GROUPM NEXUS: GLOBAL PLATFORM ACCESS POLICY – APRIL 2023

Agencies are increasingly being asked by clients to grant read or write level access to clients directly or to Third Party Platforms. The access that the clients are requesting may be derived from a range of needs, subject to a complex matrix of commercial contracts and may contain confidential information belonging to GroupM or to third parties, it is therefore important that the access to GroupM owned accounts with Social, Search and Programmatic platforms data (including via Platforms) is monitored and approved as necessary.

This document details the global GroupM policy in relation to these requests and sets out the process and approvals to be followed prior to granting access to data.

THIRD PARTY ACCESS POLICY	
GroupM Legal:	Henry Winsnes
GroupM Global	Gayle Brunisholz
Issued:	19th April 2023
Updated:	5th May 2023 – clarification on approval within Risk and Process Table.

CLIENT/THIRD PARTY PLATFORM ACCESS PROCESS

This process relates to any GroupM or Agency employee who receives a request from a Client (or a third party on behalf of the Client) to grant access to an ad account within a Platform. These requests are likely to be received by Client Leads, however they may be received by any person within the organisation e.g. media planners or account managers.

All client requests should be made in writing (email is sufficient). If requests are made orally, please ask the client to make a formal written request. Please keep a copy of the request.

1. Once you have received the written request from the Client, **you should review the Risk and Process Table, the Decision Trees, and complete the Client/Third-Party Platform Access Request Form**. The form should be completed by the person receiving the request, or the relevant Client Lead. **The requesting team should first evaluate the client request to the best of their abilities before sending the form to the market lead.**

   The form has been designed to ensure that the relevant information is obtained and considered to avoid undue risk to GroupM. Further conversations with the Client may be necessary to obtain the relevant details

2. The form should then be sent to the relevant approver as detailed below. Approvers are the local activation or Market Search/Social/Programmatic/Ad Ops Leads with inherent knowledge of platforms and access rationale. The approver must assess if the Client and/or Third Party Platform's request is reasonable or whether the purpose could be achieved by alternative means. This includes understanding if the 3rd party is a competitor and the mode of connection the Client/Partner wishes to make. Market leads may need to connect with the requesting team to understand the nature of the request before authorizing.
   The Risk and Process Decision Trees and Table on page 3-8 outlines: (1) the different scenarios that may arise; (2) the group's risk appetite in each scenario; (3) the level of approval required; and (4) the relevant document that should be entered to actioning the request. **There should be very few, if any, reasons to grant a client or third party Edit or higher Access to an Agency-Owned Platform.** If there is a question that arises during the process that the Market lead cannot resolve, the escalation plan is first to the regional Nexus leads, and then to Global GroupM Nexus.

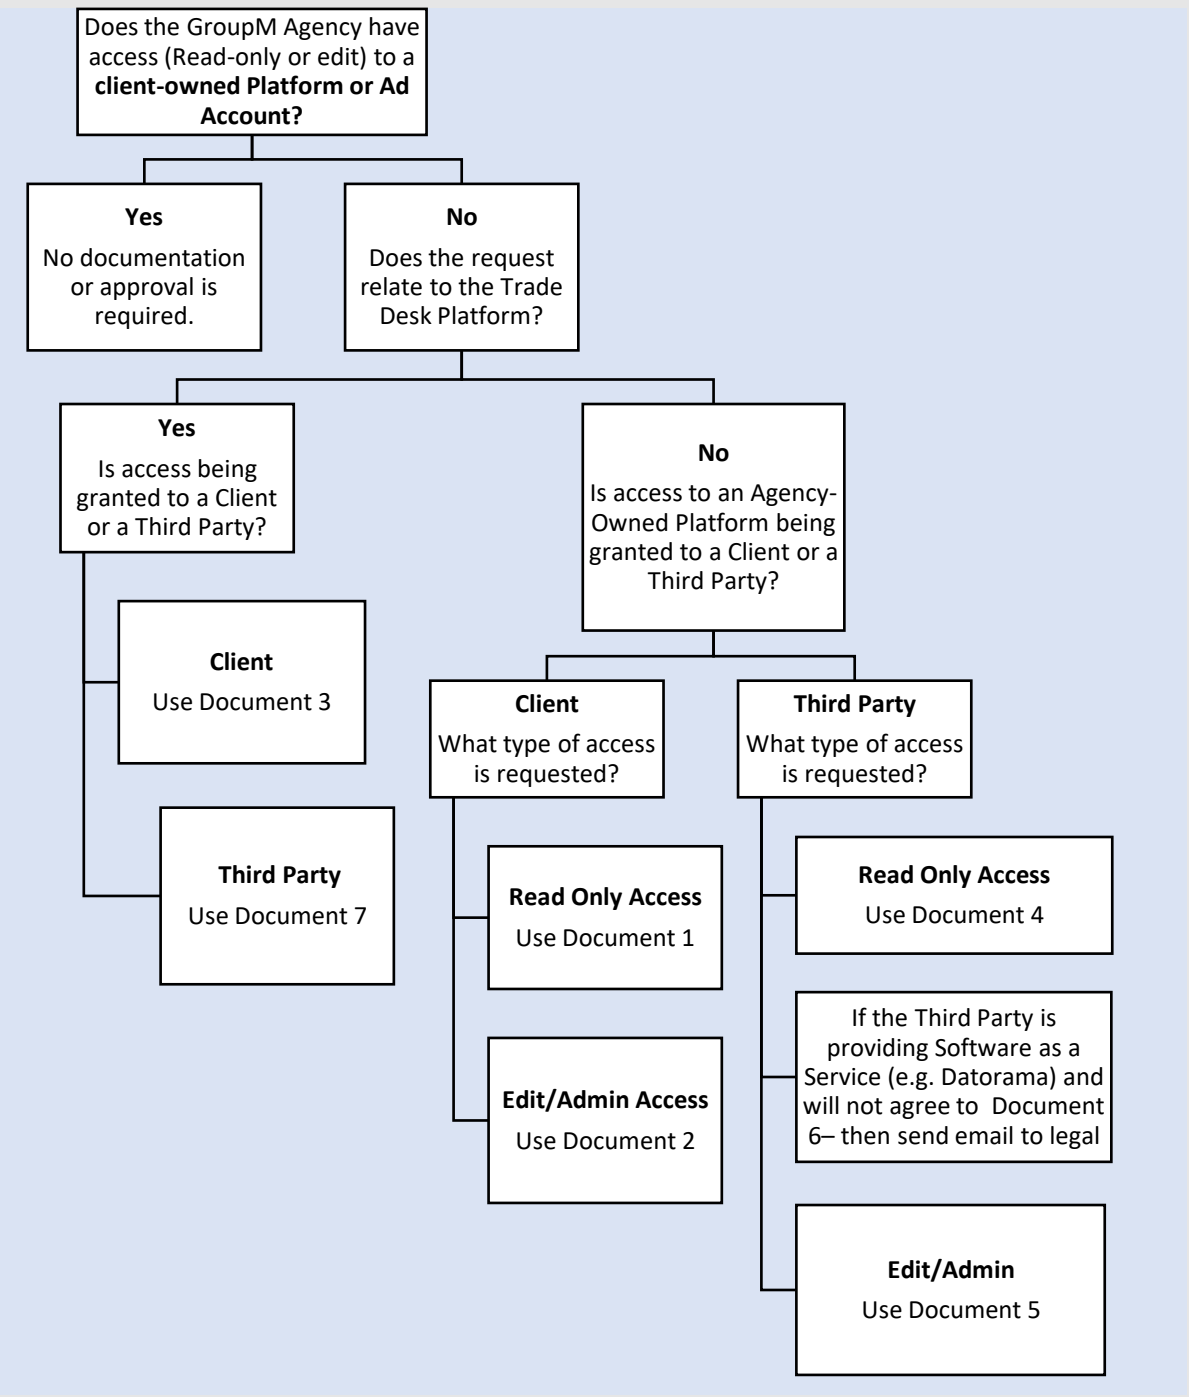

3. Once approval has been granted (if necessary) the relevant documentation should be completed and agreed with the Client or Third Party, as necessary. Only then can access be granted to any Paid Media platform.

4. Records of the request, the form, approval and signed document should be retained. WPP is implementing a new contract management system but for now, agencies should store these locally in a folder accessible to the legal team.

THINK – WHO, WHY, HOW LONG FOR? IS THERE A WAY TO MANAGE THE REQUEST WITHOUT PUTTING AGENCY / GROUPM PROPRIETARY INFORMATION AT RISK?

PLATFORM ACCESS DECISION TREE

The Lead requesting Client/3rd party access to a platform should explore the decision tree when deciding if a form is required, and which form to proceed with once approval has been granted on the initial Client/3P Access Request Form. This should only be completed if the Lead has explored all alternative means to complete the task without granting access or data release.

groupm nexus

CLIENT/THIRD PARTY PLATFORM ACCESS REQUEST FORM

This form should be completed by the person who has received the request from the client as the first step and sent to an approver. Once approved, proceed with the relevant Documents for Client/3rd party signature or acknowledgement.

Client Name:	
Name of Client requestor:	*Do they have the authority to make the request?*
Agency Name:	

Platform Access	
Does the request relate to a Client-Owned Platform, Agency-Owned Platform, 3P owned Platform or Audit Request?	
Provide details of the: (a) Relevant Platforms (if applicable); and (b) Type of access that is requested for each Platform (e.g., Read-only, Admin, Edit)	*E.g. DV360, Meta Partner Access (include BM ID)* *Note: Edit access requests on GroupM owned GMP properties or Meta to 3rd parties will be automatically denied.*
Are we able to limit access to only that Client's data?	
Is the request for a local or a multi-market client?	*If request is for a global or multi-market client, contact the lead market Client Lead and Commercial team to confirm if they have had similar requests.*
Is access territory specific?	*Note: Even if access has been granted in another market or client this does not mean approval will be given for other markets*

*The following section should be completed for **all** requests.*

Please identity the party who will receive the data or access the Platform?	*Note: For all Paid Social Platforms, access via Partner permission is preferred, but please list all names of users who will be using end-point access.*
Why is the data or access to the Platform required? What is the purpose? E.g., Create a dashboard, audit purposes, campaign management	*UK Note: Release of data to ebiquity also requires review from Lorna Prentice & team*
Duration	*How long is access to the Platform or Data required?*
Please confirm you have explored all steps to limit access data release and outline these details. If you are seeking any exception, you must outline why:	*[e.g., provide read only not edit access, provide the data via a report without granting access]*
Is any personal data or PII accessible?	*Note: This does NOT include hashed or aggregated PII. Only*
Operational considerations	
How will the data be provided/Platform access granted?	*[Data Release – E.g., Encrypted file / password protected/ timed link]* *[Access: e.g., API Connection/Partner Access/Token/System User. Who is responsible for granting the access]*
How will data be recovered/access revoked? Who is responsible for removing access?	

RISK AND PROCESS TABLE: PLATFORM ACCESS

Scenario	Risk Level	Approval	Document
CLIENT grants **THE AGENCY** Read Only Access or Edit Access to a **CLIENT-OWNED PLATFORM**	**Low Risk** **Rationale**: As it is the Client and not the Agency granting access to a Platform in this scenario, it is classed as low risk.	**No higher approval necessary: Agency Commercial Decision and approve internally by Social-Lead.** *Note: For Social Platforms this generally includes all Pinterest, LinkedIn, Snap, Twitter and Reddit where client owns account.*	N/A. Access must be granted compliantly (see Training Materials)
AGENCY grants the **CLIENT** Read Only Access to an **AGENCY-OWNED PLATFORM**	**Low Risk** **Rationale**: The Client's agreement with the Agency should include confidentiality provisions. Read Only Access will not allow the Client to make changes to or book, amend or cancel campaigns within the relevant Agency-Owned Platform.	Agency Commercial decision and Relevant Market Lead for the Platform e.g., GroupM Nexus Lead in local market	If access is specifically related to the Trade Desk, please note material is being reviewed. For now, please contact your legal team for next steps Access to all other Platforms: Complete **Document 1** For internal records
AGENCY grants a **THIRD PARTY (NON-COMPETITOR)** Read Only Access to an **AGENCY-OWNED PLATFORM**	**Medium Risk** **Rationale**: The Agency does not have a direct relationship with the Third Party. The Agency-Owned Platform may contain data that the Agency does not want a Third Party to see such as Agency Rates. Mode of Connection: For Social, API request via token will NOT be approved – must be through Partner.	Relevant Market Lead for the Platform (Search, Social, Programmatic) If there is no market lead, it should be escalated to the Regional Lead for the Platform (Search, Social or Programmatic)	If access is specifically related to the Trade Desk, please note material is being reviewed. For now, please contact your legal team for next steps: Access to all other Platforms: **Document 4**

AGENCY grants a **THIRD PARTY (COMPETITOR)** Read Only Access to an **AGENCY-OWNED PLATFORM**	**High Risk** **Rationale**: The Agency does not have a direct relationship with the Third Party. The Agency-Owned Platform may contain data that if a competitor saw could be detrimental to the business. This is likely to only be approved in the instance off and offboarding. Competitors may also include auditors or consultants who offer biddable services even if outside of their initial scope.	Gayle Brunisholz and Henry Winsnes	If access is specifically related to the Trade Desk, please note material is being reviewed. For now, please contact your legal team for next steps Access to all other Platforms: **Document 4**

Scenario	Risk Level	Approval	Document
AGENCY grants the **CLIENT** Edit Access to an **AGENCY-OWNED PLATFORM**	**High Risk** **Rationale:** Edit Access reduces the control the Agency has over the Agency-Owned Platform, allowing a Client to create, change or cancel campaigns. It also enables Client to amend, add or remove access to the Agency-Owned Platform. This access presents a severe credit and fraud risk, impacting ALL clients in the agency-owned environment including those requesting access. GroupM limits edit access to the platforms we own and manage to GroupM employees only. This allows the Agency to retain sole liability for ad activity executed from an agency owned ad account, while the Client retains control of their page, audience sharing, and pixel permissions.	Review internally with market lead approvers to understand the ask in detail and if no other option is available to proceed without granting edit level access for the task. Market lead can then approve once reviewed and proceed to sending Document to client to complete – and then access can be granted. If any outstanding questions or advice is needed about the mode of connection before approving then market lead is to escalate to regional Nexus lead. Regional lead to escalate to below if still unsure:	If access is specifically related to the Trade Desk, please note material is being reviewed. For now, please contact your legal team for next steps: Once Form Request is approved, proceed with Access Document to all other Platforms: **Document 2**

		Gayle Brunisholz and Henry Winsnes Search: Include Katelyn Taylor Social: Include Gillian Collison, Amanda Grant Note: Based on your local agency needs your leadership may also require CFO informed/sign off.	
AGENCY grants a **THIRD PARTY** Edit Access to an **AGENCY-OWNED PLATFORM**	**Very High Risk** **Rationale**: This is considered a very high risk as the Agency does not have a direct relationship with the Third Party (who may be a competitor) and Edit Access will allow unfettered access to the Agency-Owned Platform. The Third Party may make changes to or book, amend or cancel campaigns. It may also allow the Client to amend, add and remove access to the Agency-Owned Platform. Edit Access reduces the control the Agency has over the Agency-Owned Platform. It also presents a Credit Risk as well as the risk of fraudulent activity. This access should only be granted in **EXCEPTIONAL CIRCUMSTANCES and teams should not bring this request forward for approval unless all other avenues have been first explored.** **This will not be approved for a competitor agency.**	Review internally with market lead approvers to understand the ask in detail and if no other option is available to proceed without granting edit level access for the task. Market lead can then approve once reviewed and proceed to Document to client. If any outstanding questions or advice is needed about the mode of connection before approving then market lead is to escalate to regional Nexus lead. Regional lead to escalate to below if still unsure: Gayle Brunisholz and Henry Winsnes	ONCE ACCESS REQUEST IS APPROVED: If access is requested to the Trade Desk: Reach out to legal Access to all other Platforms: **Document 5**

		Search: Include Katelyn Taylor Social: Include Gillian Collison, Amanda Grant	

MOST COMMON THIRD-PARTY REQUESTS

Channel	Platform	3rd Party	Standard Outcome
Social	**Meta or TikTok**	**New Incoming Agency**	Read-only access will not be permitted to agency-owned ad accounts within Meta or TikTok to any incoming agency. Instead, GroupM agency to export all relevant data and metrics of data and provide via Excel to client directly.
Search	**Google Ads, Microsoft Ads**	**New Incoming Agency**	Read-only access to Google Ads or Microsoft Ads can be granted to existing CIDs only once proprietary scripts have been removed (max 2 weeks prior to transition). Edit access cannot be granted prior to transition date.
Social	**Meta or TikTok**	**Any 3rd party who requests Read-Only OR Edit Access to be connected via API (through User Login Access Token)- OAuth on their platform**	Historically unapproved. 3rd party must connect via a GroupM approved mode such as partner access. Individual Oauth token cannot be monitored and presents business risk. Business decision to be made by agency if client has signed a service.
Social, Search, Prog	**All agency owned ad accounts**	**Request from auditor such as Ebiquity, BCG, McKinsey**	Please speak to your legal team before proceeding. Our typical position is not approved.
Social	**Meta**	**Sprinklr** Level of access: read only Use case: consolidated reporting and holistic campaign measurement	Mode of connection: OAuth not approved by GroupM standards but business decision to be made by agency if client has signed a service. Paperwork to include partner ID + list employee OAuth user.
Social, Search, Prog	**Meta, Google Ads, Twitter, Snapchat, Pinterest, DV360**	**Creative X** Level of access: read only Use case: audit creative performance of Client assets Level of access: read only Use case: monitor social creative diligence and performance	Social Platforms: CreativeX can connect Meta via Partner access.- OAuth is required for other platforms but not approved by GroupM standards but business decision to be made by agency if client has signed a service. Paperwork to include partner ID + list employee OAuth user.

All	**All platforms where integrated**	**IAS, MOAT or DoubleVerify** Level of access: read only Use case: campaign viewability measurement reporting	IAS: Not required as global Data Release is signed. DV: Market must have a local MSO to proceed without document MOAT: Approved once Documents provided. Connection through Partner setup
Social	**TikTok** **Meta**	**Automated Creative** Level of access: edit Use case: manage the creative upload into platform and campaign optimisation	Meta: Automated Creative to access via Partner Access only. TikTok: OAuth not approved by GroupM standards but business decision to be made by agency if client has signed a service. Paperwork to include partner BM ID + list employee OAuth user.
Social	**ALL**	**VidMob** Level of access: read or edit Mode of connection: Partner access Use Case: Creative optimization, reporting	Meta: Vidmob can now offer a compliant access setup via Partner-access only (new April 2023). All other platforms that may required API OAuth are not standard modes of connection.
Social	**Meta or Google Ads**	**Pixis** Level of access: read or edit Use case: AI campaign management and optimization	Meta: Pixis access GroupM accounts via Partner access only (no OAuth token).

MOST COMMON CLIENT ACCESS REQUESTS

Channel	Platform	Access Level and Rationale	Standard Outcome
Search	**Google Ads, Microsoft Ads** **NOT GMP e.g. DV360, SA360, CM360**	Level of Access: Edit Use Case: Uploading Customer Match / 1st Party Audiences	Prefer to use data onboarder, dummy account within the main client master account, or providing pre-hashed data (SHA 256 algorithm one way hashed) that can be provided to a practitioner for upload without revealing PII. If not possible, the request is generally granted provided the access

			is limited to a single client using a corporate e-mail address and MFA, access is regularly audited or strictly time limited, and an indemnity letter is signed. Request documentation and signed letter must be filed appropriately.
Social	**Meta**	Level of Access: Read Use Case: Uploading Customer Match / 1st Party Audiences	Not approved as there are other modes of connection to facilitate this. Instead, clients should upload any 1st Party Audiences within their own Business Manager and share through to the Agency Ad Account as per standard process.
Social	**TikTok**	Level of Access: Edit (Operator) Use Case: Uploading Customer Match / 1st Party Audiences	TikTok does not currently have the ability to share 1P audience across two different Business Centers. Preference is to use a data onboarder. If not possible, the request is generally granted to provided a single client access using a corporate e-mail address. Access is regularly audited, and an indemnity letter is signed. Request documentation and signed letter must be filed appropriately.
Social	**TikTok**	Level of Access: Edit (Operator) Use Case: Comment moderation	TikTok does not currently have a permission level for community management or comment moderation. Discuss with clients if they need comments on and intentionally will moderate/comment. If yes, request documentation and signed letter must be filed appropriately.
Social	**Client-owned ad accounts such as Snap, Twitter, LinkedIn, and Pinterest**	Level of access: Edit or Read Use Case: Reporting, moderation, audience management	If set up compliantly, clients owns these ad accounts and Document/Forms are not required for submission. That said, it is recommended to education clients on the risk of extended-access in their environment to any 3rd parties.
Search, Programmatic, Ad Operations	**Google Marketing Platform e.g. DV360, SA360, CM360**	Level of Access: Edit Use Case: Varies	Not approved. This cannot be granted due to contractual agreements with Google. If we were top grant this access we would in essence be operating as a reseller improperly, breaching our contracts with Google. If clients require edit access to GMP for any reason, they must pay for their own instance via a reseller (like GroupM's Acceleration). They will

			not receive the same rates that GroupM receives.
Search	**Google Ads**	Level of Access: MCC Linking to Client MCC Use Case: Client reporting / structure and oversight	Not approved except for extraordinary circumstances. Allowing a client MCC to become a parent of one of our agency accounts or manager accounts is in essence like granting full administrative access to a set of unknown, unauditable parties for as long as the link is active. It presents extremely high risk and requires senior GroupM and agency approval at the global level.

FREQUENTLY ASKED QUESTIONS: ACCESS

Where can I find the associated Forms and Documents?
On the Global Social Sharepoint here

How have the market leads been identified and what are the expectations of their role?
These identified leads should be either activation leads or Social/Search/Programmatic/Ad Ops Market Leads with inherent knowledge of platforms and access rationale.

- Market leads may need to connect with the requesting team to understand the nature of the request before authorizing
- Requesting teams should have evaluated the ask from the client to the best of their abilities before sending the request to the market lead
- Escalations: If there is a question that arises during the process that the Market lead cannot resolve, the escalation plan is first to the regional

What is the process if the Agency accesses a Client-Owned Platform?
The Terms and Conditions that we have in place with our clients should include confidentiality terms that bind both the Client and Agency; therefore, we can access a Client-Owned Platform without additional documentation from our side. If the Client asks us to enter into a similar document to those set out in this policy, for use of the Client-Owned Platform, this should be reviewed by your Legal Team and assessed on a case-by-case basis.

Do I require a separate Non-Disclosure Agreement for an Access Request?
No, if you have entered one of the documents detailed within this policy a separate non-disclosure agreement is not required. The Documents linked to this policy include confidentiality provisions where relevant. There may be situations where the is an NDA in place with a 3rd party already – if this occurs, teams should note this in the access letter. An NDA does NOT override the need for the Access forms to be completed – this is still mandatory.

I've heard that we have terms that prevent us from granting client access to Google. How do I work around these terms?
There are different contractual agreements depending on which Google platform you are

referring to. It is very important to distinguish between Google Ads and the Google Marketing Platform (GMP).

There are no contractual terms that prevent us from granting edit (standard or admin) access to clients within Google Ads. While there are many risk factors associated with doing so (see table above), it is not a breach of contract with Google.

There are contractual terms that prevent us from granting edit access to clients within GMP products (DV360, SA360, CM360) if those instances are owned by GroupM and benefit from GroupM rates with Google. In cases where clients need edit access to GMP, they must purchase their own instance of GMP either directly from Google or via a certified Google Reseller like Acceleration.

The distinction between these platforms is incredibly important. When discussing access requests, please refer to the specific platform (Google Ads, DV360 etc.) and not a generic "Google".

What is the approved 'mode of connection' for Meta access and can I use OAuth tokens?
Granting OAuth permissions to 3rd parties is not permitted due to challenges with operational risk and ongoing management. Access should be granted via Meta's partner access.

Who should monitor access to the Platforms once it is granted?
This process should be managed at an Agency or GroupM Nexus market level by nominated Senior Platform Leads, who are responsible for removing any access to Platforms once the designated time has lapsed.

For Paid Social, each agency/market lead must review access quarterly to ensure user/3rd party access to self-serve platforms and Business Managers is removed as soon as it is no longer required.

For Paid Search each agency/market lead must review access quarterly to ensure user/3rd party access to paid search buying platforms is removed as soon as it is no longer required. This access needs to be reviewed at manager and child account levels to ensure that no instances are missed.

My client only wants read-only level access to Meta or TT? Do I still need to complete the Access Request Form?
Yes – we cannot grant any client or 3rd party access to Meta or TT without the form request complete (and client request in writing). Once granted, this must be added to a compliance tracker to monitor access and agreed removal date of Partner access.

I have a question that is not covered in the policy. Who do I ask?
If there is a question that arises during the process that the Market lead cannot resolve, the escalation plan is first to the regional Nexus leads, and then to global.

When is legal engaged?

- After a market lead has signed off and you have selected and populated the correct document, please send these to your legal team

- Where a client / third party provides its own document, or comments on our documents.

I am offboarding our account to another agency who has requested access to the Agency-owned Ad Accounts. Can this be granted?
Paid Social: No. All data in agency-owned ad accounts should be exported and manually provided. Access will not be granted under any circumstances to the new agency.
Paid Search: Given the transferrable nature of most search accounts (Google Ads, Microsoft Ads), incoming agencies can be granted limited time read-only access to accounts prior to transition. A reasonable time limit should be imposed (<2 weeks at maximum) and any requests for access prior to this point cannot be granted but bulk data can be exported if the team deems it necessary. In no situations should edit access be granted prior to transition.

APPROVERS BY MARKET & REGION: SOCIAL

GroupM Nexus practitioners are responsible for the access to each Platform, and understand the risks associated with granted different levels of access to their respective Platforms. To gain the relevant approval, you will need to consider whether access is being requested to a Search, Social or Programmatic Platform. This will assist you in locating the relevant approver.

DEFINITIONS

“Access Request” means access (read-only, admin, edit etc) is requested to a third-party Platform. E.g., client requests access to their campaigns in Agency Owned Platform.

“Administrator Access” this type of access allows the user to create/amend/edit details in the Platform, create/change/delete other users, and setup APIs that can both pull information and make changes (push).

“Agency-Owned Platform” means a Platform that the Agency owns and/licences from a third party. The Agency has control as administrator and holder of the contract of this Platform.

“Client-Owned Platform” means a Platform that the Client has set up and manages as administrator and contract owner. In some situations, the Client may wish to give the Agency access to their Client-Owned Platforms.

“Data Release” means passing data from an Agency held Platform to a Client or third party.

“Edit Access” this type of access allows the individual to amend/edit the Platform as if they are the owner of the Platform and setup APIs that can both pull information and make changes (push). It may also be referred to “write” access.

“Platform” means a third-party Platform used by GroupM agencies in providing services to clients, primarily search, social and programmatic buying Platforms (e.g., Facebook Business Manager, Google Search Ads, DV360, the Trade Desk etc.).

“Proprietary Information” or “Proprietary Rates” means any information that is central to GroupM’s business model, this includes but is not limited to: (1) Technology Platform fees (e.g., DSP Platform fees; (2) negotiated media pricing/rates; and (3) scripts, algorithms or ways of

working used in Search and Programmatic advertising. Proprietary Information can be stored within Platforms and may be accessible via Read Only Access depending on the Platform.

“Read Only Access” this type of access does not allow the user to edit the Platform, it merely allows the user to view the information within the Platform or set up an API that can only pull information.
