 Publish Profile

9 Publish Creative

Google

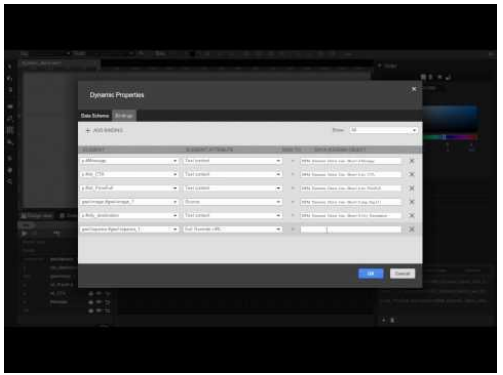

Confidential & Proprietary

# Connect the Creative with the feed information

Google Web Designer

We highly recommend to use the Google Web Designer, a free HTML5 development tool that simplify your dynamic banner creation on Studio. Download it here

See how you can connect your banner to the feed in a minute seeing this video

If you prefer, it is possible to develop your creatives using pure HTML5, see the next slide

Confidential & Proprietary

# Using pure HTML5 to develop your creative

PS: If you are using Google Web Designer, you can skip this slide.

1. You need to add the Studio Enabler
2. Connect the dynamic content with the values provided by the feed
3. You can start using this template: goo.gl/yP7Zr6

1 New Profile — 2 Manage Data — 3 Manage Rules — 4 Generate Code — 5 Preview — Reportin

Select the code format: HTML5 | AS2 | AS3

Copy the code snippet below and paste it into the Flash creative.
Then upload the creative to DoubleClick Studio and wait for it to process before previewing it in Step 5.

Format: HTML5

```
<!--
 * Dynamic Content Enable code for Profile: 1058546
 *
 * The following code initializes the following dynamic variables for
 * development testing and live serving of Fields associated to the above profile
-->

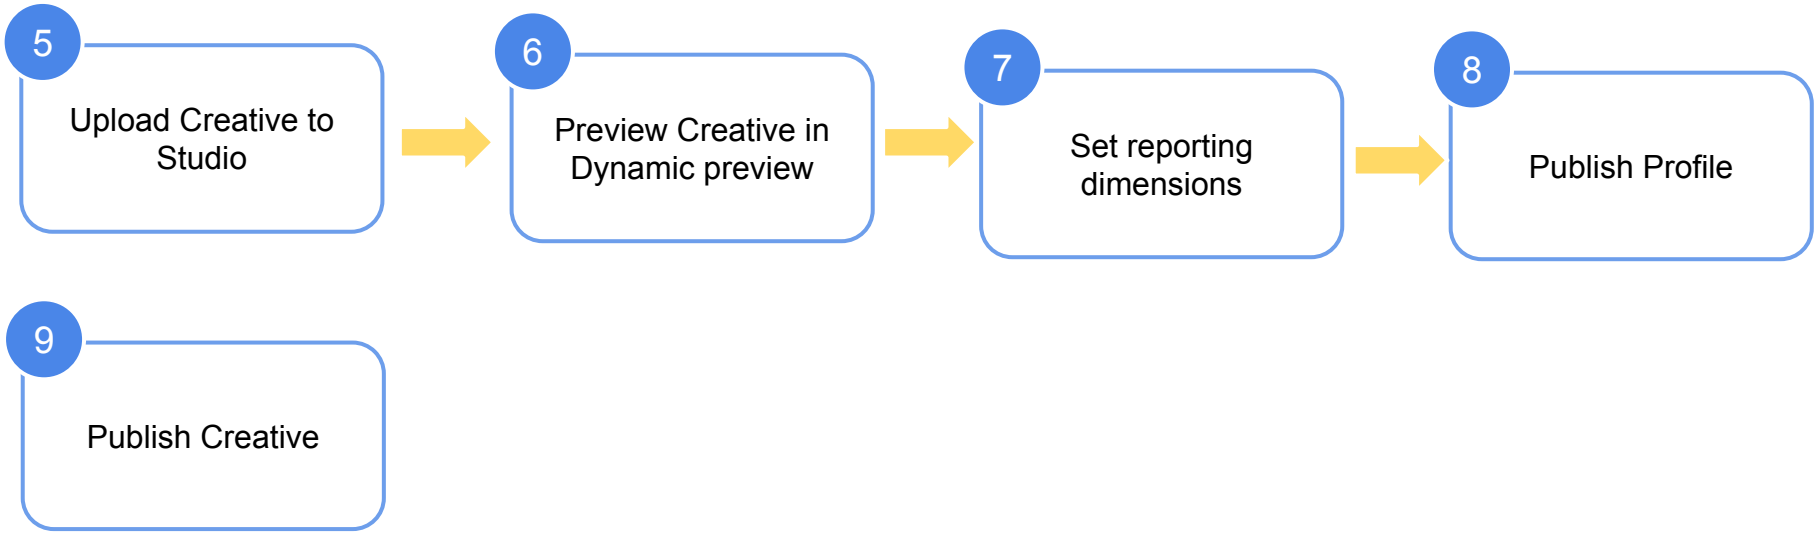

<!-- DynamicContent Start: HTML5 invocation code. -->
<script type="text/javascript">

// Dynamic Content variables and sample values
    Enabler.setProfileId(1058546);
    var devDynamicContent = {};

    devDynamicContent.DPS__Geo_feed_Content= [{}];
    devDynamicContent.DPS__Geo_feed_Content[0]._id = 0;
    devDynamicContent.DPS__Geo_feed_Content[0].Id = "AR_BUE_RIO";
    devDynamicContent.DPS__Geo_feed_Content[0].Reporting_Label = "AR_BUE_RIO";
    devDynamicContent.DPS__Geo_feed_Content[0].Default = false;
    devDynamicContent.DPS__Geo_feed_Content[0].City_Origin = "Buenos Aires";
    devDynamicContent.DPS__Geo_feed_Content[0].City_Destination = "Rio de Janeiro";
    devDynamicContent.DPS__Geo_feed_Content[0].txt_PriceFull = "AR$ 2261";
    devDynamicContent.DPS__Geo_feed_Content[0].img_bkg = {};
    devDynamicContent.DPS__Geo_feed_Content[0].img_bkg.Type = "file";
    devDynamicContent.DPS__Geo_feed_Content[0].img_bkg.Url = "https://s0.2mdn.net/ads/richmedia/studio/38841600/37517807_20150928062454132_Bue.jpg";
    devDynamicContent.DPS__Geo_feed_Content[0].txt_CTA = "Comprar";
    devDynamicContent.DPS__Geo_feed_Content[0].Landing_destino = {};
    devDynamicContent.DPS__Geo_feed_Content[0].Landing_destino.Url = "https://www.google.com.br/webhp?sourceid=chrome-instant&ion=1&espv=2&ie=UTF-8#q=bue
```

# Publish Creative

Now you need to make sure that your creative is working correctly.

For that you can use our Chrome extension tool to guide you check the creative quality

Download it here

More info you can check in this Help Center

Or you can use the Google QA services that has an SLA of 24h, see the next slide for more info

Confidential & Proprietary

# Publish Creative

After publishing the dynamic profile you can publish your creative to trafficking.

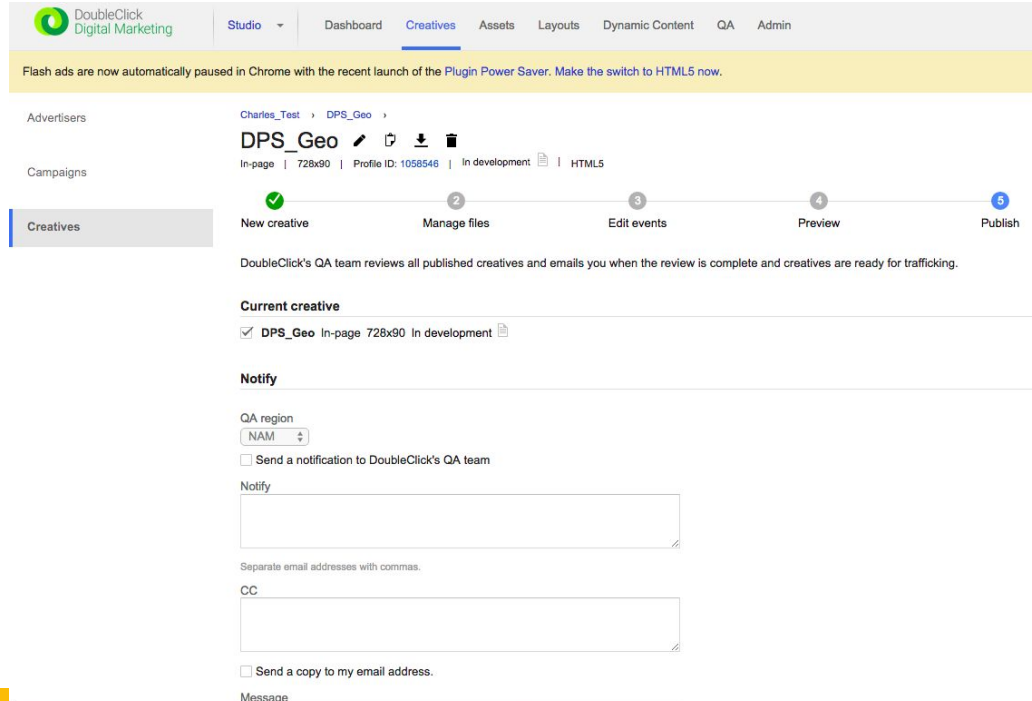

Always **select your QA region**, **check the box** to send the notification to DCLK QA team and **add on notify** your alias provided by gTech or drm-support-latam@google.com

As being a dynamic campaign, we can test the creative and the dynamic functionality ( you can do only the creative if you want. )

**1) Test the creative:**
In the message field send this:
**"Test as a normal creative, do not test the dynamic remarketing features "**

The QA team will test if creative is working normally, have exits, rendering correctly. Then it can be trafficked on DCM and you can generate the tags and you can start your campaign, if you wish.

**2) Test the remarketing/dynamic feature**
This time the QA team will emulate a user interacting with your website and being remarketed. If you want to test it, you need to give **the ad Tag**, **floodlights fired** and in **which pages it's firing.**

Thank you
