Part 2: Dynamic Set-up - Fundamental training

Data is fundamental to digital ad strategy and buying

Data-driven targeting

Abundant and transferable user-level data informs media-buying decisions

Data-driven purchasing

The historical and predicted performance of an ad informs and drives the bid prices (real-time bidding)

Data-driven messaging

Once you're talking to the right people, you have to tell them something they want to hear.

Applying the marketing funnel to dynamic strategies

Upper Funnel: Awareness

- Scheduled Updates
- DCM ID targeting
- Geo-targeting

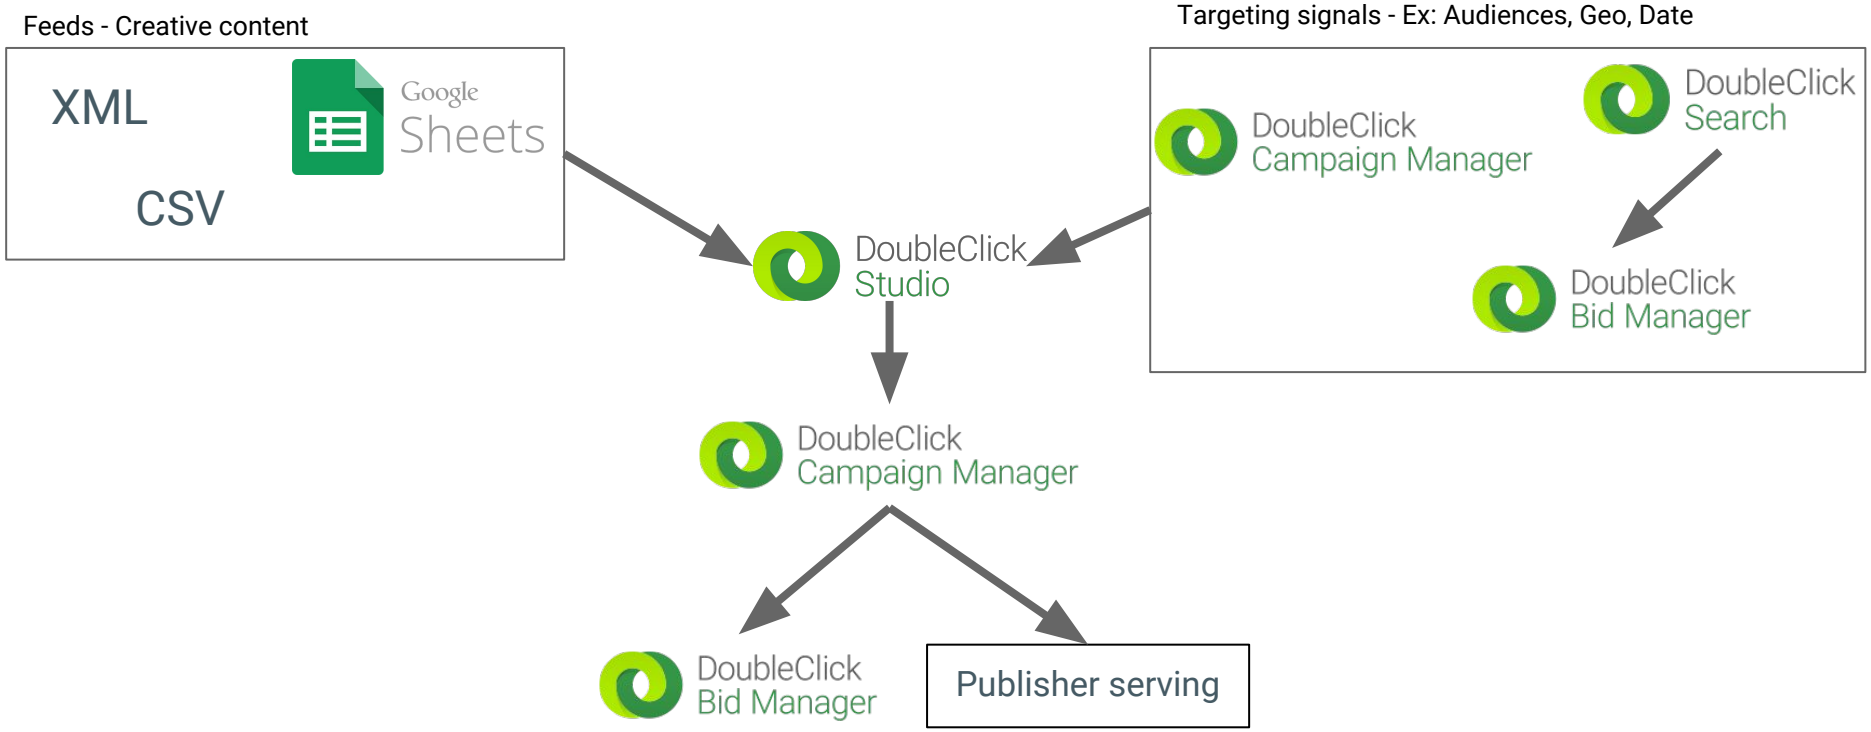

Mid Funnel: Retention

- Publisher Pass
- DSP Audience/Userlist Targeting

Lower Funnel: Purchase

- Product Remarketing

How dynamic works

Feeds, Creative content and targeting

Each strategy has its own special columns to select/filter which the creative content will show and after you can see which impressions did you have seeing the reporting columns.

We have three types of columns.and you can see an example below:

Reporting columns

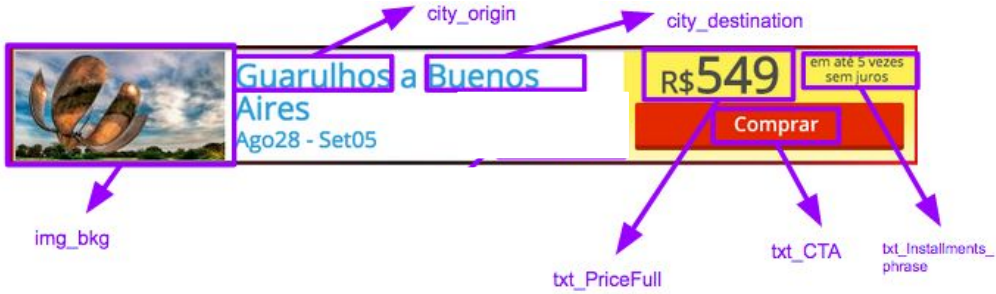

You will need at least one reference in your reportings to know which row where selected.

Targeting columns

It will vary depending of our strategy, it will select which creative content columns will render in your creative

Creative content columns

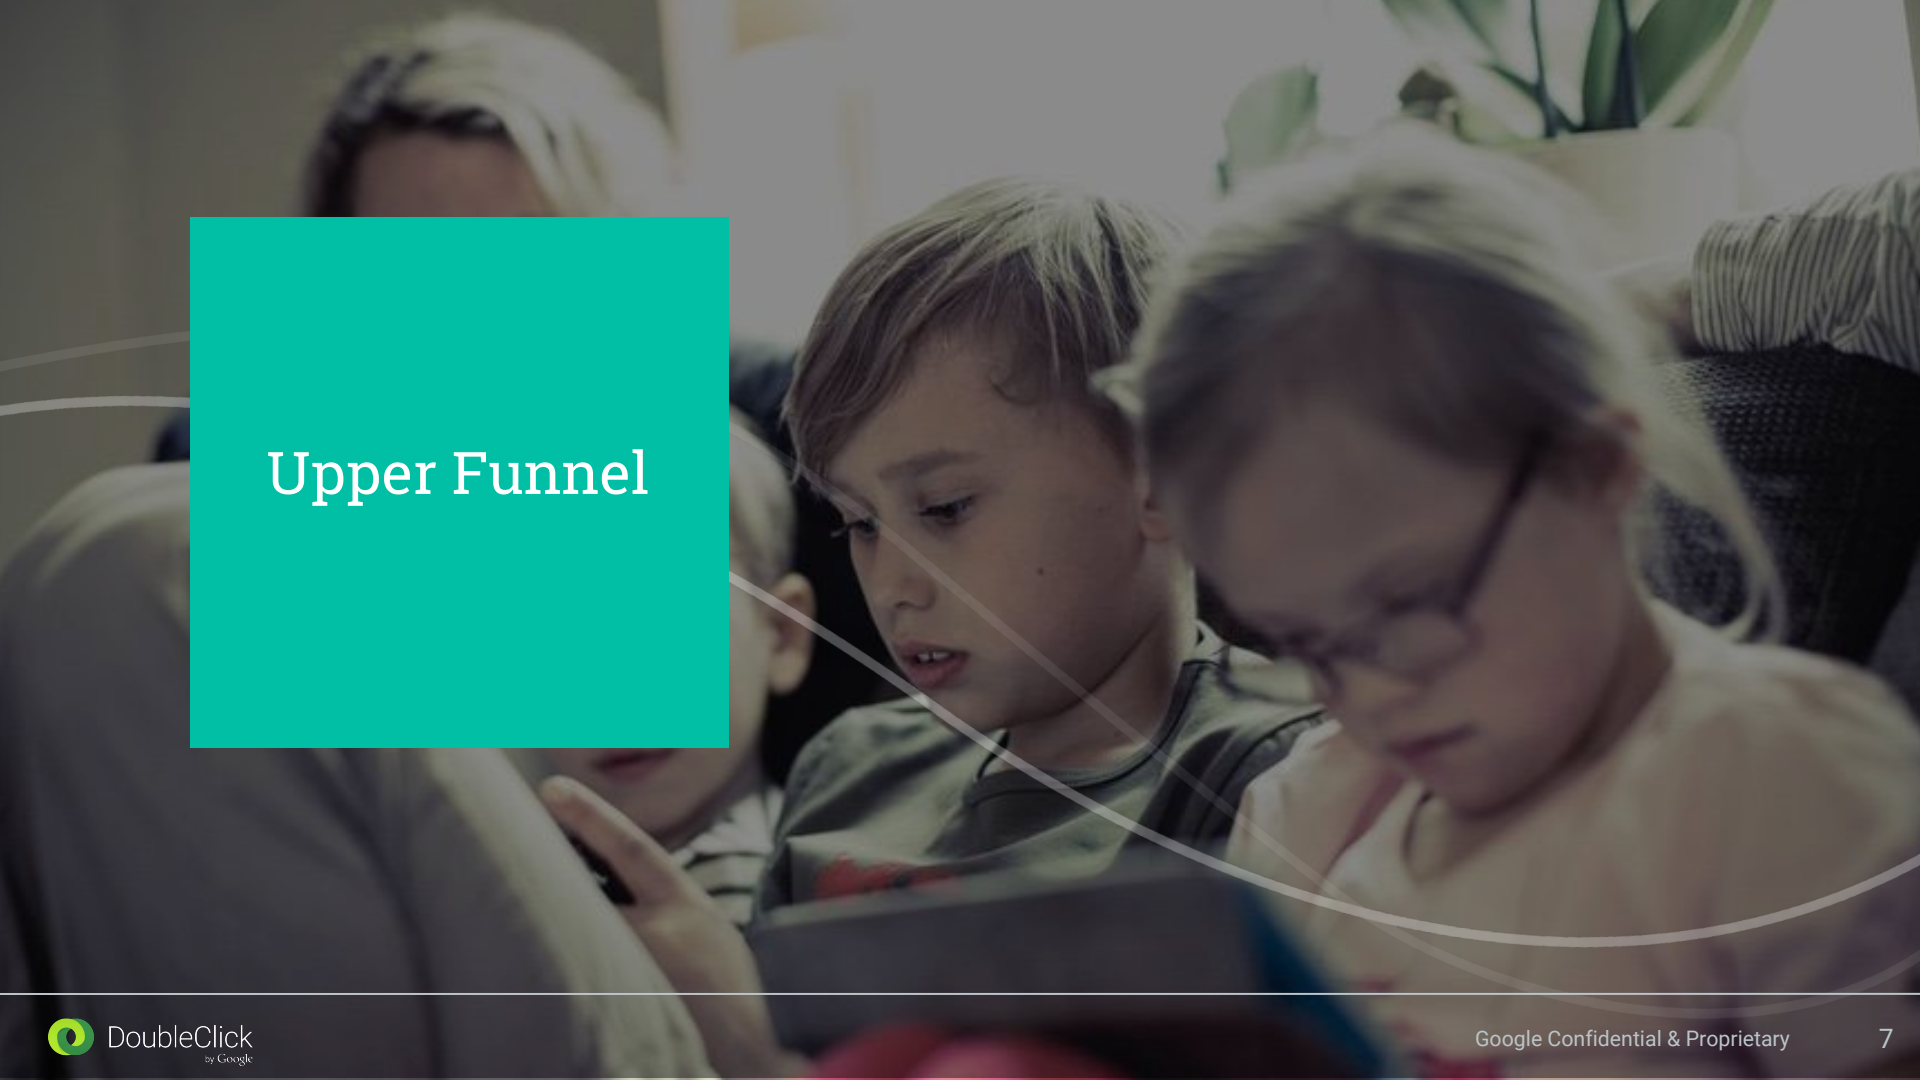

It will have the images, texts and informations that will appear on the creative

Unique_ID	Reporting_Label	Origin	Destination	isDefault	isActive	City_origin	City_destination	Price_full	CTA	Exit_URL	img_bkg
GRU_BUE	Guarulhos - Buenos	GRU	BUE	FALSE	TRUE	Guarulhos	Buenos Aires	R$ 549	Comprar	http://www.travel.com/?gru_bue	buenos.jpg
NYC_LAX	New York - Los Angeles	NYC	LAX	FALSE	TRUE	New York	Los Angeles	$300	Buy	http://www.travel.com/?nyc_lax	los_angeles.jpg
PAR_MIL	Paris - Milano	PAR	MIL	FALSE	TRUE	Paris	Milano	$150	Achetez	http://www.travel.com/?par_mil	milano.jpg

Set Rules to serve the perfect iteration

Upper Funnel	Site ID, Placement ID, Date (Schedule updates), Geo
Mid Funnel	Audience Segmentation based on Line Item ID or Audience ID, Publisher Pass
Lower Funnel	Product Level Remarketing

Upper Funnel

Set rules by Geography

Help Center

Feed Example

Customize creative to the viewer's city, state or country

(zip code,airport code, DMA: US only)

Serve test market products to people in test market cities within a larger national campaign

Serve standard products everywhere else within the national campaign

The feed columns should follow the cannonical name like Adwords API shows: see the available targeting and names here

Google Confidential & Proprietary

Set rules by Date

Help Center

Feed Example

When key dates in a campaign require a change of message, use dynamic creative to automate the change

Serve ads through December 1st until “January 5th” season premiere date

Serve ads between January 6th and January 8th with “Sunday” season premiere date

Google Confidential & Proprietary

Set rules by DCM ID filtering

Help Center

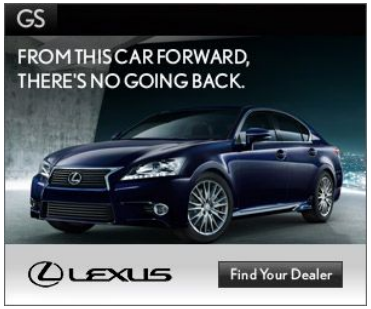

Feed Example

We base our strategy on the following DCM signals:

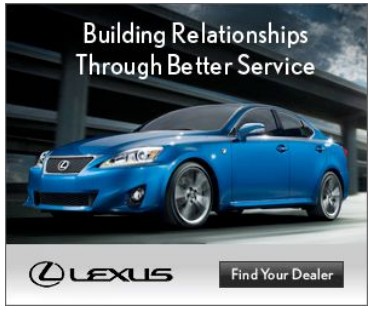

Ad ID, Advertiser ID, Placement ID, Site ID, Campaign ID, Creative ID

Serve certified pre-owned offers to sites that **cover used cars** like usedcars.kbb.com

Serve new car offers to sites that **cover new cars** like popularscience.com

Serve better service message to sites **that compare car companies**, like edmunds.com

Serve ads with the key value pair "destination = Honolulu" to sites with content about Honolulu

Serve ads with the key value pair "destination = Las Vegas" to sites with content about Vegas

DoubleClick by Google

DCM keyword targeting article

Google Confidential & Proprietary

Mid Funnel

Publisher Pass

Publisher Pass utilises the Data Pass dynamic technology to update creatives

Help Center

Feed Example

Family Car

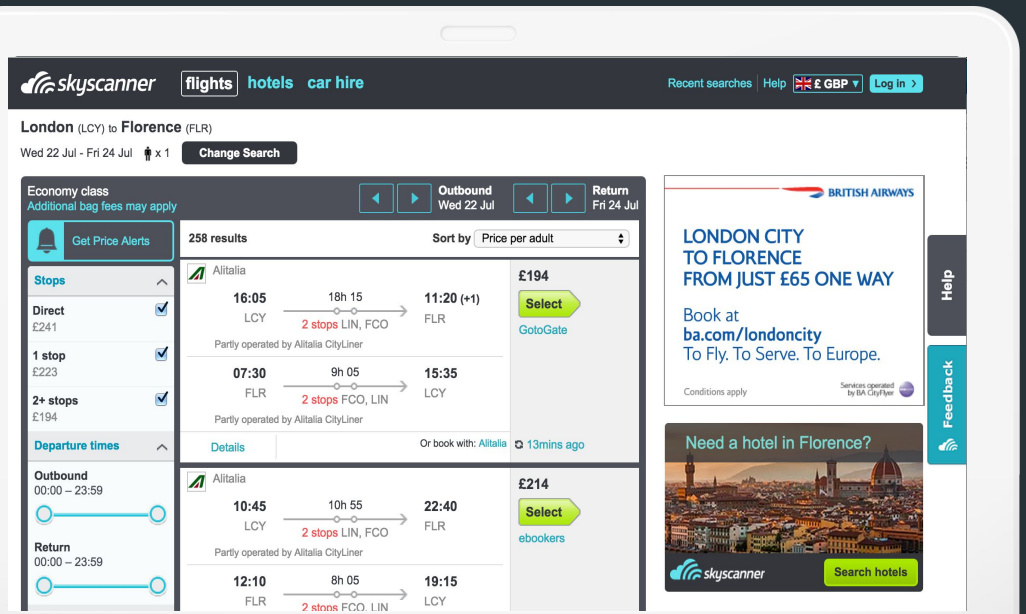

Road Trip

City Car

Google Confidential & Proprietary

BRITISH AIRWAYS

DBM Triggered Rules via Line Item or Audience ID

Help Center

Feed Example

Macros supported by DBM

Interest Category

Show **Basketball** Vs **Football** apparel ads to users based on browsing interest

Keyword Triggered

Show "*design*" related ads to users searching for "*Car Design*" and generic ads on normal pages

Audience Segments

Masculine ad content to men & feminine ad content to women

On DCM: Adding DCM Macros to pass data to Studio

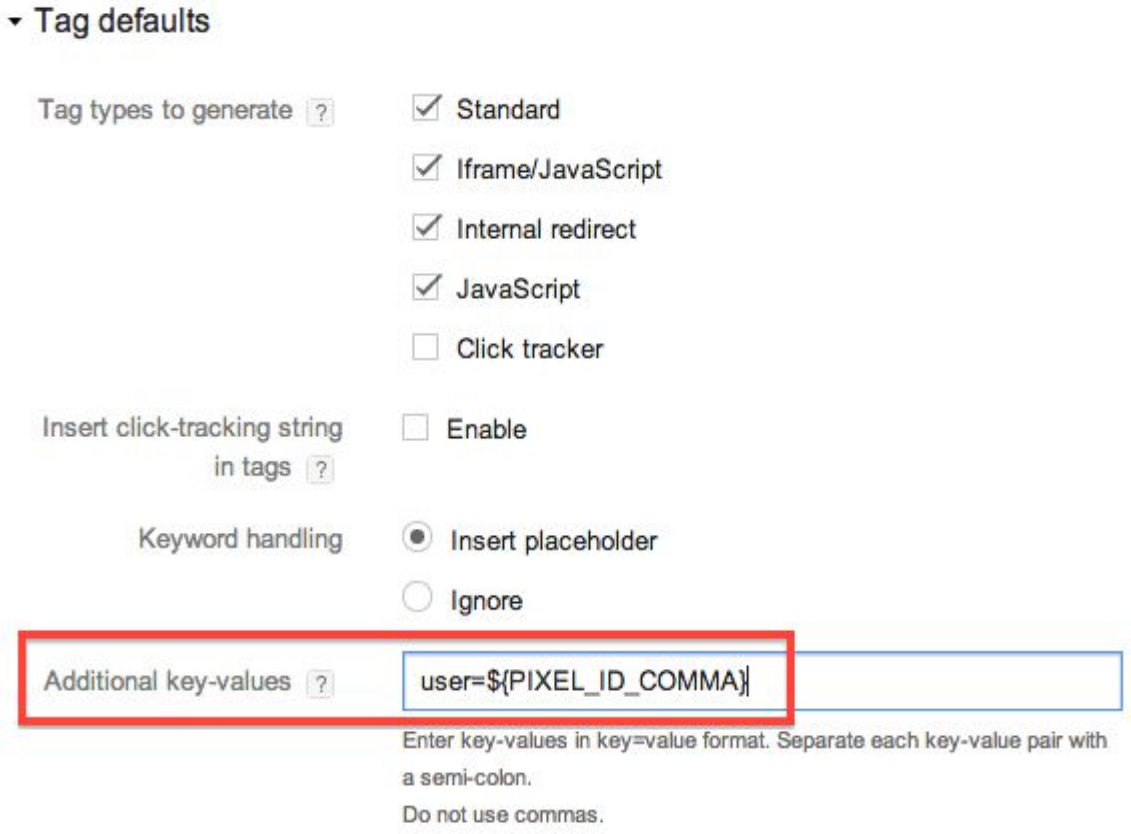

At Placement level on DCM we need to add the key-values

Additional key-values

Line_item_Id = ${CAMPAIGN_ID}

Audience_Id = ${PIXEL_ID_COMMA}

On this example we are using **user** as a key

On Studio: Using the DCM Macros to match a column

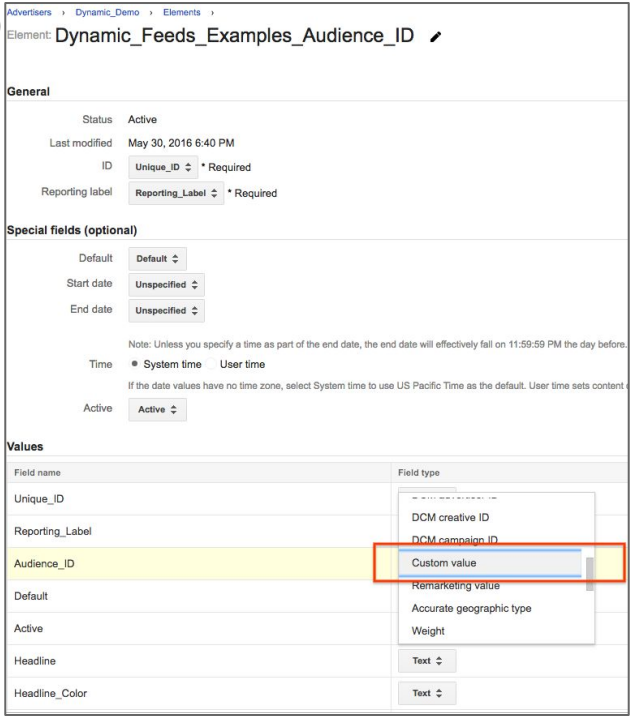

Profile setting:

1) Select the column data type to "**Custom value**"

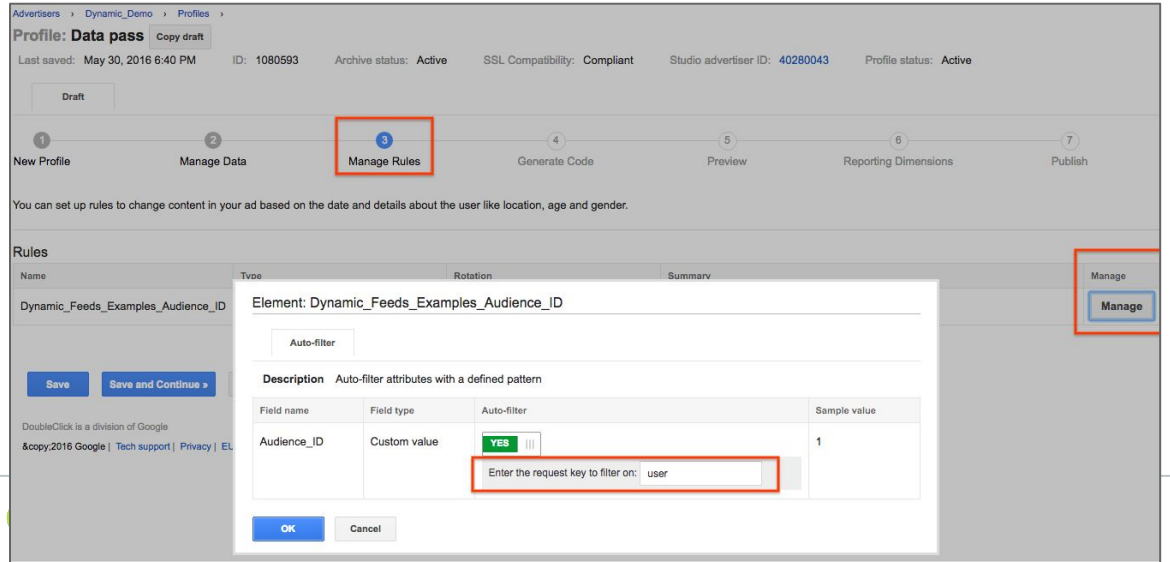

2) Map the request key defined on DCM, in our example Audience_Id or Line_item_Id

On this example we are using **user** as a key

1)

2)

Lower Funnel

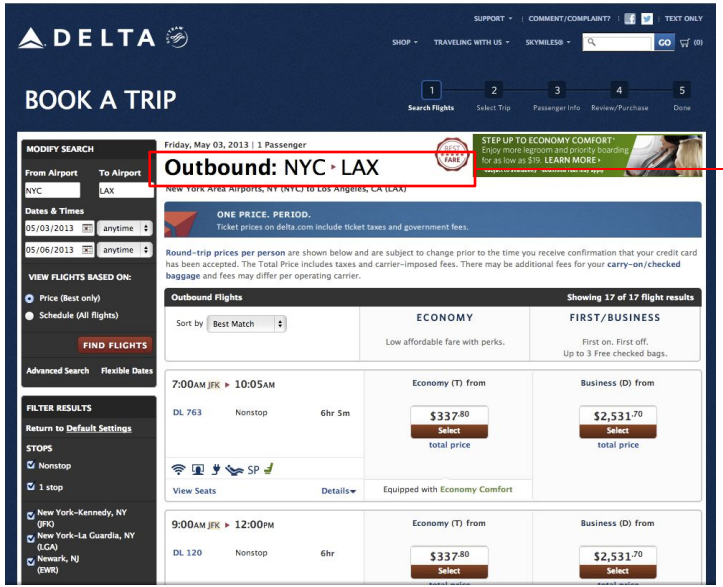

Product Level Remarketing

Help Center

Feed Example

Custom variables are passed via floodlight based on each individual user's actions on site.

Retarget individual users with the products they expressed interest in on your site

Contact drm-support-latam@google.com and request the whitelist for Remarketing UI and Dynamic Remarketing

Source: Wells Fargo bank creatives from Moat.com

Product Level Remarketing

Help Center

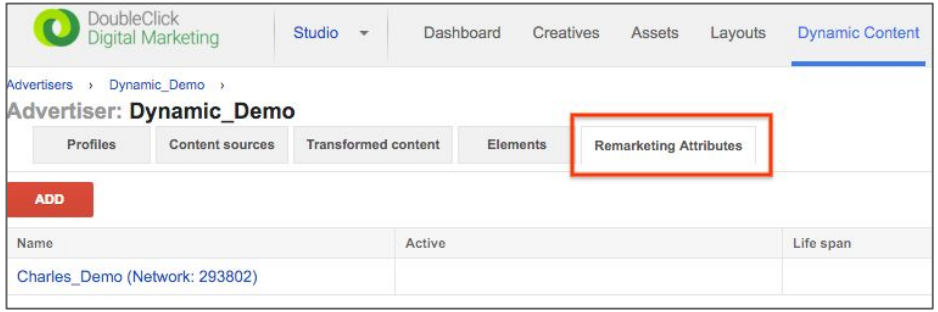

Contact drm-support-latam@google.com and request the whitelist for Remarketing UI and Dynamic Remarketing

Ask for: **GPA_BETTER_REMARKETING_UI and GPA_DYNAMIC_REMARKETING and give your Studio Account ID**

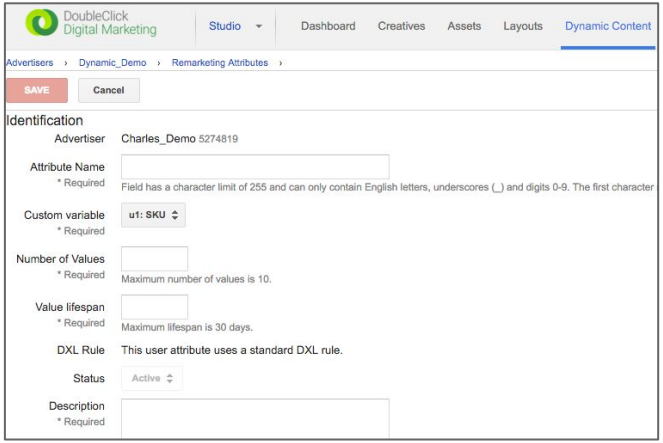

Feed Example

After connected to a DCM Advertiser, you will be able to create the remarketing attributes that store the values captured by the Floodlights.

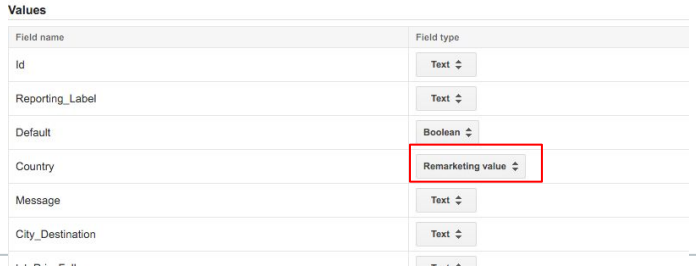

1)

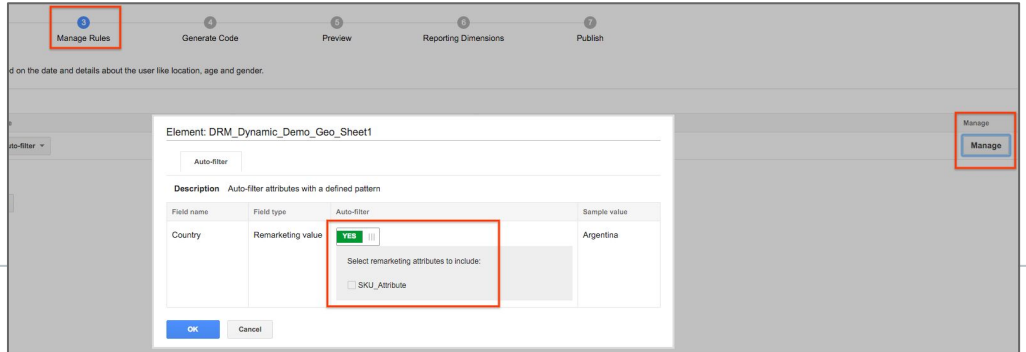

2)

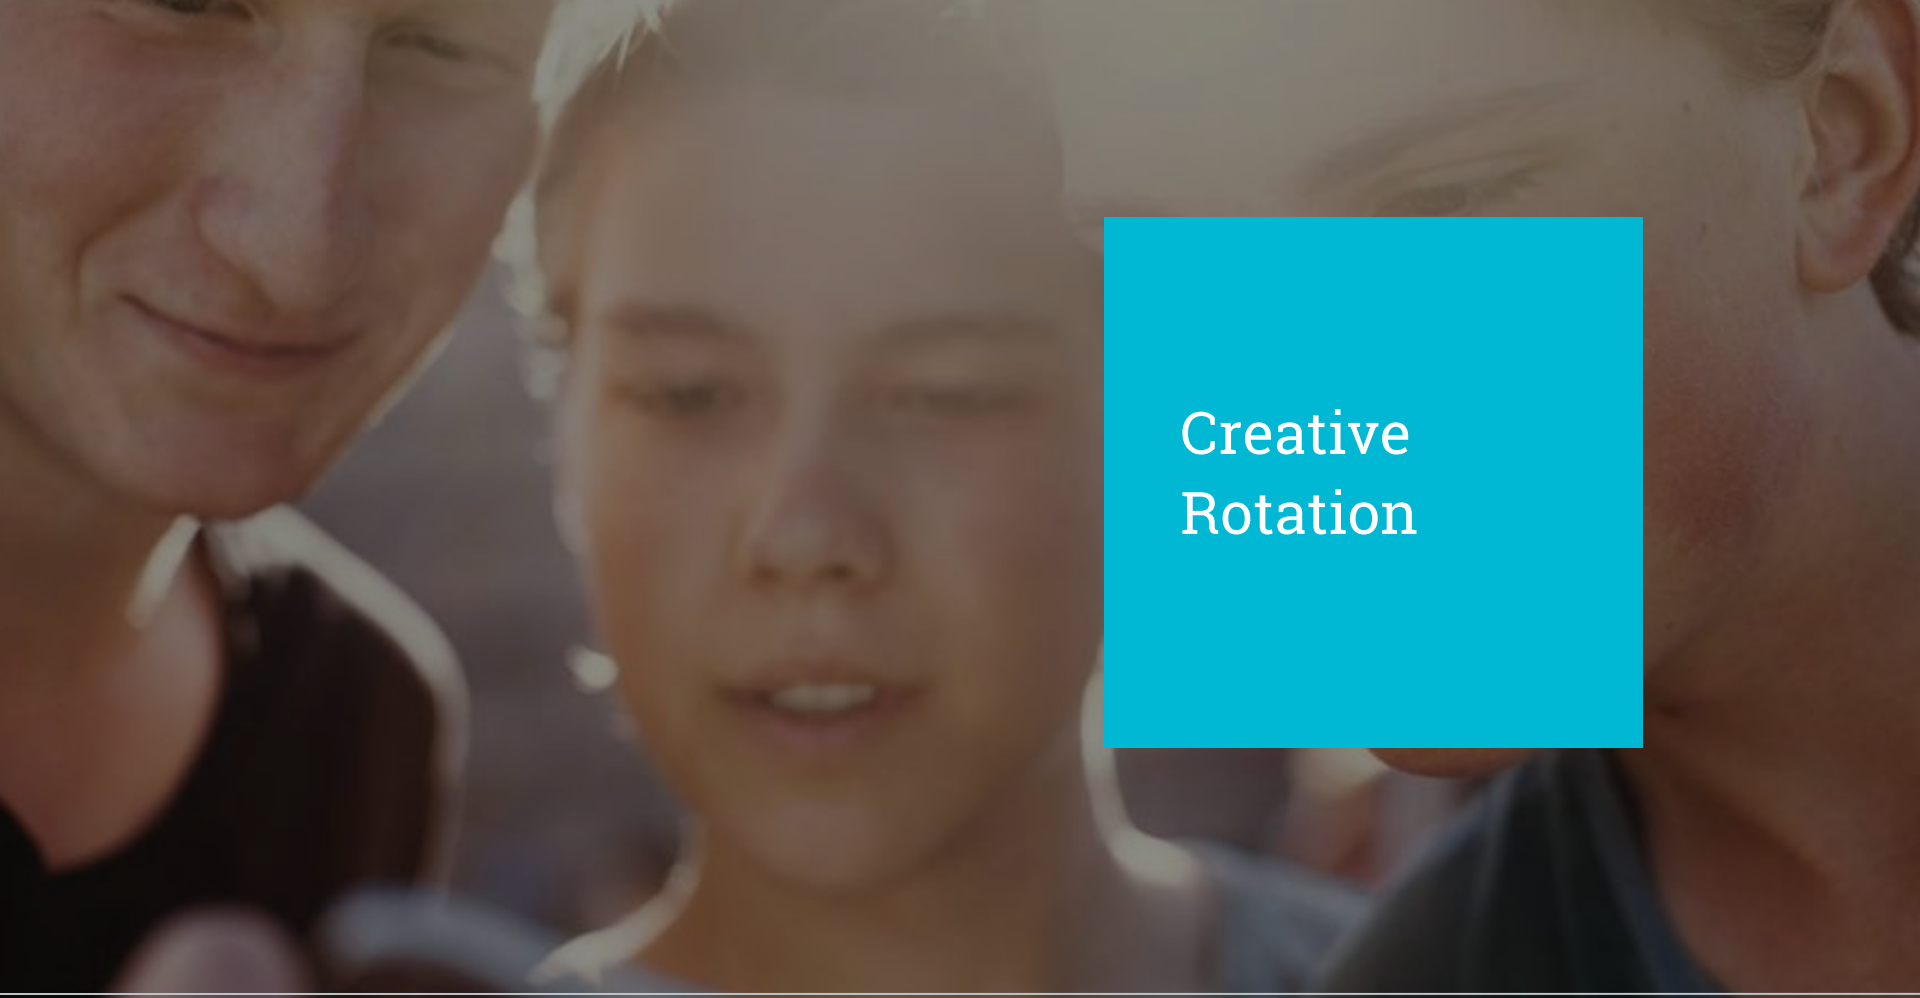

3) Select the feed column type to Remarketing Value

4)

Creative
Rotation

Creative content rotation

Random Rotation - Random rotation allows you to determine actual uplifts based on equal rotation

Optimized Rotation - Best performing rows within a feed served more frequently (CTR/CVR)

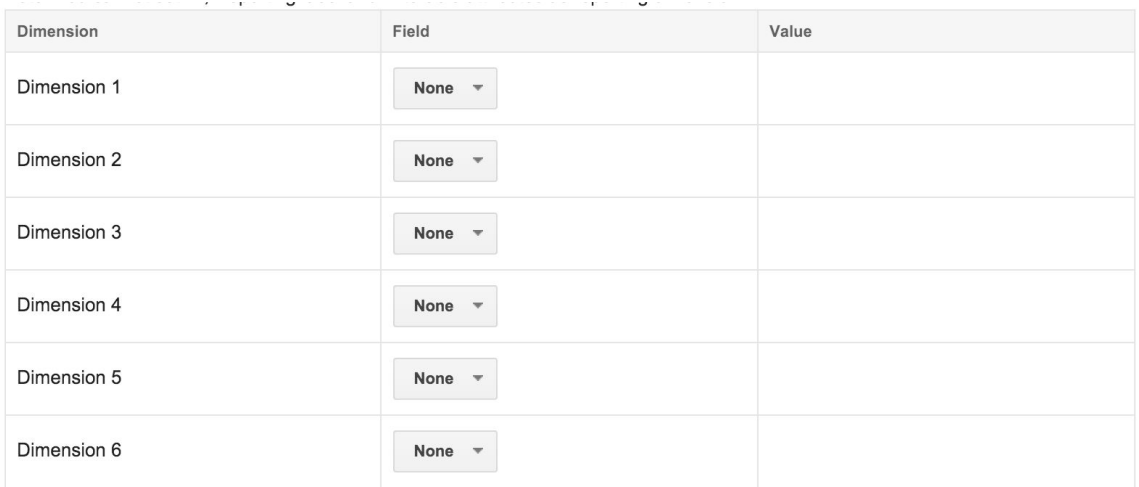

Reporting

There are two ways to set up reporting

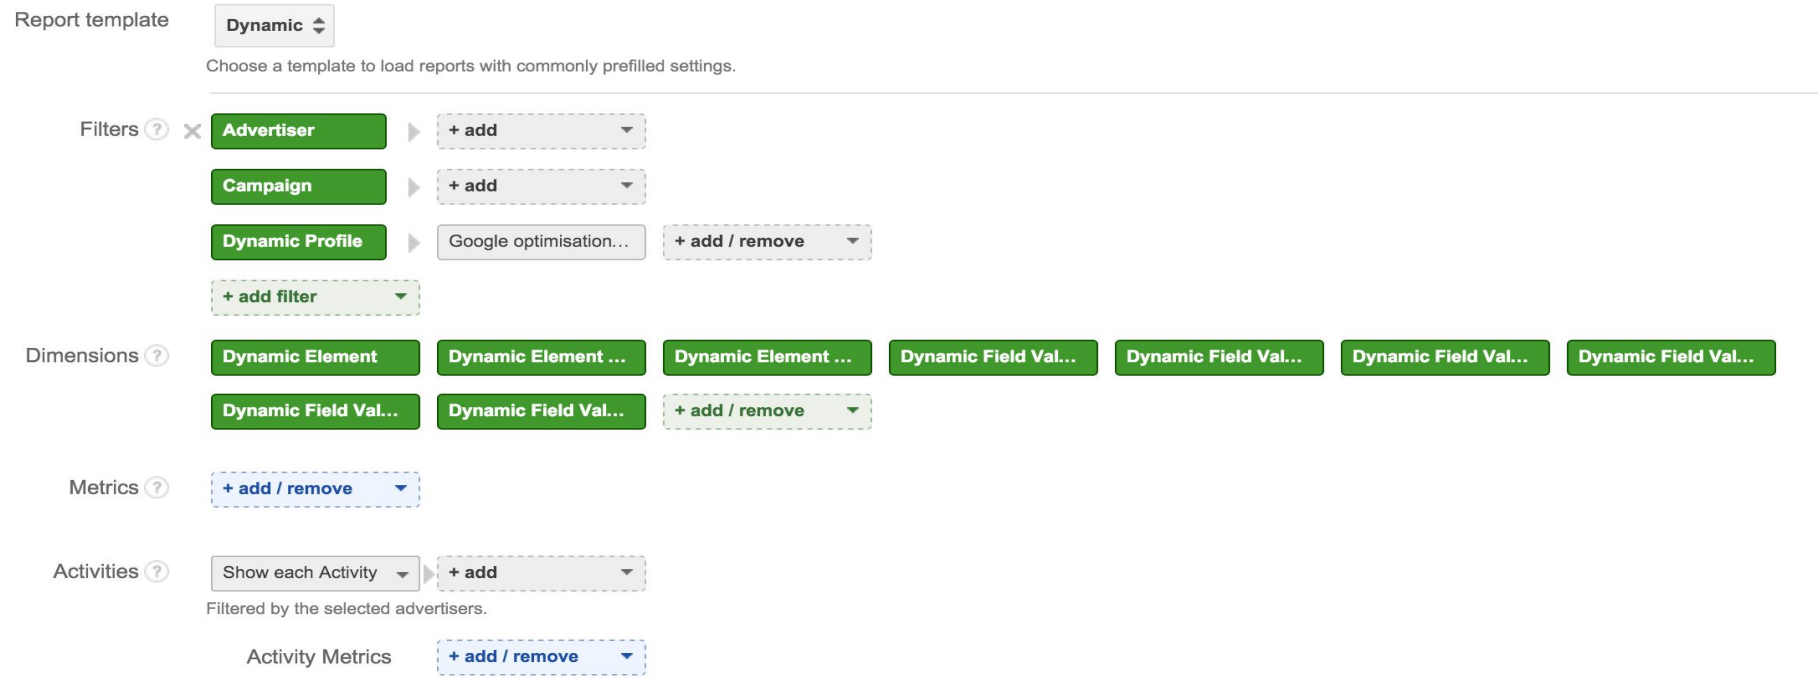

- Based on UniqueID

- You have the option to set up 6 Reporting Dimensions in Studio

Get Integrated reports via report builder

Report setup

Dimensions

Identifies Creative's Dynamic Profile | Identifies Dynamic Element | Identifies Dynamic Element Value | Metrics

Dynamic Profile Id	Dynamic Profile	Dynamic Element	Dynamic Element Value Id	Dynamic Element Value	Dynamic Element Impressions	Dynamic Element Clicks	Dynamic Element Click Rate
1000580	DeVry v1	Cta	ctacopy_01	ctacopy_learn_more	50	6	12.00
1000580	DeVry v1	Cta	ctacopy_02	ctacopy_click_here	61	4	6.56
1000580	DeVry v1	Cta	ctacopy_03	ctacopy_visit_devry	52	11	21.15
1000580	DeVry v1	Cta	ctacopy_04	ctacopy_more_info	60	7	11.67
Grand Total:	---	---	---	---	223	28	12.56

Evaluating "Learn More" CTA:
- "Learn More" CTA was in 50 impressions of the creative
- Users clicked on the creative 6 times with "Learn More" CTA in the creative
- Click rate was 12% with "Learn More" CTA in the creatve
