uhub
OVERVIEW

What is uhub?

Uhub is WPP’s DevOps Tools Consultancy. We manage WPP’s GitHub account, as well as a fully managed offering of the Atlassian product stack. We tightly integrate these industry-leading products into a single, WPP-specific platform, supported by and for agency staff.

Uhub empowers WPP's agencies, as well as their vendors, partners, and clients to collaborate securely and efficiently on documenting requirements, tracking tasks, managing projects, assigning resources, developing and deploying solutions, and reporting on any part of that work.

While Uhub benefits all types of agency processes, the platform provides exceptional value to agencies focused on tracking and managing production and delivery, as well as to those agencies who are tracking that work on behalf of their shared clients.

Uhub started out within Young & Rubicam Group, and is used across VMLY&R, Wunderman Thompson, GTB, Redfuse, Ogilvy, GroupM, and Parent Plus.

Uhub has passed several WPP GCC/SOX audits as well as WPP mandated 3rd party Cloud hosting assessments.

Key Features of uhub

- Task and project management, with workflow
- Resource management and timesheets
- Collaborative documentation, knowledge sharing
- Dashboards and reporting
- Code storage, review and deployment

- Backed by subject matter experts who understand the tools, and as we are WPP employees, we're "in the trenches" daily & know some of the challenges of working efficiently at the group.
- Growing connectivity into WPP OpGroup "home" authentication platforms = better security, less confusion.
  - Y&R Group AD
  - WT’s Index
  - Ogilvy’s Common Directory
  - Azure AD for GroupM, Hogarth, Grey, WPP Cloud, and WPP AUNZ
  - **OKTA coming in Q1, 2022**
- Efficiency at scale

uhub enables:

In a word – **Collaboration**

This chart highlights the **hundreds of thousands** of connections between people and the projects they work on for other agency offices from across WPP – showcasing the massive collaboration around the work we deliver to our clients!

Current uhub adoption

Stats as of Feb/2022:

Overall usage: 605 of WPP's business Units (or OpCos) have signed up to use Uhub

Uhub Core (Jira / Confluence): 9,786 users (1,607 of these are Clients/Partners)

Jira Service Management: 637 Agents servicing 89,814 customers (867 of these are External)

Jira: 12,762 active and 6,061 archived projects; 2,524,897 tasks (355,075 are currently open)
Jira: 5,448,934 timesheet worklogs, including 121,168 in the last month!
Jira: 2,554,119 hours of resource planning (51,141 planned for the rest of 2022)
Jira: 10,604,263 comments; 4,402,295 Attachments

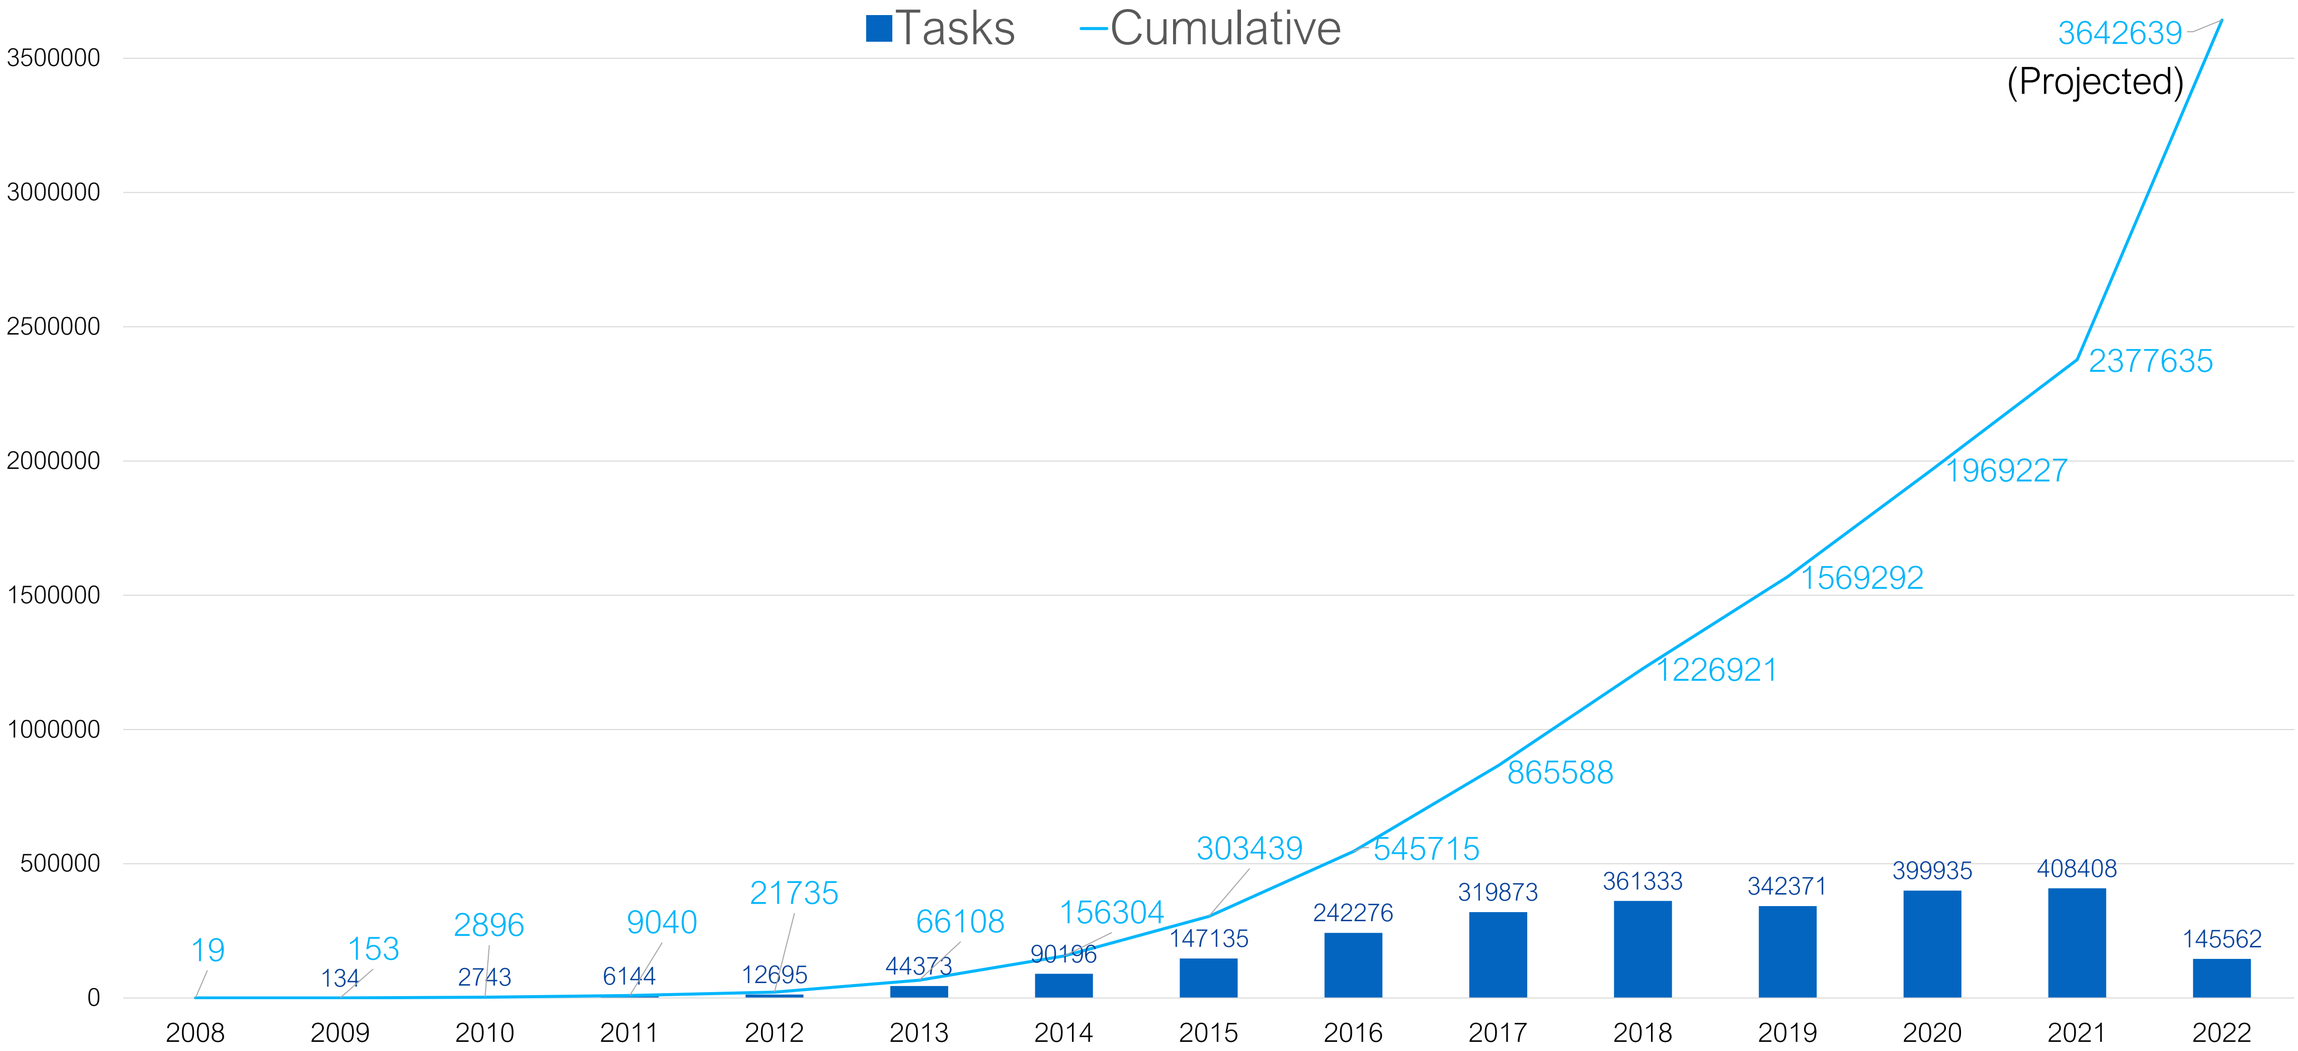

Confluence: 1,439,728 Wiki pages across 3,806 Spaces

Bitbucket: 1,528 developers; 4,224,092 commits from 20,417 contributors
Bitbucket: 13,745 Code repositories in 3669 Projects >> 1.56 TB+ of Code (4.48+ Billion lines)

GitHub: 800 developers; 2,114 Code repositories; 218 Teams; 3689 Pull Requests in the last year

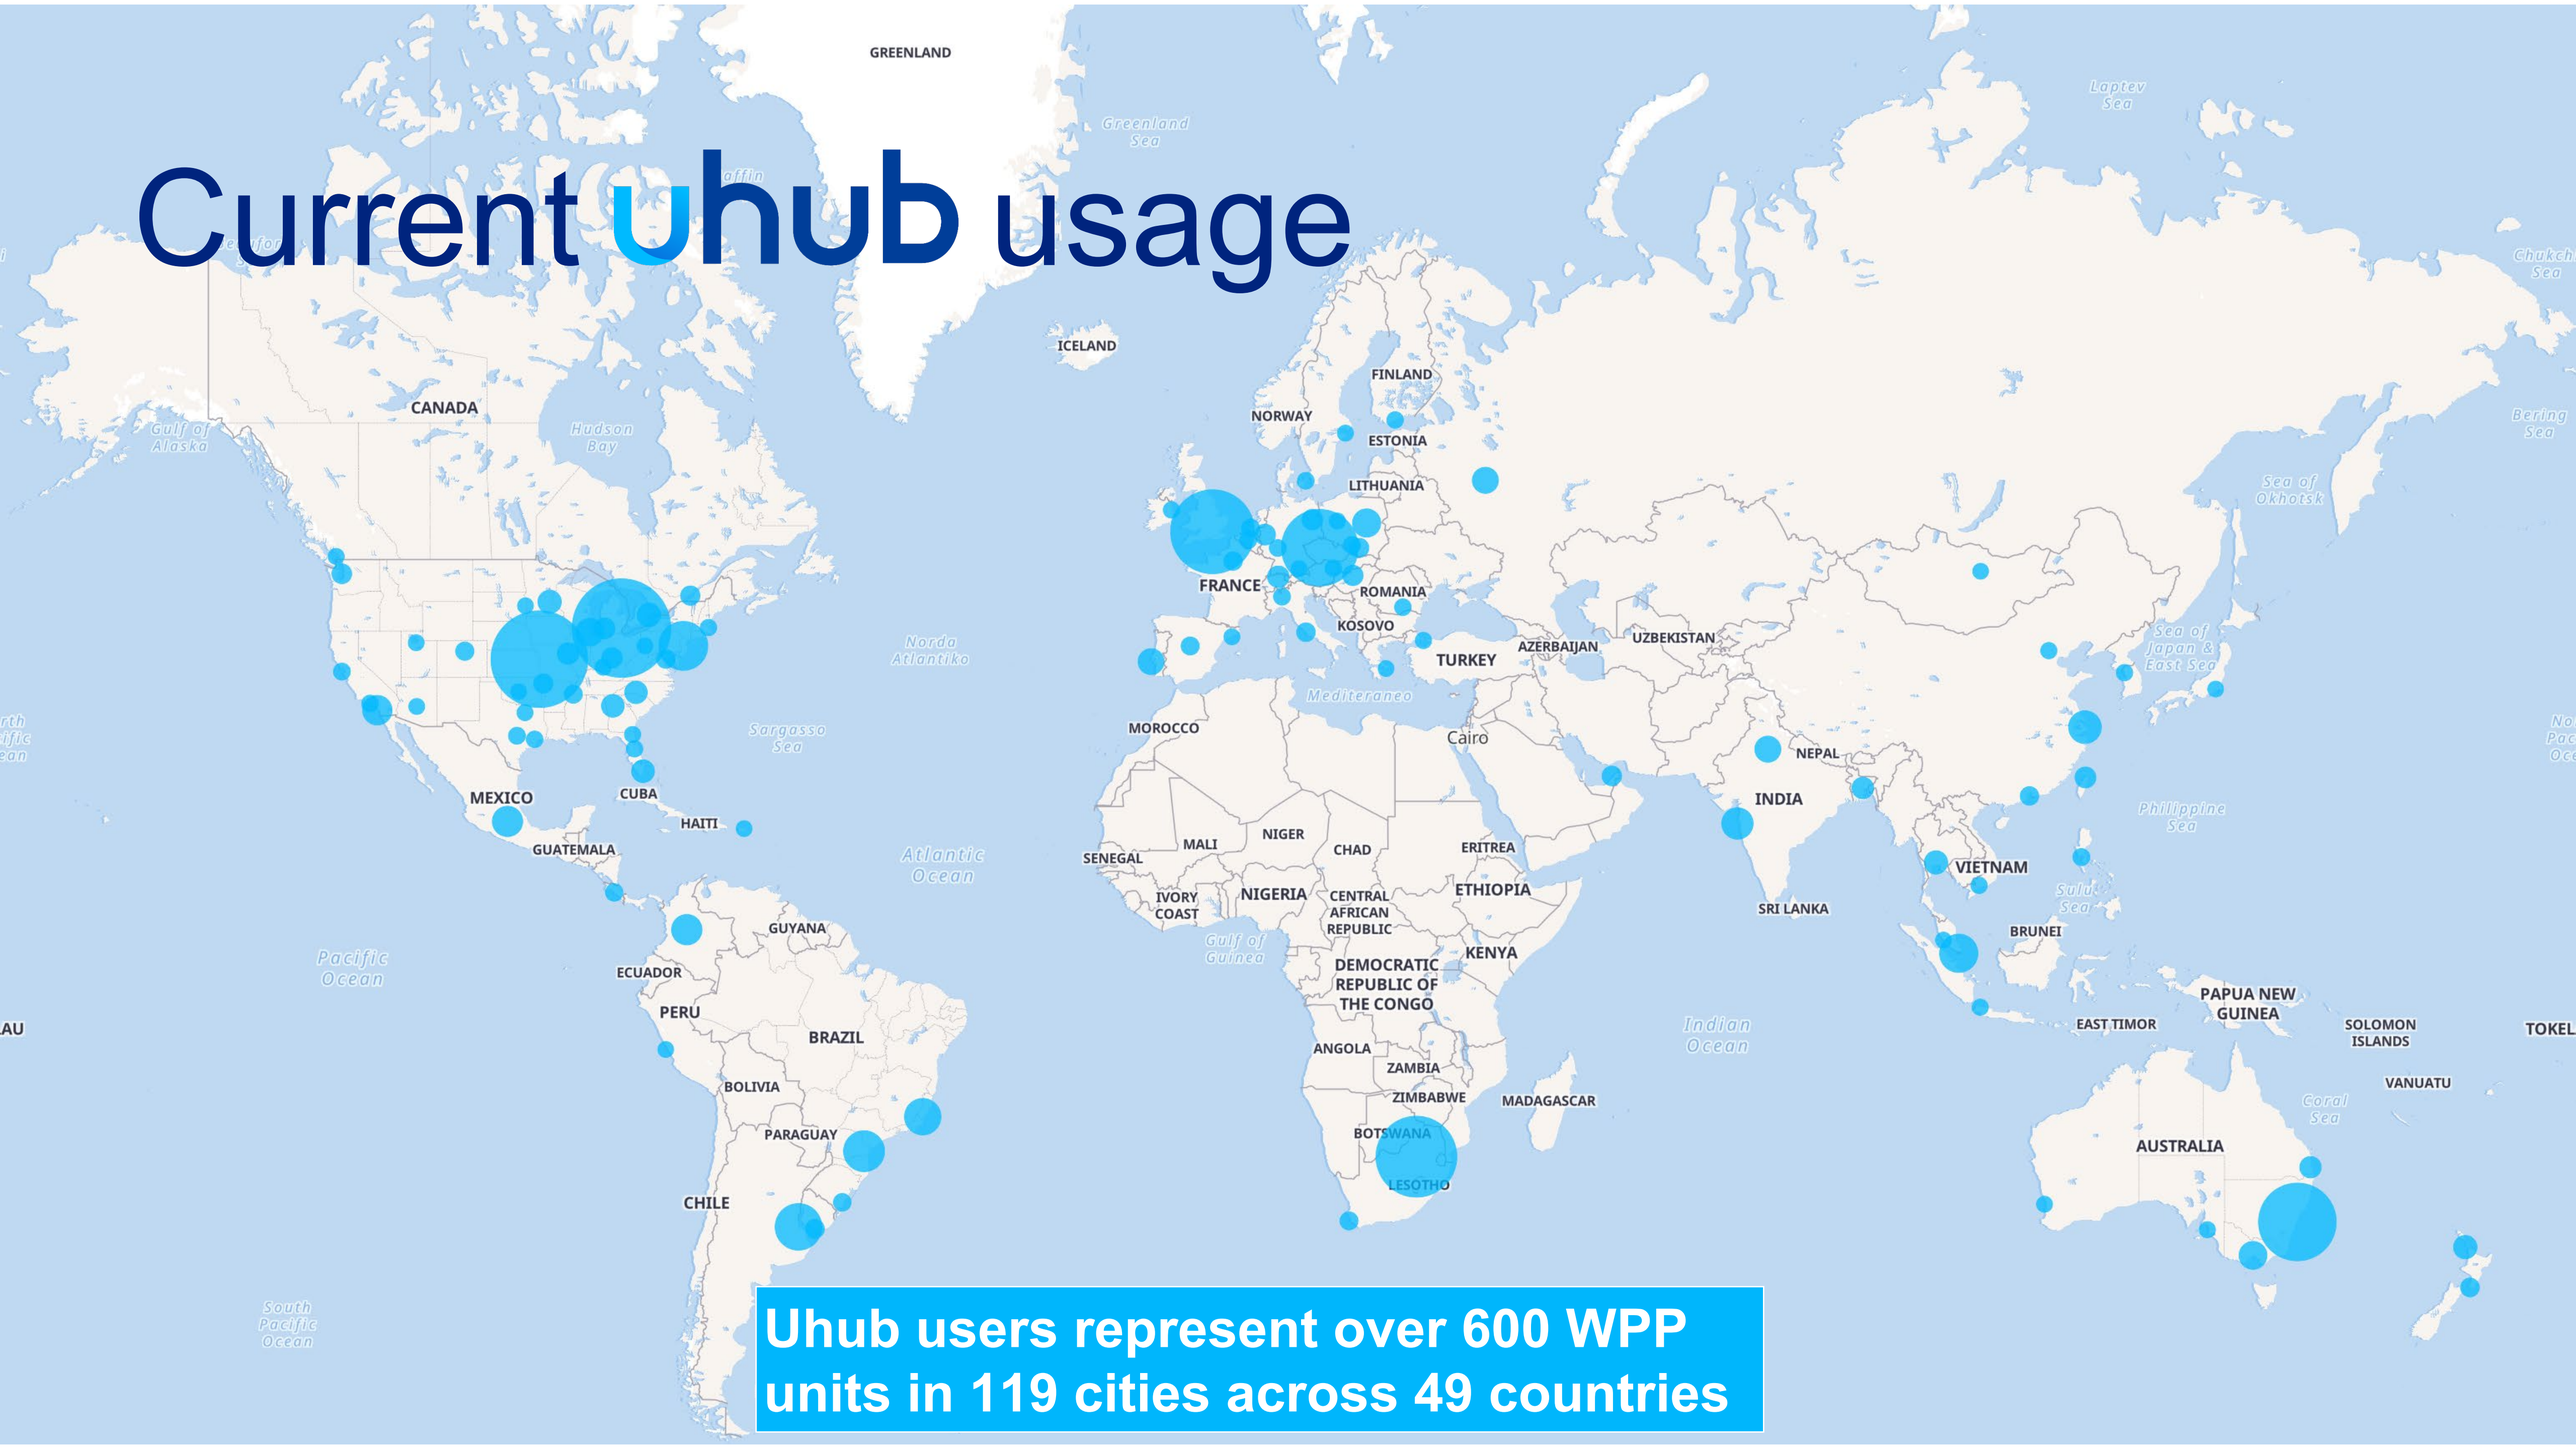

Bamboo: 6,939 Continuous Integration builds running 233,941 automated tests in the last 90 days

Current uhub adoption: Jira Tasks

*As of Feb 11th, 2022, Uhub Jira tracks 2,523,197 (non-archived) tasks

Current uhub usage

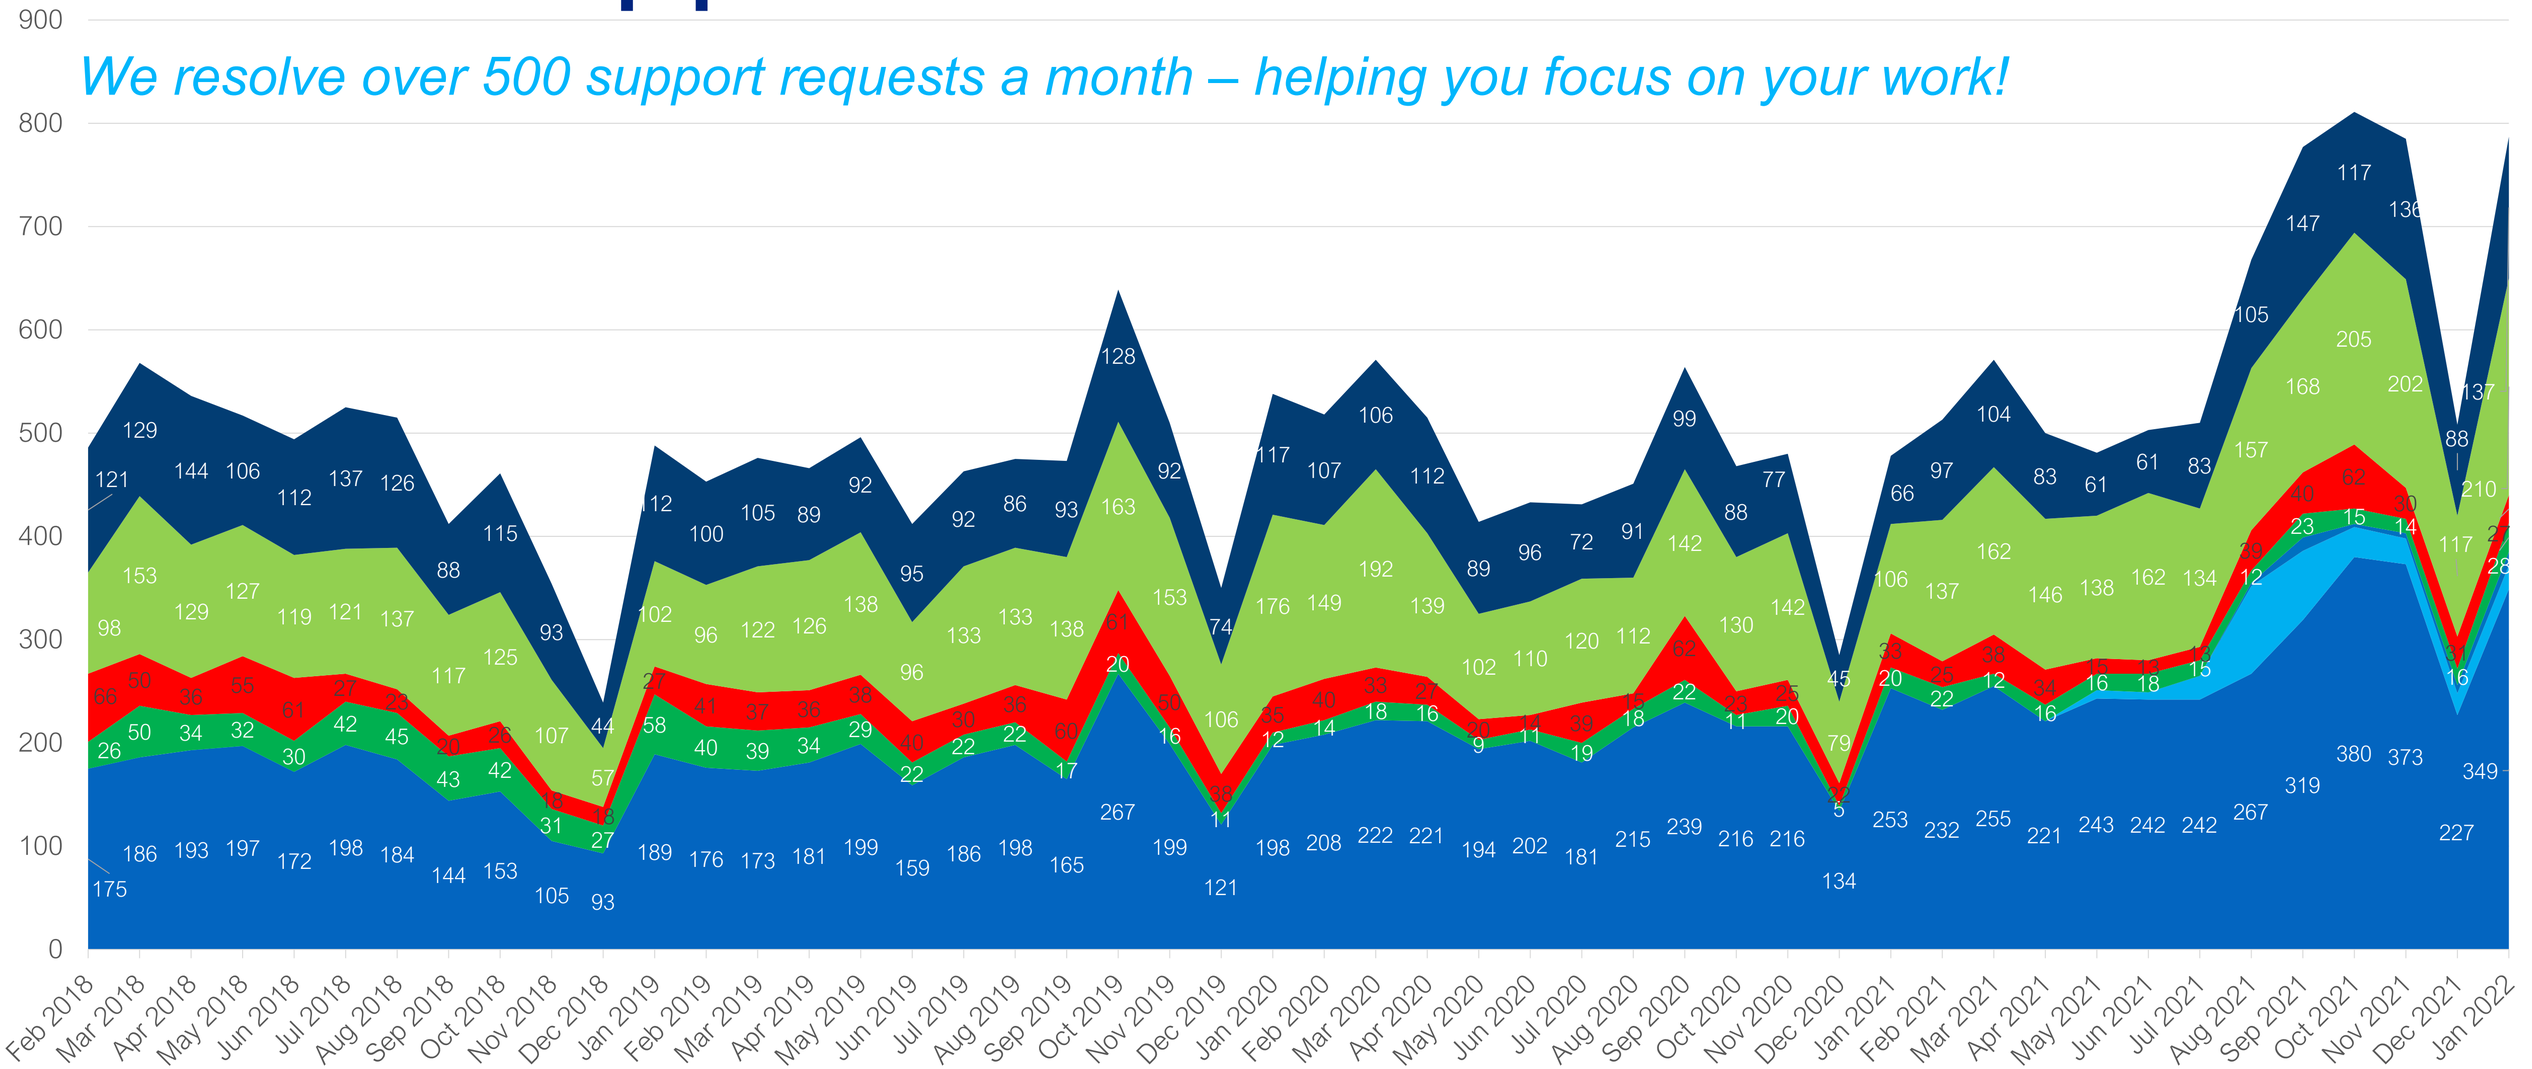

Uhub users represent over 600 WPP units in 119 cities across 49 countries

The uhub Team: providing 24x5 support

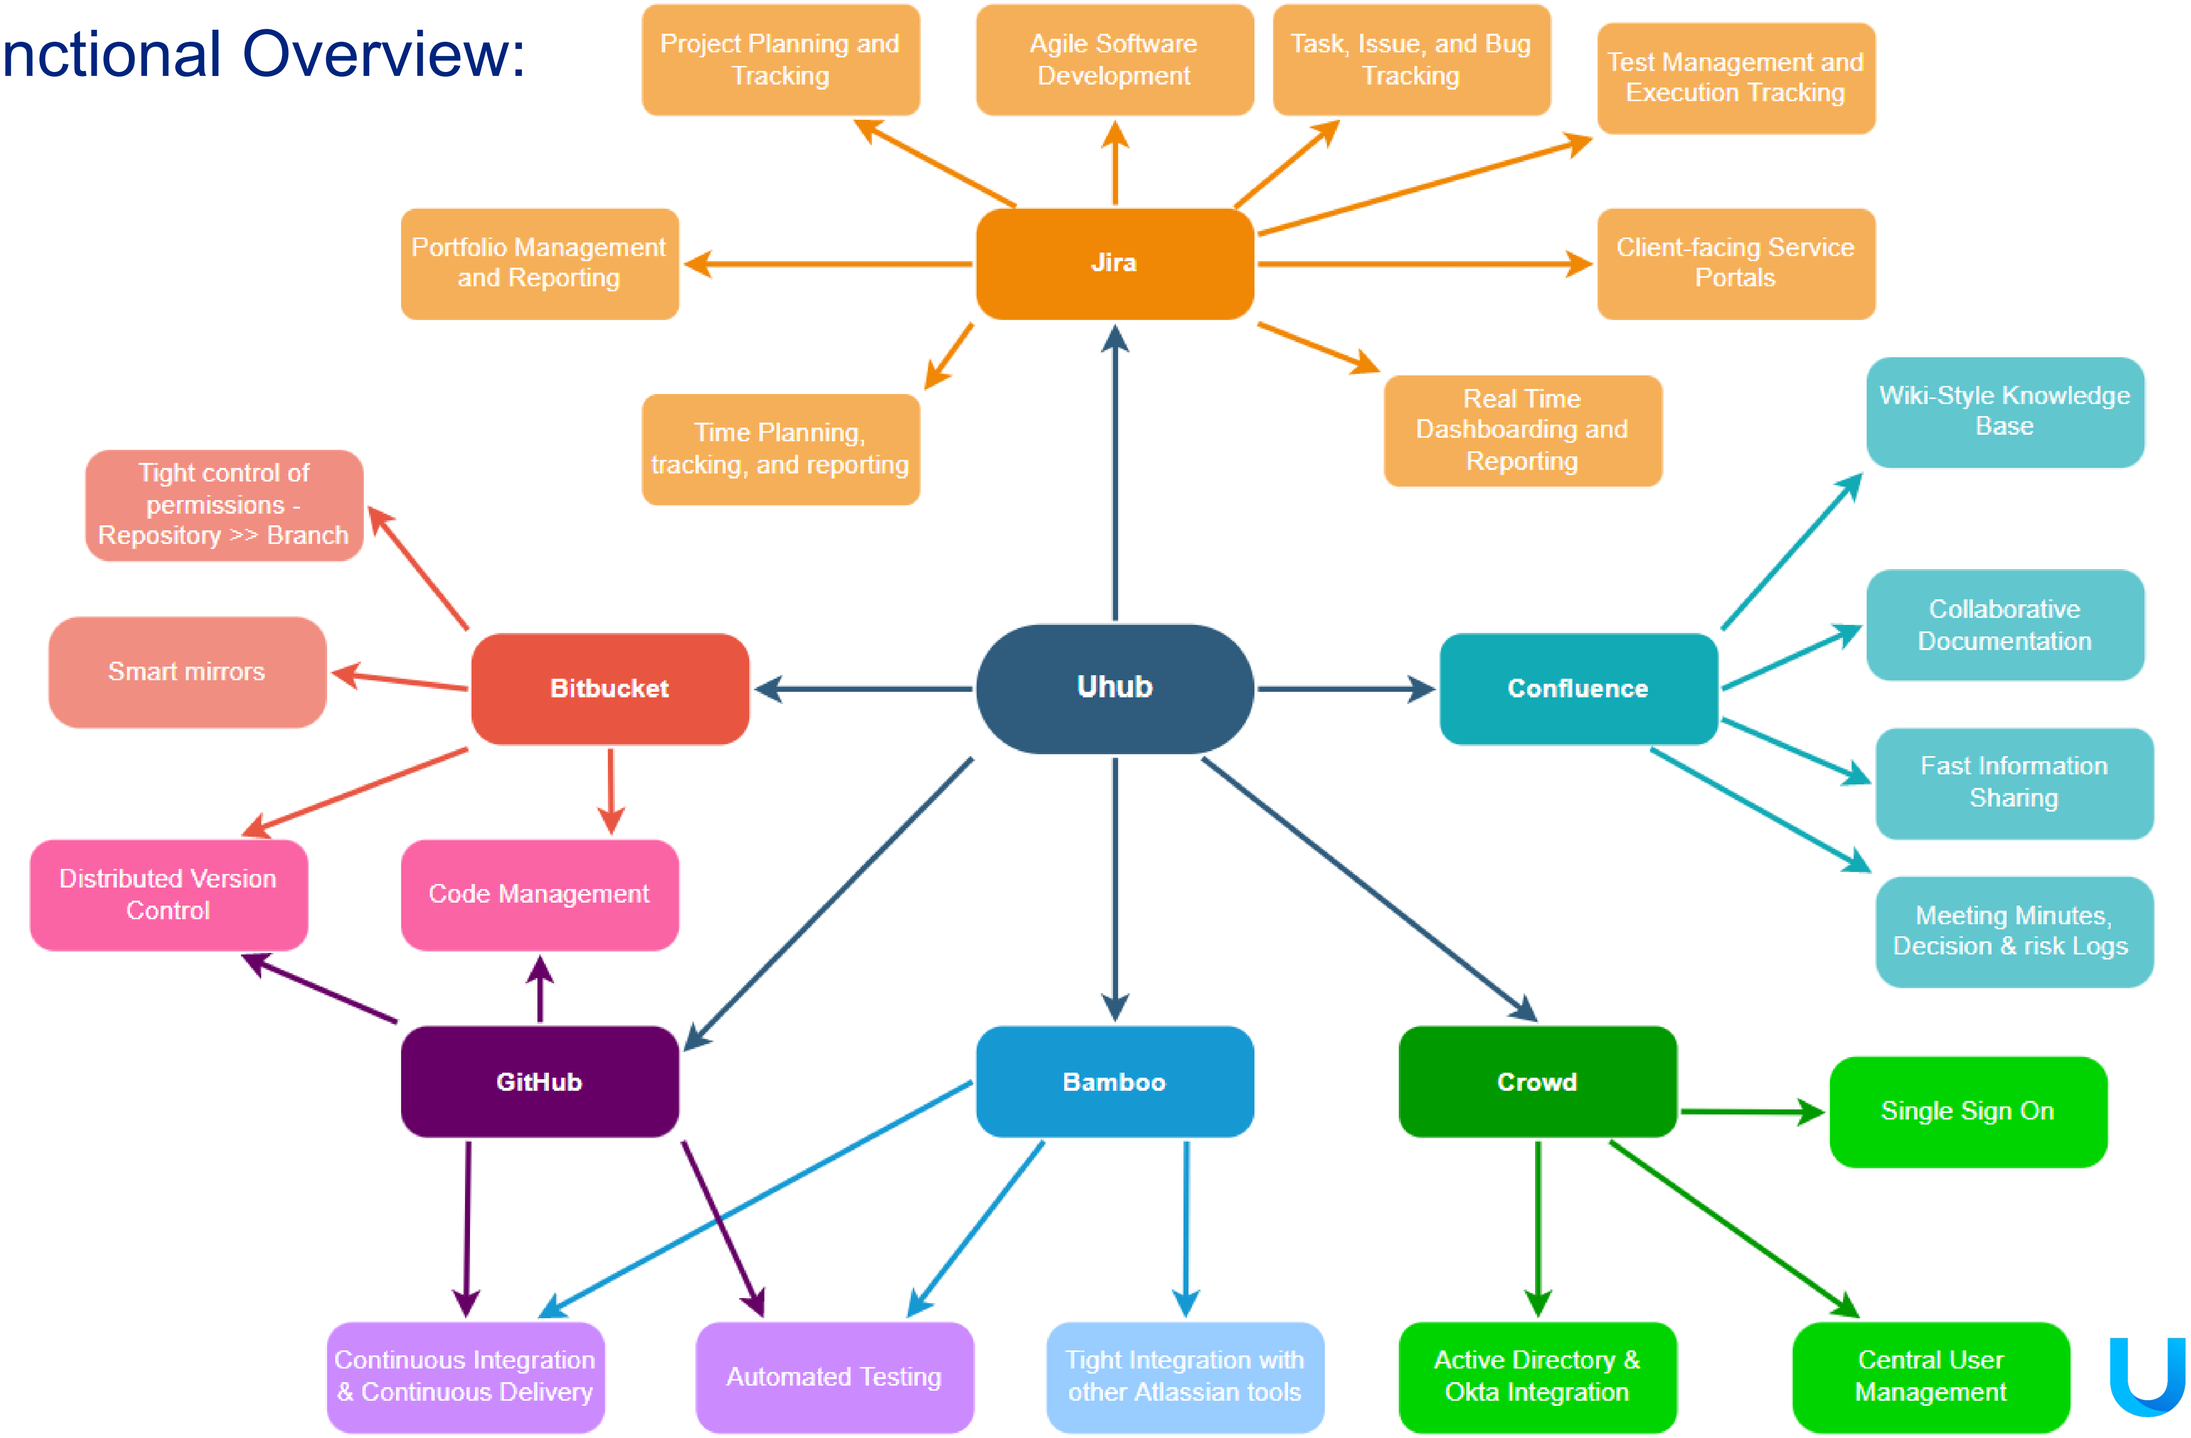

uhub Support Stats

We resolve over 500 support requests a month – helping you focus on your work!

Functional Overview:

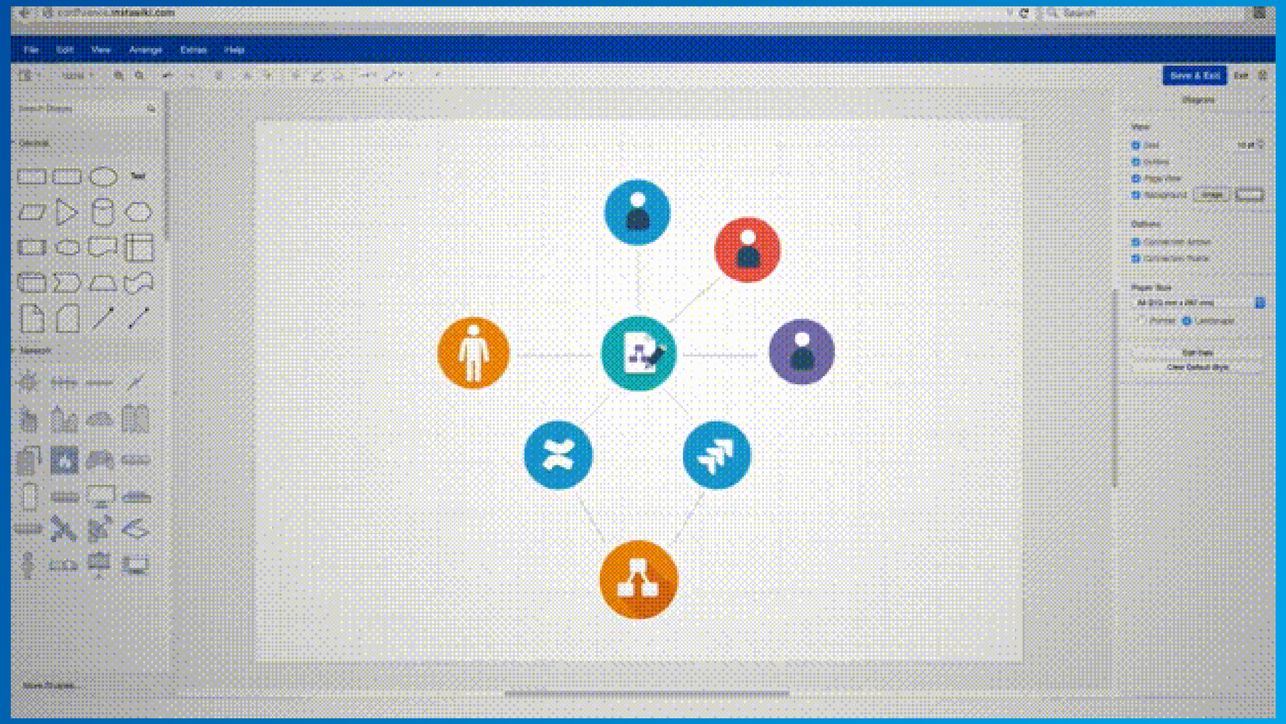

uhub

What can uhub help with?

Requirements / Tech Specs / Knowledge base

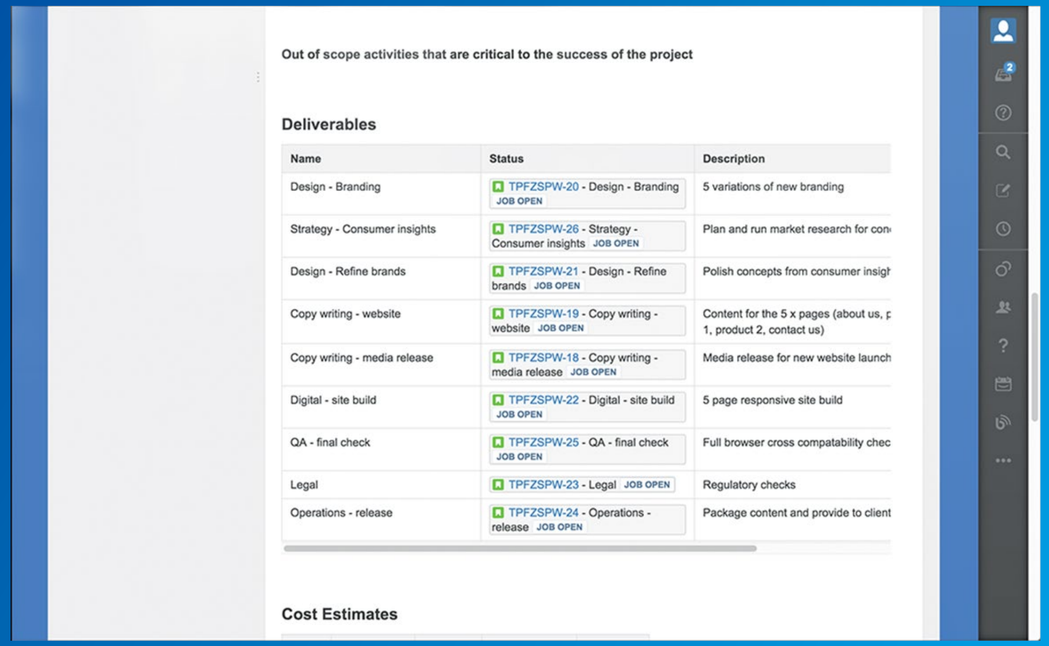

- Organize your work, create documents, and discuss everything in one place.
- Templates help ensure you get the right information every time.
- Save time by reusing content – simply include it in as many spaces where it’s relevant
- Express yourself visually using a number of charting and other macros

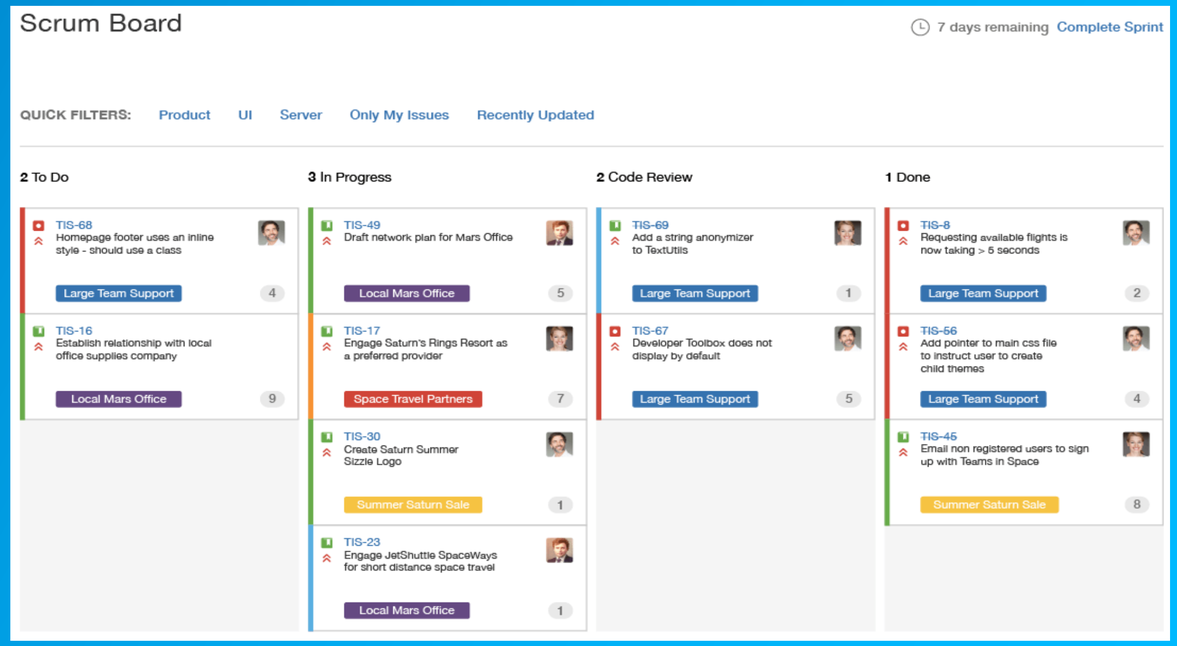

What can uhub help with?

Task Management

- Create tasks for you and your team to work on, including details, due dates, and reminders.
- Utilize subtasks to break down larger items of work. Epics, Stories, and other elements of work hierarchy may help further categorize and track tasks.
- Allow others, including clients, to watch the task to track its progress and be notified when it’s completed.
- View all tasks on the board to easily visualize each’s status.

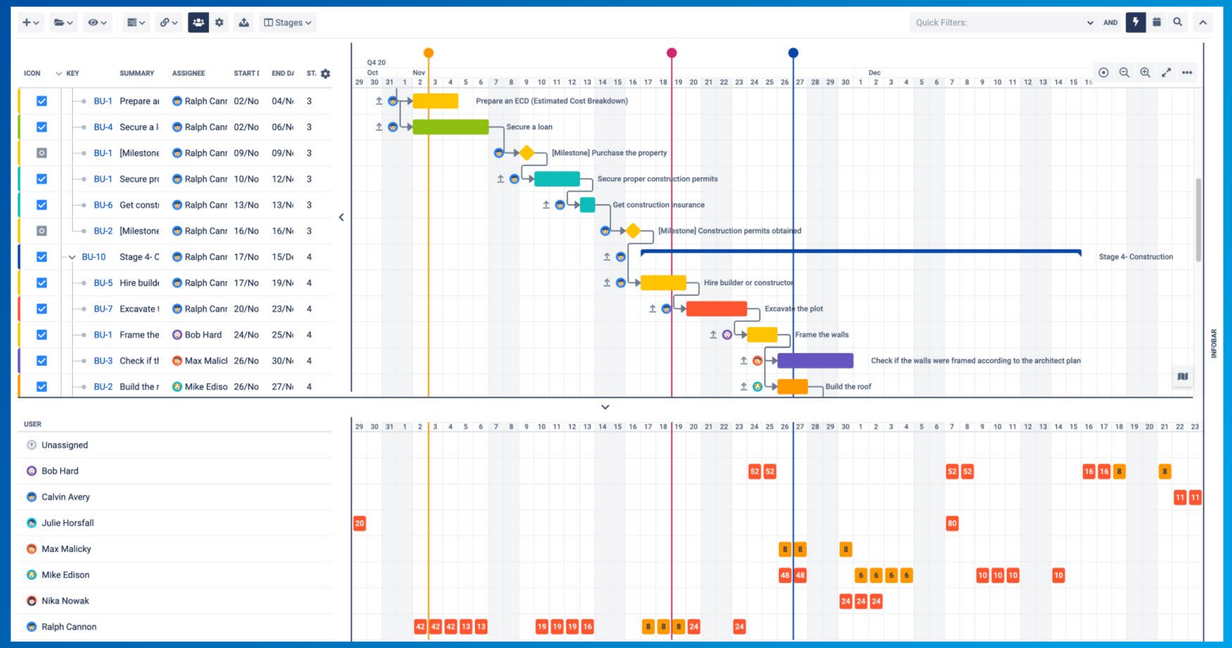

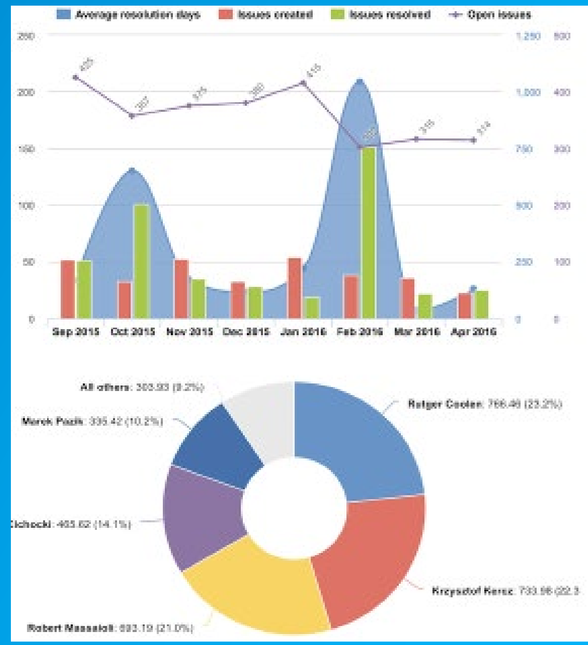

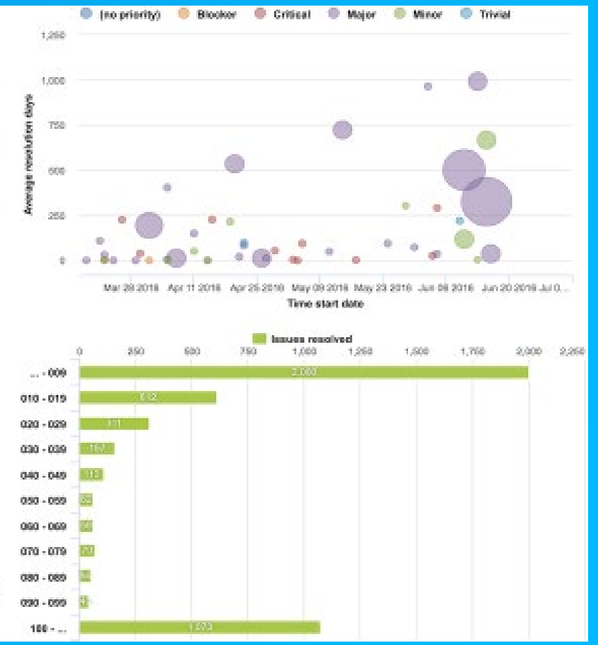

What can uhub help with?

Project Management

- Uhub can be configured to fit many types of projects.
- Start with a project template or create your own custom workflows.
- Track each piece of work that needs to pass through the workflow steps to completion.
- Utilize gantt charts, boards, swim-lanes, reports and other tools to track progress and ensure productivity.

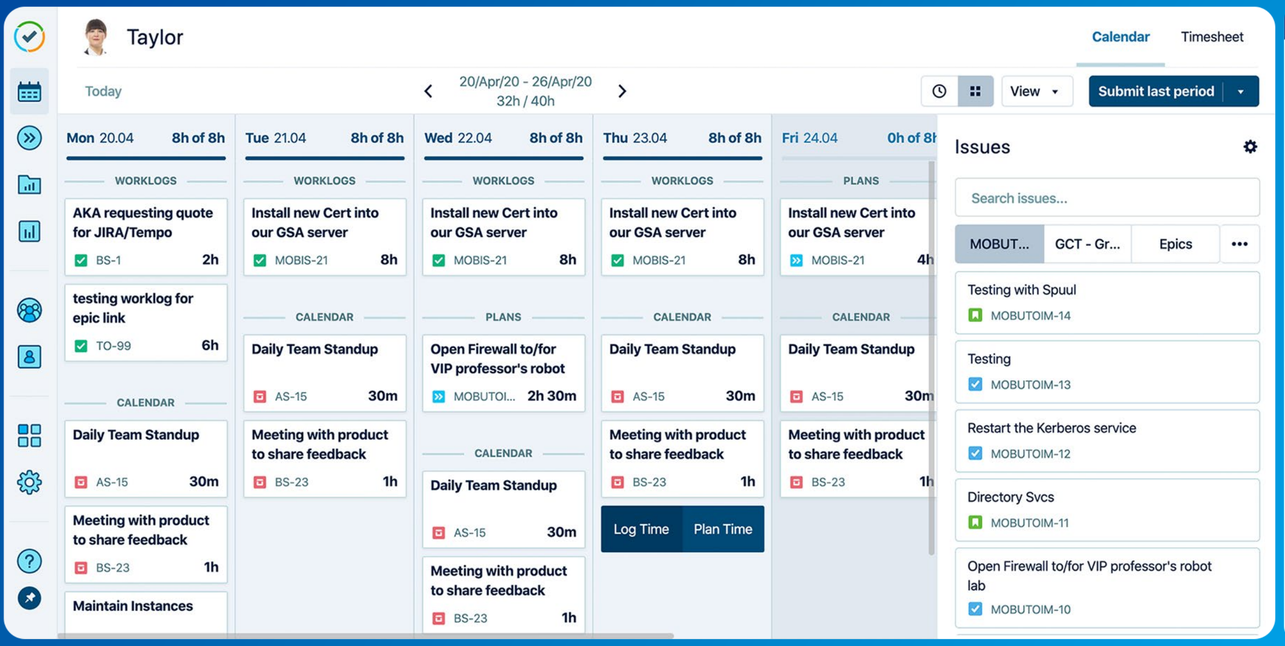

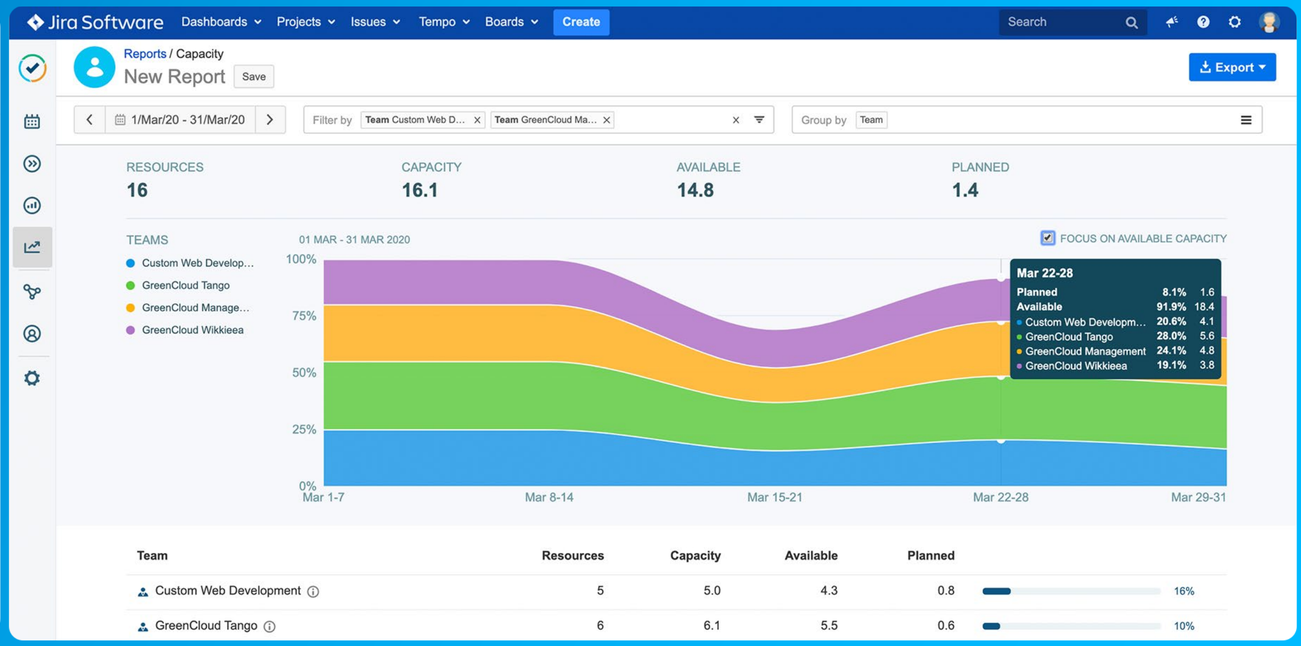

What can uhub help with?

Resource Management

- Estimate the effort involved in delivering your tasks and projects.
- Plan for which resources you'll need.
- Assign people to work on tasks or projects according to the exact needs
- Report on required resources and plan for multiple scenarios

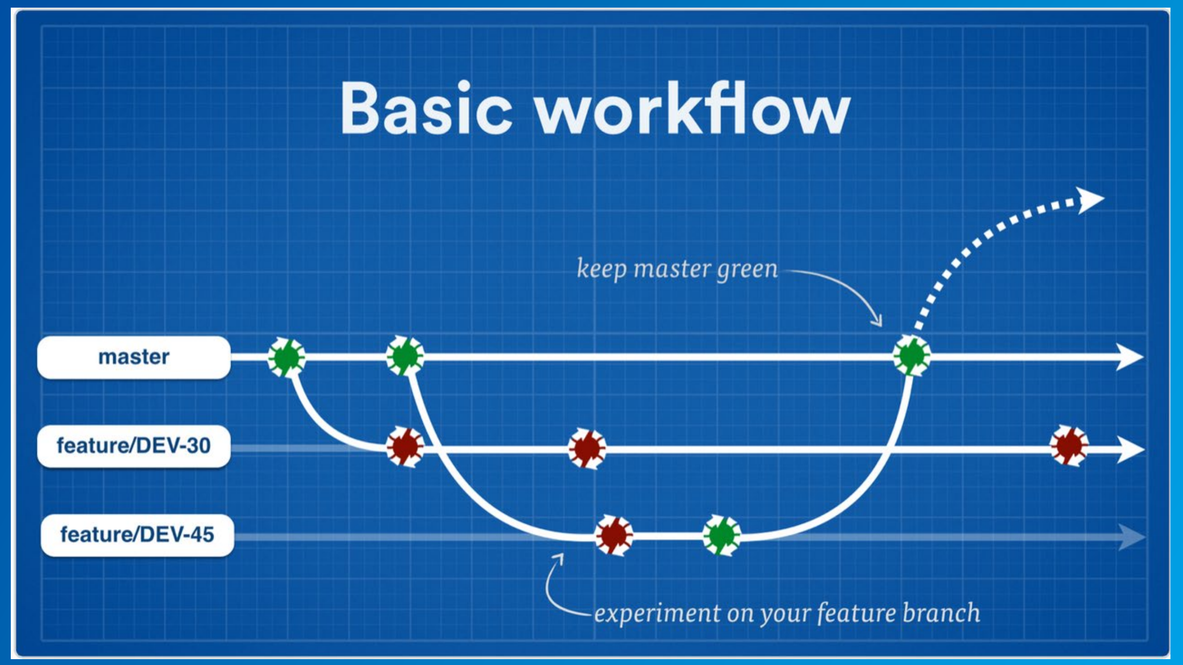

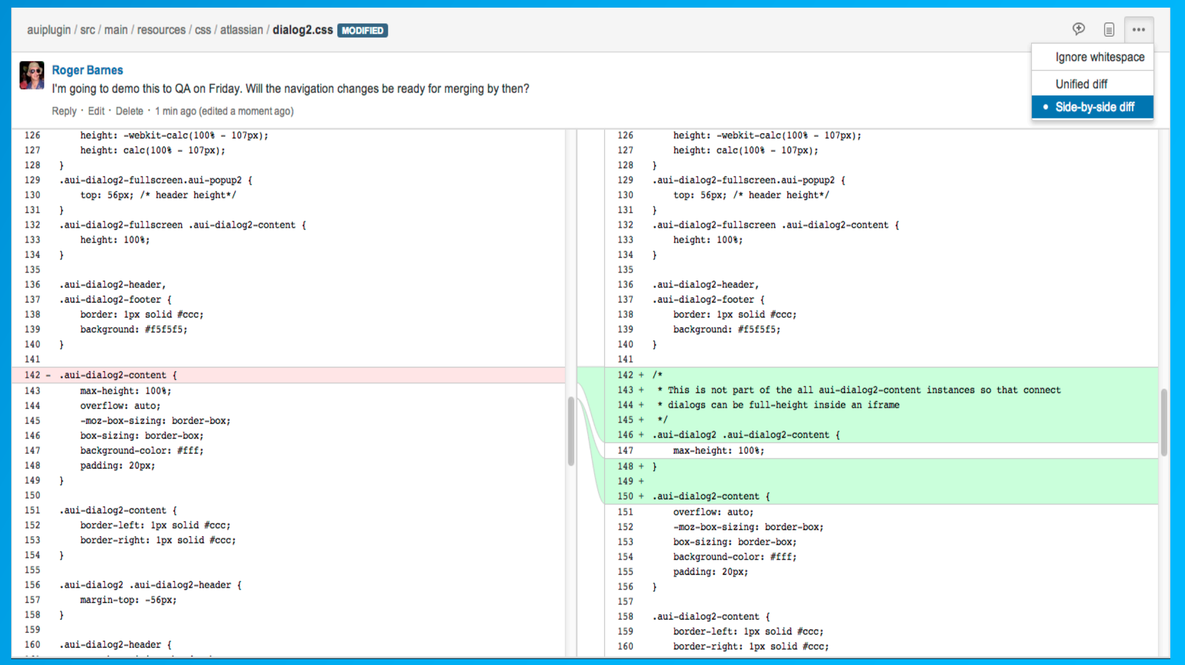

What can Uhub help with?

Code Management

- Check code in/out of a secure, repository. Branch permissions give you granular control.
- Continuously build using Uhub's Bamboo service, or your own CI/CD tool, such as Jenkins
- IDE integrations, pull request capabilities, diff views, merge checks, and other tools
- Surface code status/integration information in Jira, confluence, or other tools

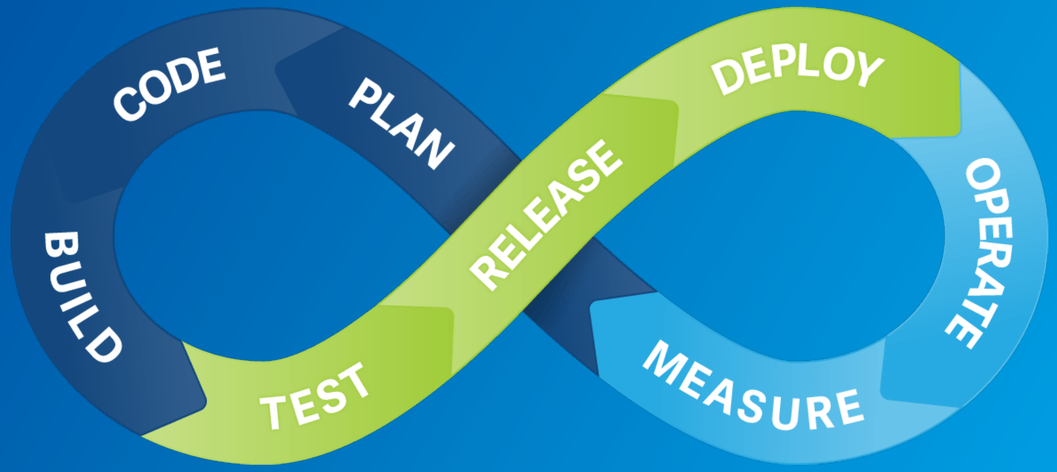

What can Uhub help with?

Continuous Integration and Continuous Delivery

- Tight integration between Uhub's Jira, Bitbucket and Bamboo can show:
  - Build status against each commit
  - Per-environment deployment status in each Jira ticket
- Bamboo Specs (YAML or Java) allows builds to be codified and stored within each application’s repository
- Uhub's Bamboo builds all run in docker containers giving your team the flexibility to support your desired environments & dependencies for Linux (Windows containers coming soon)
- Automate your tests in Bamboo and send the results to Uhub's Zephyr Scale

uhub Applications

Collaborate & Document Requirements

Confluence

Spend less time hunting things down and more time getting things done. Organize your work, create documents, and discuss everything in one place.

Comala Workflows

Take control of your Confluence pages with simple or complex reviews, tasks and approvals processes.

draw.io

(Replaces Lucidchart) Draw professional diagrams that communicate important ideas, information, and processes.

ConfiForms

Create forms in Confluence. Scaffolding advanced data collecting apps with workflows is easy and fast

Content Exporter

Easily export Confluence content the way you want

uhub Applications

Plan, Track, & Support

Boxed components represent additional costs/licenses

Jira Core

Manage any business project including marketing campaigns, HR onboarding, approvals and legal document reviews.

Jira Software

Plan, track, and release world-class software with the #1 software development tool used by agile teams.

Jira Service Management

Give your clients an easy way to ask for help and your agents a fast way to resolve incidents.

BigGantt - Gantt Chart for Jira

Visual project and portfolio planning and scheduling with dependency visualization and control, auto-scheduling, critical path and baseline analyses, using a commonly accepted PPM paradigm.

uhub Applications

Plan, Track, & Support

TEMPO TIMESHEETS

Time tracking and reporting for Jira.

TEMPO PLANNER

Visualized resource management and planning for Jira.

TEMPO BUDGETS

plan for and monitor financials across clients and accounts.

eazyBI

Full BI & reporting platform for Jira + data from external sources

Design & Prototype

InVision

Pair design prototypes with Jira tasks**.

Test & QA

Zephyr Scale

Full requirements traceability for test cases & cycles in Jira

uhub Applications

Code, Build, Ship & secure

Boxed components represent additional costs/licenses

Collaborate on code with inline comments and pull requests. Manage and share your Git repositories to build and ship software, as a team.

Continuous integration, deployment, and release management.

Manage your Git repositories, review code like a pro, track bugs and features, power your CI/CD and DevOps workflows, and secure code before you commit it.

Empower your developers to write cleaner and safer code with Continuous Code Quality & Code Security

uhub Applications

Platform Support

Crowd

The single sign-on and identity management tool connecting our agencies to the Uhub suite.

Statuspage

Incidents happen. Keep your users informed and ditch the flood of support emails during downtime.

uhub

The custom-built portal at my.uhub.biz supports critical agency processes by providing access and visibility into the various Uhub tools, with additional business-logic-based rules applied than typically supported by the tools themselves. Dashboards and custom views add value by allowing many disparate sources of information to be consumed at a glance.

uhub Hosting, Infrastructure & Partners

Uhub is hosted in an AWS environment managed by the Uhub team to exacting standards of Reliability, Performance, and Security. Uhub was recently audited against the AWS Well Architected Framework, rating an excellent overall score, including 6/6 in the Operational Excellence category.

The Uhub team utilizes Puppet to automate the provisioning, configuration and ongoing management of our environment, allowing rapid, repeatable changes as well as maintaining consistency across systems and servers.

Uhub partners with Adaptavist, the largest independent Atlassian Solution Partner, on Licensing, add-on management, and best practices. Adaptavist's add-ons power a significant portion of **Uhub Core**.

uhub Add-Ons: Jira

Jira – Improved Functionality

- Tempo Timesheets, Planner, & Budgets
- BigGantt
- Zephyr Scale
- eazyBI Reports and Charts for Jira
- My ToDo
- Elements Connect (formerly nFeed)
- Projectrak - Jira Project Tracking
- InVision for Jira
- Email This Issue
- ScriptRunner for JIRA
- Capture for Jira
- Automation for Jira
- Out of Office Assistant
- Select2

Jira – Improved Administration

- Configuration Manager for JIRA
- Bob Swift's Jira Command Line Interface (CLI)
- Jira Misc. Workflow Extensions
- JSU Automation Suite for Jira Workflows
- Power Admin
- Statuspage for Jira Service Desk
- Bulk Clone Professional

Jira – Coming Soon!

- Office365 for Jira
- Herzum Approval
- Refined for Jira
- Elements Copy & Sync

uhub Add-Ons: Confluence

Confluence – Improved Functionality

- ConfiForms, forms and workflows
- Content Exporter (Word, PDF, HTML)
- draw.io
- Comala Document Management
- Refined for Confluence (+ RefinedToolkit)
- Team Calendars
- Survey and Vote Macros
- Questions for Confluence
- Content Formatting Macros

Confluence – Improved Administration

- Copy Space
- Bob Swift's Confluence CLI + Table Library

uhub Add-Ons: Bitbucket/Bamboo

Bitbucket

- Awesome Graphs
- Bitbucket Web Post Hooks
- Webhook to Jenkins
- Sonar for Bitbucket

Bamboo

- Tasks for AWS (+Identity Federation for AWS)
- Puppet
- Sonar for Bamboo

Cost recovery model in 2022

Uhub's costs include licensing, hosting, and staff.
These are apportioned to agencies via a quarterly recharge.
Cost model to support Uhub:

- $12/Month for Uhub Core (Jira, Confluence, and all add-ons)
- $6/Month additional for Bitbucket
- $100/Month per team for Bamboo, including 600 minutes of build time ($100 for each additional 600-minute block)
- $25/Month additional for Jira Service Management Agents (Service Desk Customers are free)
- No charge in 2022 for GitHub ($12 / month in 2023 & beyond)
